Western University of Health Sciences  
College of Osteopathic Medicine of the Pacific  

D.O. Class of 2014  
Vision Statement

As we honor the ingenuity and commitment of those who came before us, we strive to forge new horizons for the future of osteopathic medicine.

We will aspire to excellence as physicians through honest self-assessment and an ongoing capacity for improvement. We will maintain a balance with loved ones, individual pursuits, and personal wellness, while nurturing a passion for medicine that will persevere through hardships.

We will extend the utmost respect to all patients and appreciate their differences. We will provide compassionate care at all times, listening with full attention to the needs of our patients and their families. We will be fully accountable to our patients, because we recognize that our unique relationship has the power to influence their lives.

We promise to use our strengths to give back to society in our own unique and personal way. We commit to leading by example as pillars of professionalism within our communities.

We pledge to support each other academically, emotionally, and personally, so we may rise above the limitations of the individual. We will use our abilities to promote collaboration within a healthcare team.

With gratitude, we acknowledge the contributions of the Western University of Health Sciences community, our peers, and our families to the evolution of a personal and professional identity. We endeavor to allow osteopathic medicine to shape us, as we shape it.
