SAFETY TIPS FROM BRETT BOSTON – CROSSING PALOMARES

With respect to the traffic signal at Second and Palomares Streets, please remember to wait for the light, and look both ways before crossing that intersection. To date the score is:

TRAFFIC: 1  
PEDESTRIANS: 0

Please don’t make it worse. We have all seen pedestrians crossing against the light, but now we see pedestrians crossing diagonally through the intersection against the light.

Statistically, more pedestrians are killed crossing WITH the light than AGAINST the light. This is thought to be because when the light changes for the pedestrian, they assume that traffic will stop. When they cross against the light they tend to look both ways. Find the middle road, folks, and be safe.
