Class Overview

Compounded medications often play an extremely important role in the quality of patient care and prescribers have become increasingly aware of the benefits that customized medications offer. The pharmacist and pharmacy technician must have a strong foundation on how to prepare these products. Technology has provided the equipment and techniques necessary to compound effectively and accurately. To prepare participants to meet the needs of patients, we have designed a program that will provide the pharmacist and technician the knowledge and skills to prepare the highest quality of compounded medications and services. As part of the course, attendees will receive a Policy and Procedure Manual.

Objectives for Pharmacists and Technicians

- Demonstrate proficiency in the use of the electronic balance, hot plate/stirrer, hand-held blender, Unguator, ointment mill, capsule machine, powder blender, homogenizer, and general laboratory processes, devices, and equipment.
- Demonstrate proficiency in the formulation, compounding, packaging and dispensing of:
  - liquid dosage forms (general, oral and topical)
  - powder dosage forms (oral and topical)
  - cream, gel and ointment dosage forms (topical, transdermal and vaginal)
  - lollipop and troche dosage forms
  - stick (lip balm) dosage forms
  - suppository dosage forms (rectal and vaginal)
- State the importance of quality control and quality assurance procedures.
- Discuss pertinent professional, state, and federal compounding laws and regulations.
- Discuss the importance and availability of compounding references and resources.
- Review the fundamentals of pharmaceutics in non-sterile compounding.
CE Accreditation
Target Audience: Pharmacists and Pharmacy Technicians
Activity Type: Practice

Western University of Health Sciences College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

1.7 CEU’s or 17 Contact Hours
To earn CE credit, attendees will be required to actively participate in the entire session, complete the post test, and evaluate the program. Partial credit will not be given.
