

CAPITAL PLANNING & CONSTRUCTION

A NEW DIRECTION

Newly introduced Design/Build monitoring & overwatch

Improved Design-Build processes for less experienced contractors
Tighter cost & time management controls
Increased quality control monitoring

Newly introduced Program Documentation

Project Award Letters

Notice to Proceed/Letter of Intent

Request for Proposal

Capital Projects Agenda/Summary Report

Construction Site Observation Reports

Campus Standards

Divisions 01 & 02 General conditions/Requirements

Architectural Basis of Design

Notice of Construction

Jump Starting with Notice To Proceed

Increased comfort level by Contractors to proceed earlier on “construction at risk” approach on time-sensitive projects where contract conformance process expected to delay.
Provides accelerated work in Design/Build projects where Demo packages can get jump-start while contract finalized.

New Comprehensive RFP packages

Closed large gaps in competing bid discrepancies
Streamlined pricing with submitted standards/cut sheets
Provided greater information for more overall accurate pricing
Provided bid direction for similarly formatted responses
Yielded more professional comprehensive bid packages
Yielded more structured pricing for improved costing per Division spec
Paved way to allow formal bid point scoring processes

Stakeholder immersion into project

Construction Observation reports provide summary of progress while functioning as task deliverables and needs report for all parties. The status section keeps needs at forefront while the 3-week schedule lookahead provides summary Gantt chart update of project stages. The photo journal section allows stakeholders visual updates and virtual construction site tours via the description tagged photos without having to be present at jobsite.

New Notice of Construction

Improved communication and transparency with new campus wide notification. The announcement includes various informative updates on project area, construction flow, reserved parking and timeframes of work. This also serves as opportunity to remind everyone about safety zone protocols and emergency contact information.
The Notice of Construction is formatted to plug-in to the newly revamped construction update website that is in progress.

Project Management Tools

Project Program Workbook

- Project Communication Charter
- RFP/Bid Summary-Analysis Worksheet
- RFP Scoring Matrix
- Budget tracking/reporting
- Program Schedule

AutoCad

- AutoCAD customized to MetaBIM floor plan interactivity & output

BlueBeam Studio

- Increased speed and efficiency in RFI & Submittal management
- Easier online virtual document sharing & markup
- Enhanced PDF management & accelerated distribution

Facilities Construction Website

- New Facilities Construction page
- New Vendor/Contractor info page

POMONA CAMPUS STANDARDS & DIVISION 00 & 01 SPECS

New Campus Standards. WesternU Capital Planning & Construction has newly introduced Campus Standards for all the Non-Creative Design elements of the University. Capital construction infrastructure focuses on repair cost, maintenance time as well as product availability for when project is complete and handed-off to Facilities maintenance. Campus standards promote lowered cost and improved aesthetics for a unified University campus feel, while also improving serviceability and reduced stocking/ storage issues.

New DIV. 00 & 01 Specifications. Divisions 00 & 01 Specifications in the CSI Master format of Industry best practices has been developed for implementation by WesternU's Capital Planning & Construction program. The newly introduced General Conditions & General Requirements establishes contractual needs for projects that become part of the official contract. These processes provide contractors with up-front clear expectations and checklists; thus eliminating guesswork and the excuse of any added cost for extra services not planned to be provided by the contractor.

ARCHITECTURAL BASIS OF DESIGN

New Architectural Basis of Design. WesternU Capital Planning & Construction is in continual development of a Basis of Design (BOD) template used to distribute to all colleges seeking Architectural & construction enhancements. The booklet provides the starting foundation of which elements are University and regulatory agency needs of any new remodel.

The BOD sets the standard of construction and design for the University, while guiding end users on the various design elements that are open for consideration.

The BOD will also provide insights to end users about potential risks and delays/challenges faced by the University that are outside of our control, and subject to external requirements by other agencies that may affect timeline and cost.

The BOD is also intended to collect end user design and operational needs to assist expediting the Schematic and Design Development phases of a new project, thus shortening the time spent in the programming stage. The target goal is to reduce the average 12-16 week programming stage down to a 8-10 week turn-around.

After BOD end user input, the Campus Architect will further refine the design parameters to augment or clarify program scope needs, which then become the official design guidelines for any RFP package and/or any awarded Design/Build competition.

The BOD also ensures essential space planning elements are not missed and taken into consideration whereas these were previously omitted and space needs began to falter. Adequate analysis of campus distributed spaces will be requested in the BOD for restroom types, custodial and facilities storage, housekeeping closets, electrical & data MDF/IDF, as well as common spaces as needed.

Architectural Basis of Design

Capital Planning & Construction - Project#

Project:

A new abundance of exciting opportunities will be available with the use of the BOD in conjunction with a design/build competition and any stipends negotiated between the University and the College. Design/Build competitions give the benefit of considering various design presentations and related costs for maximum project, operations & aesthetic value. Consequently, a more precise RFP can be issued to all contractors for final selection of the best desired design approach.

REQUEST FOR PROPOSAL PACKAGES

Facilities & Physical Plant

REQUEST FOR PROPOSAL (RFP)

HPC-Hospital Simulation Lab

Architecture & Construction Program

Project # HPC-021-03
Initial RFP Date Issue: 04/18/2022
Addenda 01, 4/29/2022

Prelim. RFP Due Date (without Cost proposal): Fri, 4/29/2022 by 12:00pm Noon, Pacific time (PT)
Final RFP Due Date (with Cost proposal): Thur, 5/02/2022 by 12:00pm Noon, Pacific time (PT)

Project Delivery Method: Design/Bid
Estimating method: Rough Order Magnitude (ROM)
Construction Contingency to be included: 10%

This RFP is also available online at **NIA**.
All questions regarding this RFP should be directed **ONLY** to individuals listed below:

Material or substantive information provided to any bidder, as a result of questions received regarding RFP, will be provided to all bidders via an addendum.

New Request For Proposal Format. WesternU Capital Planning & Construction has newly introduced a more robust RFP package to replace the previous 2-3 page summary outline & schematic floor plan.

RFP Packages now contain more detailed information which includes; Instructions to bidders, University requirements, Construction area and access route diagrams, staging maps and pre-construction planning guidelines, expected schedule target dates, request for Information (RFI) responses to all bidders & much more.

University Campus product spec sheets for facilities standard fixtures are now incorporated into RFP packages to streamline campus aesthetics & maintenance. Campus standards documentation is slowly being rolled-out on future packages.

RFP/BID ANALYSIS

New RFP/Bid Analysis. WesternU Capital Planning & Construction has now introduced a more formal and efficient RFP/Bids review process to better compare and validate for fair competitive submissions. This also helps to ensure all aspects of the project are incorporated and no major omissions or extra work is included by any contractor. The omissions are reported back during a correction period for resubmission to ensure apples-to-apples pricing model that reflects true cost margins for each contractor.

The cost analysis helps identify each contractor's cost per s.f. which is used in conjunction with past performance factors in helping to determine best suited candidate for any given project.

The results from this new streamlined process are then taken and inserted into the next phase of evaluation. The data is added to a RFP Scoring Matrix where the final values are calculated to determine low average and high cost indexes. A percent deviation figure is calculated and a +/- delta is determined for acceptable cost deviations from a calculated accepted average valuation of the individual project.

New RFP Scoring Matrix. WesternU Capital Planning & Construction has adopted a more recognized format of evaluation and scoring used throughout other major Universities. A scaled-down version of a UC system process has been implemented for fair and thorough evaluations.

1. During development of the RFP, key project needs are determined and these project criteria are inserted as questions and requirements on the scoring matrix.
2. If deemed necessary, a committee scoring system has been established to allow other stakeholders opportunity to review RFPs for completeness and experience applicability toward the project.
3. Financial data is entered for cost index calculations used in conjunction with other scoring factors.
4. A final tally across multiple categories of Price, Experience, RFP completeness, Past Performance & resource availability is taken to determine best viable candidate for the given project.

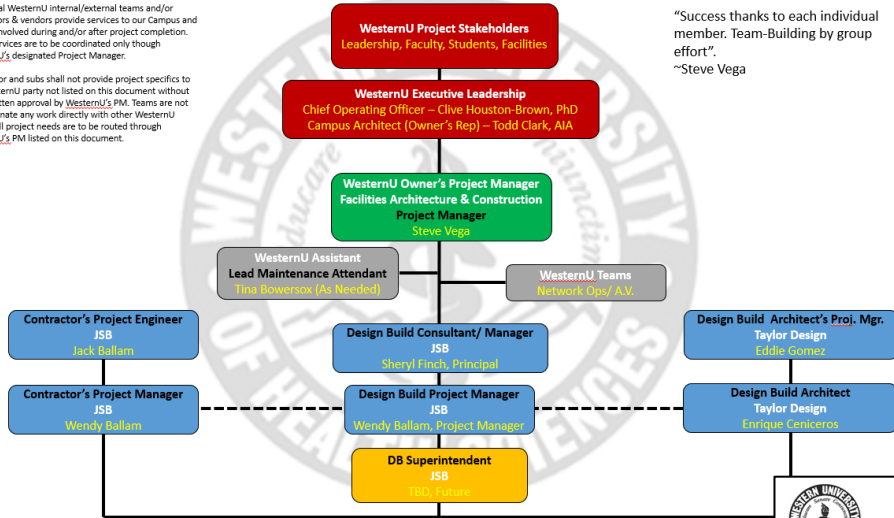

CAPITAL PLANING & CONSTRUCTION COORDINATION

Western University Of Health Sciences DESIGN BUILD (DB) - PROJECT TEAM

Additional WesternU internal/external teams and/or contractors & vendors provide services to our Campus and may be involved during and/or after project completion. These services are to be coordinated only through WesternU's designated Project Manager.

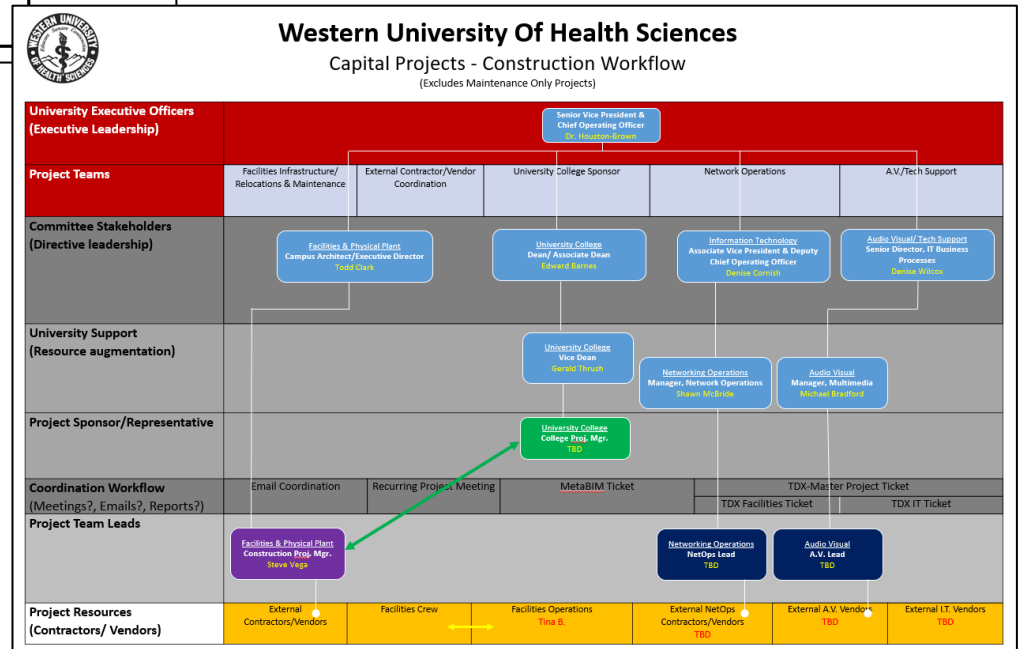

Contractor and subs shall not provide project specifics to any WesternU party not listed on this document without prior written approval by WesternU's PM. Teams are not to coordinate any work directly with other WesternU teams. All project needs are to be routed through WesternU's PM listed on this document.

"Success thanks to each individual member. Team-Building by group effort".
~Steve Vega

Construction Communication Workflow. The image to left shows the identified core team leads for the construction project and its daily management. These General Contractor team leads and subcontractor leads are the key personell to collect, assess and take action for the project as directed by the University Representatives (Campus Architect & Const. Proj. Mgr.)

University Communication Workflow. The image to the right shows new distribution exhibits to identify project stakeholder committees and other coordination parties involved. This step is critical to ensure no other college or external teams are omitted during the construction and coordination process. This document also helps ensure accountability and remove guesswork or limit excessively added coordination members which cause the ill effect of "too many cooks in the kitchen". This ensures one responsible point of contact for each department unless the transition is made official via this document and its redistribution.

Mon. March 14 (NTP) thru Fri. Sep. 16
Mon. - Fri. 7:00am - 5:00pm
 *Off-hours work to be pre-approved by Steve Vega, WesternU Construction Project Manager.
 *Daily Check-in **REQUIRED** by Contractor Lead at Facilities.

B. Other Topics/Questions:
Parking Permits may be required starting April. Coordinate with Steve Vega for parking permits to be provided.

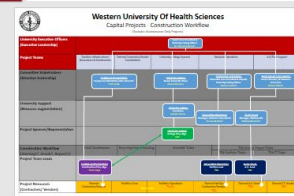

New Construction Kick-Off Packages. WesternU Capital Planning & Construction has developed contractor kick-off packages that guide new oncoming workers with the various guidelines and contact information necessary to get the started working on campus safely and with proper procedures by the University and its various constituents.

The package outlines various processes that include:

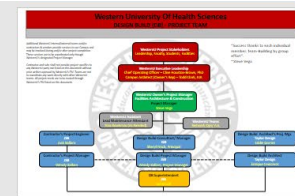

- Project contacts & Emergency contacts
- Project start/end dates & working hours.
- Project Stakeholders
- Construction Team identification
- Construction area map & allowed construction traffic
- Construction designated parking
- Construction designated restrooms (if any)
- Work area and storage/staging of construction materials
- Security protocols and procedures
- Site access, key & badge access
- Covid protocols and procedures
- Directions to WesternU Construction webpage for addt'l info.

PROJECTS AGENDA/SUMMARY REPORT

Capital Planning & Construction
Project Status Summary as of Tuesday 06/27/2023

*****PROJECTS ON HOLD *****
Latest updates in red text

BBC-Former Bookstore Renovation/Office Ctr. BBC-0359-01 (D/B, CDG/WM) B-047694-2022/ C-047885-2022						
Contract Stage: Executed	Stage: Permitting	PL	BS	PW	W	F
Scheduled Dates: TBD	Status: On-Hold	-	X	X	X	X

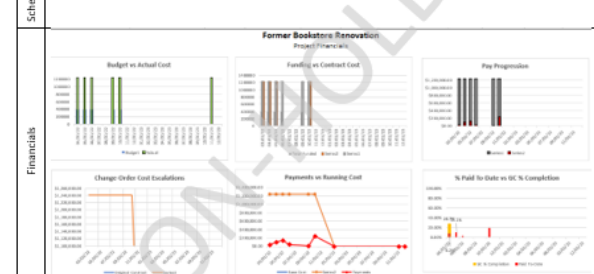

Scope: This project renovates the former bookstore into new HEAR office space, SGA conference room and 1 flex classroom.
Executive Dashboard Milestone

Running Updates **ExtFood, 400K/1.5M**

Updates:
*Project still partially funded per last Capital Projects Budget on 3/1
*Estimate for CUP Package received. Coordinating with city for more specific package needs.
*WesternU still not getting response back from City of Pomona regarding planning hold.
___ COO attempting meeting with City to attempt escalating project and review needs to help move forward.
Pending

Operations

Schedule: TBD

Capital Planning & Construction

RWC-Elec. Room Upgrade (Phase-1) RWC-0309-01 (Design-Bid Build, Lundstrom-Thorpe) C-039976-2020						
Intract Stage: Executed	Stage: Construction	PL	BS	PW	W	F
Scheduled Dates: 3/20	Status: In Progress	X	X	X	X	X

Scope: **new 480volt service to Bldg.**, to accommodate research power & HVAC needs.
Executive Dashboard Milestone

Running Updates **Fully Funded: 1.1m/1.1m**
\$54,000 Elec Room
\$46,000 Ext. Site Util.

Updates:
*Successfully convinced City of scope deletion lessening work and slightly lowering project cost and time.
*Electrical gear still forecasted for September 2023 delivery. Will finish Elec. Room buildout and transition to Exterior site utilities scope while equipment arrives for installation.

Operations
*Cost reduction achieved by applying contingency toward cost increases.
*Exterior double door into Bldg. being installed earlier to accommodate additional Bldg. Entry during **shut-down** of front entry doors during Façade demolition project.
___ Amendment needs signature by Josh, Todd to take to Josh.

Capital Planning & Construction

Facade (Phase-1 & 2 Forensic Demo & Full Demolition) (Design-Build, DL Architects-Perera)						
Intract Stage: Executed	Stage: Programming	PL	BS	PW	W	F
Scheduled Dates: TBD	Status: In Progress	-	-	-	-	-

Scope: This project has architect & engineer look at substructure of selected areas broken open for initial study and on to determine extent of removal and new design/repair possibilities.
Executive Dashboard Milestone

Running Updates **Partially Funded: 60K/205,000**

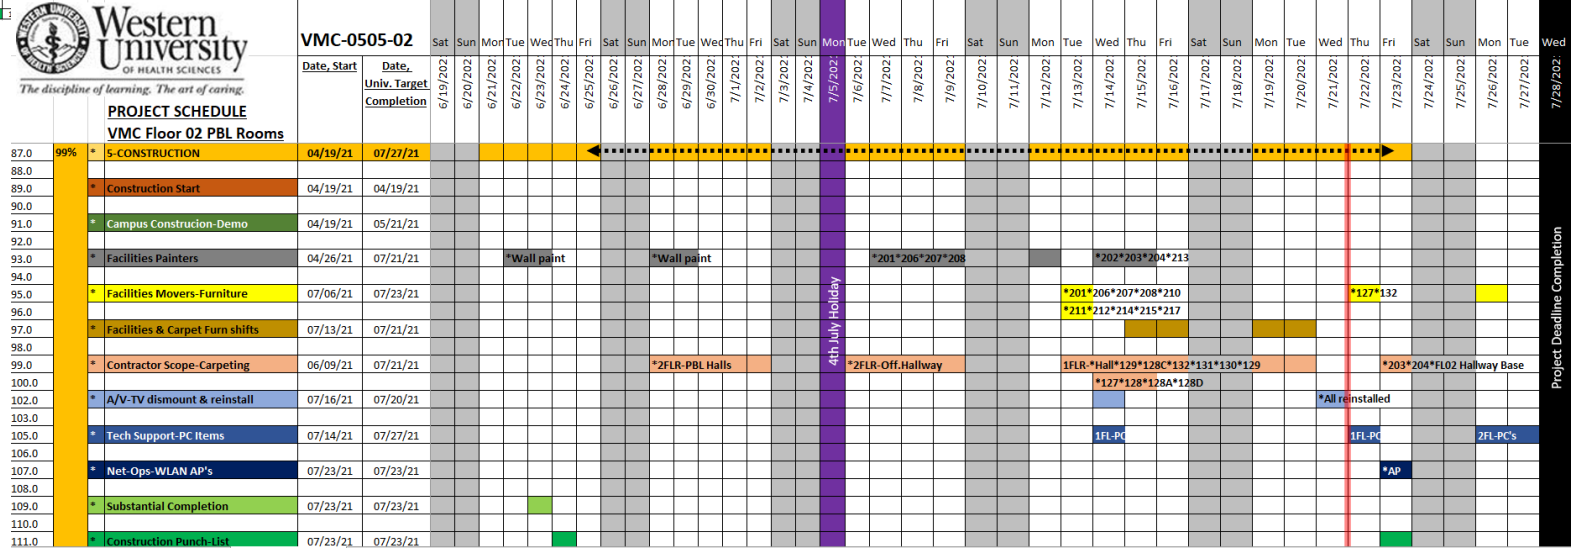

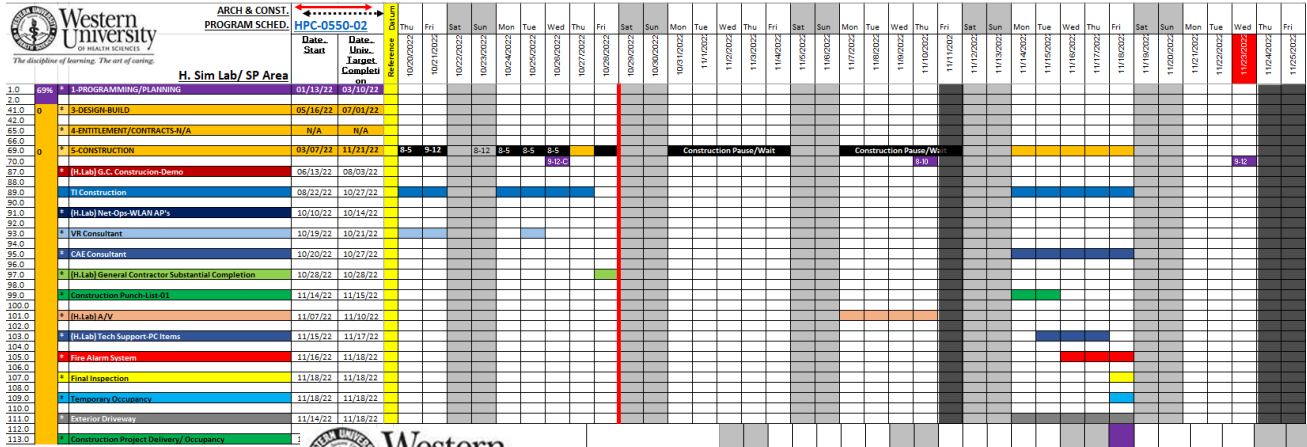

Updates:
Architect will work on simple rendering of proposed reconfiguration/remodel of canopy area.
*Phase-1 structure forensic investigation 75% complete.

Operations
Combination access provided to Facilities & Security 1981.
Phase-2 scope refined after exploratory forensic investigation and next steps cost at 145K.
New Construction Phase-3 costs still pending.

New Projects Agenda/Summary Report. WesternU Capital Planning & Construction has drafted a new report formatted to distribute to the office of the COO while also logging pertinent information to help manage the various construction and operational needs of each project. The report has been formatted to extrapolate data and incorporate certain non-sensitive information into other reports or the newly revamped Capital Planning & Construction website.

UNIVERSITY PROGRAM SCHEDULE

New Program Schedules. In addition to a contractor’s Construction Schedule, WUCPC utilizes Custom Program Schedules which track much more than construction timeframes but also incorporate other key events and various non-contractor subconsultants. Any team or service that is needed for successful completion and coordination is tracked here for high-level visibility/ coordination. Contractors typically only manage construction at their subconsultant contracted level. Construction Project Management at WesternU encompasses every element from top-down executive, curriculum and campus events, through to custodial supply stocking and black-out dates from noise restrictions for surrounding environment & academic events.

PROJECT BUDGET MONITORING OVERVIEW

Funding & Allocations

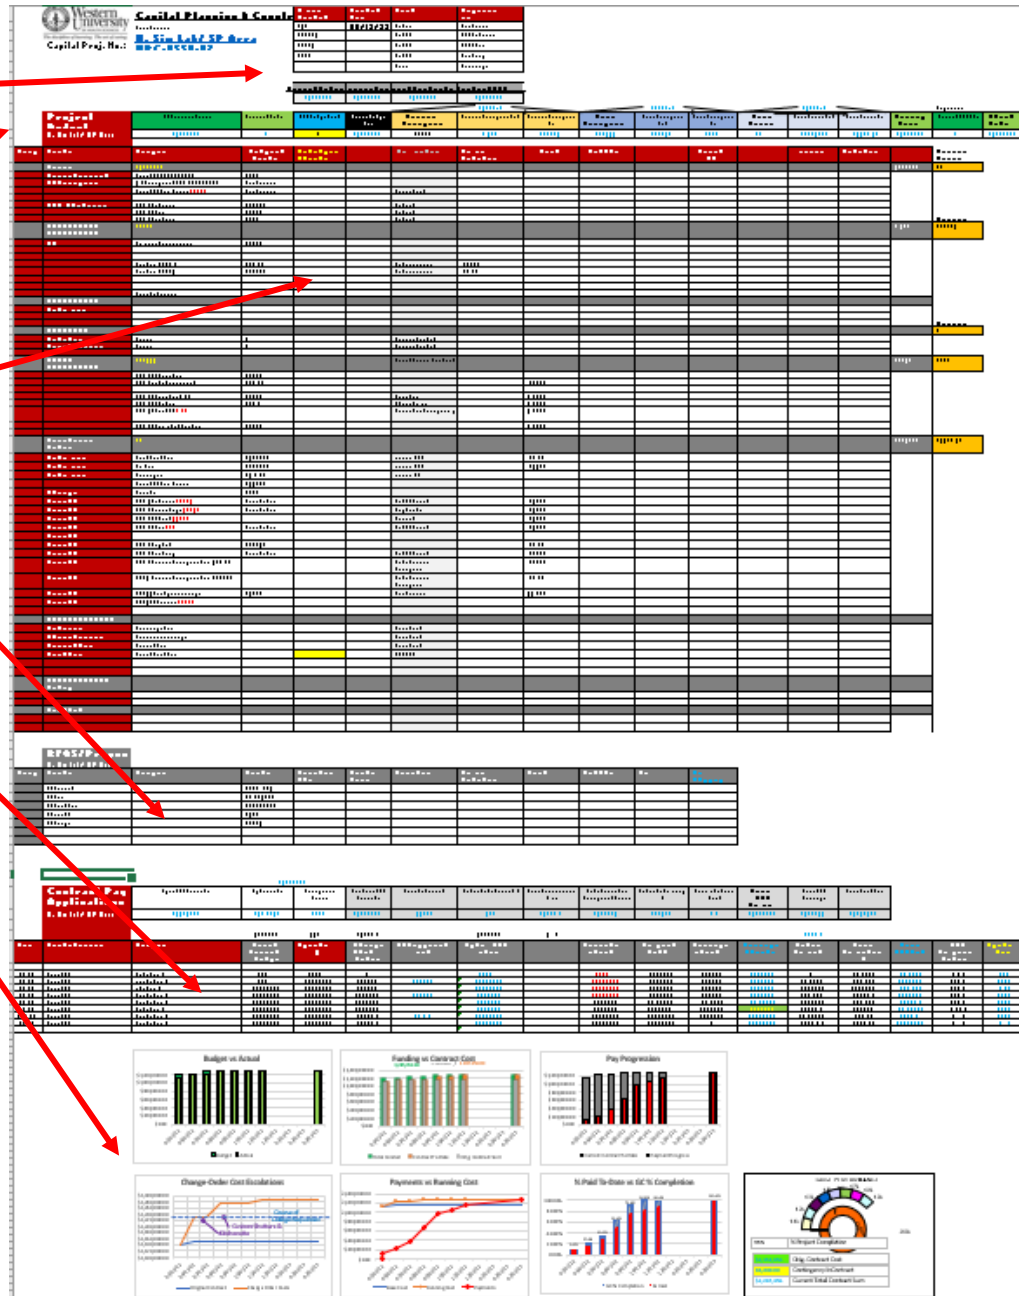

Financials Summary Header

Budget Control & Management

RFP/Proposals/Estimates Log

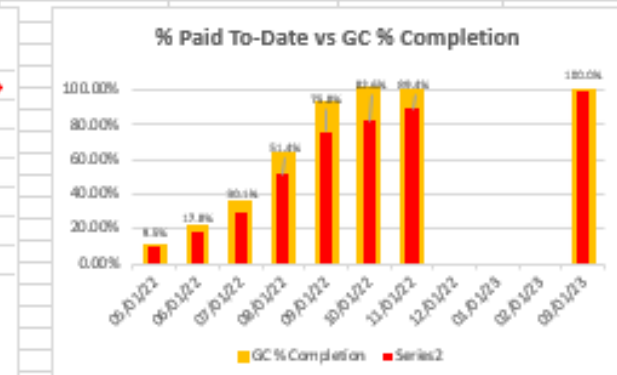

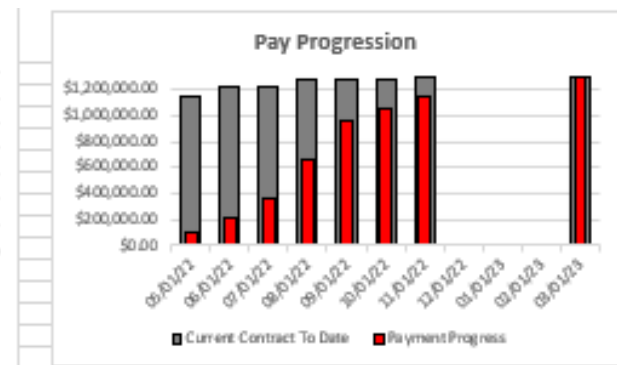

Contract Payouts & Budget Auditing

Chart Tracking of expenditures

Budget Control & Management. WesternU Capital Planning & Construction (WUCPC) has implemented management tools for the various intricacies of a Construction Project, along with its Industry practices and regulatory requirements. Project Financials monitoring is a key element to ensure health of a project and help mitigate cost escalations and cost overruns, while also providing valuable data for more cost-effective future RFP's/Bids.

CAPITAL CONSTRUCTION METRICS MONITORING

Budget vs Actual. Actual project cost tracked against total funded FOAPAL to help maintain excessive cost escalations.

Funding vs Contract Cost. Total FOAPAL funded plotted against changing Contract total and the Original Contract amount.

Pay Progression. Monitors payment progression amount thru to full total contract sum

Change –Order Cost Escalations. Total increase in change orders from original contract amount

Payments vs Running Cost. Measures pay progression rate thru project base cost and running cost.

% Paid to-Date vs GC% Completion. Compares % paid of contract compared to Contractor’s percentage work claimed complete.

FIELD OBSERVATION REPORTS

New Field Observation Reports. Newly implemented construction observation reports are basically summary reports with photos and diagrams. These are now distributed to key project stakeholders that are identified as the end-user management committee. This helps maintain proper flow of information from the key stakeholders to whomever else the committee designates. These reports help track certain key deliverables sometimes necessary by any given party, as well as provide a nice photographic journal of work as it progresses. Schematics help visualize the work areas during debriefings and the program schedule 3-week look-ahead is incorporated to help visualize current progress stage & upcoming week activities. This schedule and report is a great coordination tool with the end users to help identify any potential College or University level event conflict, and also help end users connect more with the daily construction processes.

Construction Observation Report

PROJECT NAME: HPC H.Sun Lab area
PROJ. N°: HPC-0521-05
LOCATION: Health Professions Center (HPC)

PREPARED:
Steve Vega, Construction Project Manager
Western University of Health Sciences

CONTENTS OVERVIEW

- Summary Section
- Floor Plan Layout(s)
- Project Photos Section

A. Current Project Phases

1. Paint, Door Frames, Ceiling grid, Glazing	General Comments

B. College End User Questions/Clarifications requested
Stakeholder feedback needs

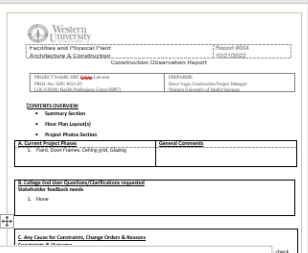

- None

C. Any Cause for Constraints, Change Orders & Reasons
Constraints & Outcome

- Fire Alarm subcontractor plan check corrections in progress. Resubmitting 10/21. Expect 2 week Fire plan check process for approvals and begin new fire alarm layout installation.
- Troffer light fixtures were identified as being delayed with new November 15 delivery and out of original construction completion deadline.
Firm discussions at higher executive levels and product sourcing initiated for emergency corrective action. Fixtures now arriving just in-time for install 10-26 thru 10-28.

Change Orders & Outcome

- WorldViz, requesting additional trip charge. Cost TBD. Requiring College decision to accept or negotiate.
- Flooring change order for off-hours work of additional \$80 dollars to mitigate loud floor scraping machines that would also vibrate large area on first floor below.
Cost was zero'd out by auditing contractor monthly charges on non-needed items and Const. PM provided contractor with reduced cost procedures which reduced cost and applied that credit toward additional charge.
- Sprinkler change order for off-hours work of additional \$80 dollars to mitigate strong Fire sprinkler water smell by large quantity of complaints.
Cost was zero'd out by auditing contractor monthly charges on non-needed items and Const. PM provided contractor with reduced cost procedures which reduced cost and applied that credit toward additional charge.

Facilities Architecture & Construction
Observation Report

A. Project Status & Summary

1. Field observation completed in accordance with contract with 2 months in progress. Search for new vendor completed. 2. Field observation completed in accordance with contract with 2 months in progress. Search for new vendor completed by 10/28.

B. Issues for Change Action

1. **Western Union:** Request manager needs for and out of hours of equipment to be installed or returned to floor or walls by 10/22 or project to not be started or work to be delayed until 10/23 for any required equipment or materials.

2. **Work on new frames & provided:** No additional support wall bracing can be done by contractor. Any new required work will need to be done through facilities or after a completion of construction and removal of spans.

Issues for University Notice

1. Coordination with **QUADRA** CAD vendor equipment installation.

2. Coordination requires a **QUADRA** CAD team vendor or vendor: CAD for remaining systems controls not yet installed.

3. **QUADRA** CAD vendor arrived on-site and provided additional needs and other coordination items to prepare for their return visit. Tentative completion of new program requirements by 10/25/22.

4. CAD vendor notified they are 3D done and team PM began to complete some orders and begin install. The job has been done and the vendor has been notified to complete. Coordination needed that will still be required and PM facilities CAD contractor will support as needed at that time.

5. Request University requirement for City of Perris area work to be finished, and work has been awarded to separate contractor established by week of 1/23 since decision **QUADRA** CAD vendor approach construction and delivery.

Facilities Architecture & Construction
Observation Report

B. Items for General Contractor (GC) Action (Project needs/Issues to be resolved)

1. Once completion of current schedule of work is completed, the new vendor frames were delivered and installed to make progress on their design work.

2. All work shall align with the schedule of work and shall be completed by 10/28.

3. Receipt of work progress information shall be provided after new design is provided to **QUADRA** vendor weekly additional time will not.

4. Receipt of work progress information after working hours new requirements and product changes will be made on site for any information that is needed to be provided. The open of 10/28 and 10/29 will be required to make additional work.

5. Final goal to be applicable to all items immediately after week 2 to 3 done.

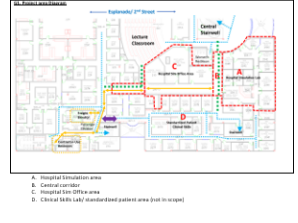

6. Support pending for all work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete.

7. Support pending for all work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete.

8. Support pending for all work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete.

9. Support pending for all work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete.

10. Support pending for all work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete. All work to be completed by 10/28 and 10/29 in all areas under the office of 10/28 which the vendor will not be able to complete.
