

College of Osteopathic Medicine of the Pacific
Physical Health Services
Element 9.9

COMP offers multiple methods by which students can access both ongoing and emergent health services 24 hours a day, every day of the year. Students may utilize any provider available through a student's health insurance.

On the Pomona campus, the WesternU Health Patient Care Center can assist students with urgent access to appointments with our local providers. There are providers in this clinic who do not participate in grading of students to avoid any potential conflict of interest. The nearest full service 24 hour emergency department is within 2 miles of the Pomona campus.

On the Lebanon campus, students can access Urgent Care via the Samaritan Urgent Care Center located on the Samaritan Health Sciences campus. The nearest full service 24 hour emergency department is across the street from the Lebanon campus.

This access extends to primary care physicians, specialty providers, and emergency care throughout all four years of their education.
