# College of Graduate Nursing

*Doctor of Nursing Practice*

*Post-Master's Family Nurse Practitioner Certificate*

*Post-Graduate Emergency Nurse Practitioner Certificate*

*Master of Science in Nursing*

- **Entry into MSN**
  - *Master of Science in Nursing (ADN/RN-MSN)*
  - *Master of Science in Nursing (BSN/RN-MSN)*
  - *Master of Science in Nursing-Entry (Bachelor's to RN/MSN)*
- **MSN Concentrations**
  - *Ambulatory Care Nursing*
  - *Family Nurse Practitioner*
  - *Health Systems Leadership/Administrative Nurse Leader*
  - *Health Systems Leadership/Clinical Nurse Leader*
  - *Nursing Generalist (for MSN-Entry Program only)*

## Accreditation

All programs offered by the College of Graduate Nursing are California Board of Registered Nursing approved and professionally accredited by the [Commission on Collegiate Nursing Education \(CCNE\)](#). Graduates of the Post-Masters Family Nurse Practitioner and Master of Science in Nursing/Family Nurse Practitioner programs are eligible to apply for state certification and to sit for the appropriate national certification examination.

## Filing a Complaint with CCNE

The College of Graduate Nursing strives for continuous program improvement in compliance with the accreditation standards as set forth by CCNE. Any student directly affected by the policies or actions of the College of Graduate Nursing may send a formal complaint to the accrediting body or to the California Board of Registered Nursing at the following locations:

**Commission on Collegiate Nursing Education (CCNE):**

One Dupont Circle, NW,  
Suite 530, Washington, DC 20036  
(202) 887-6791

**Board of Registered Nursing for the State of California**

<http://www.rn.ca.gov/enforcement/complaint.shtml#cpltfil>

Complaints may be filed by completing the [complaint form](#) and submitting to:

**Board of Registered Nursing**

Attn: Complaint Intake  
PO Box 944210  
Sacramento, CA 94244-2100  
Fax: (916) 574-7693

## General Information

### Mission

The mission of the College of Graduate Nursing is to advance nursing education to prepare the next generation of nurses by cultivating diversity in relationships, leveraging interprofessional collaboration and practice, driving innovation, and expanding academic/service partnerships to enhance quality and safety across health systems in order to improve health and healthcare for individuals, populations and communities.

### Vision

We envision healthy people and a healthy society where CGN is an innovative catalyst, educating highly valued nursing professionals who are recognized as forward thinkers, system partners, advocates, and leaders for life.

### Purpose

The College of Graduate Nursing (CGN) at Western University of Health Sciences offers a variety of specialty concentrations within two graduate programs to advance the profession of nursing. The terminal degree for educational programs culminates in a Master of Science in Nursing or Doctor of Nursing Practice degree through both campus-based programs and a hybrid web-based and seminar campus-based delivery model, to meet the needs of working professionals and adult learners. All CGN graduate programs meet nursing educational standards by the [American Association of Colleges of Nursing \(AACN\)](#). Furthermore, CGN programs are [Board of Registered Nursing \(BRN\)](#) approved and professionally accredited by the [Commission on Collegiate Nursing Education \(CCNE\)](#).

The CGN model assumes graduate students are active, self-directed adult learners, committed to safe and effective professional practice and rigorous courses of study. As learning is a personal responsibility, graduate students, guided by faculty mentors, are accountable for the integrity of academic accomplishments, professional practice and self-assessment. Students bring distinct professional and personal backgrounds and have differing responses to the learning process. CGN successes include high licensing and certification pass rates (NCLEX, advanced practice certification), expedient employment rates, employer satisfaction, and student satisfaction.

### Philosophy

Western University of Health Sciences' (WesternU) College of Graduate Nursing (CGN) prepares nursing leaders entering the profession (Master's Entry) and advancing education to the masters and/or doctoral level (MSN and/or DNP). CGN graduates are prepared to lead healthcare innovation in multiple practice settings. The following philosophy reflects the beliefs of the CGN regarding the profession of nursing, nursing education, and student-centered learning environments.

#### *The Profession of Nursing*

The Profession of Nursing is an art and a science requiring foundational knowledge in liberal arts and human sciences. The societal demand to improve health care outcomes provides context for nursing theory, research and evidence-based nursing practice. Professional nurses are autonomous in providing preventive care, population health management, and direct patient-centered care based on the American Nursing Association's social policy statement (ANA, 2010). Nurses strive to prevent illness and attain, maintain, and regain health of patients, families and communities through multiple roles. Graduate level nurses participate in the provision of primary care, lead interprofessional teams, improve health for vulnerable populations, and engage families in end-of-life care. Within healthcare systems of local and

global communities, nursing roles include advocates, coordinators of care, direct care providers, leaders, administrators, educators and researchers.

### ***Healthcare Systems***

The Institute of Medicine report on the future of nursing, articulates that advancing nursing leadership will improve care of patients and communities (IOM, 2015). The CGN is uniquely positioned with its programs led by expert faculty and administrators to prepare nursing leaders to meet this challenge. Improvement of quality of life and patient satisfaction are indicators of nursing excellence. At the same time, healthcare cost containment assures patient centered care while providing efficient and effective use of resources. Therefore, nursing must encompass the larger context of the healthcare system and participate in economic solutions.

### ***Local and Global Communities***

The CGN represents students, faculty and staff from a variety of unique backgrounds and regions. Embracing inclusivity provides opportunity for enrichment as well as influence on local and global communities. Through the unique hybrid format, the CGN students and faculty reach beyond the University creating innovative learning environments. In doing so, diversity is valued as local and global communities are impacted by the scholarship and core characteristics seeded in our students, graduates, faculty and staff.

### ***Nursing Education***

Nursing Education is a process that provides opportunities to expand and extend multiple ways of knowing for continued growth and competency for the student and the nursing profession (Benner, Sutphen, Leonard and Day, 2010). Nursing education draws upon various professions and disciplines and involves organized learning experiences that augment previous knowledge and skill in the preparation to practice graduate level nursing. The educational process supports personal, social and intellectual development of graduate students to facilitate their achievement of academic and professional goals. The CGN seeks to evoke honesty and the excitement of discovery, encourage self-expression and serve as a catalyst for life-long learning.

Nursing education at the CGN is supported by eight pillars. Four represent the core characteristics of our graduates, faculty and staff, and four represent the Boyer Model of Scholarship (Boyer, 1990).

## **CGN Core Characteristics**

### ***Leadership***

Nursing professionals, as leaders, must be strategically placed at the forefront of healthcare change as full partners with other health care professionals. Therefore, graduating masters and doctoral prepared nurses are essential to advance healthcare and lead reform.

### ***Innovation***

The current healthcare system demands innovation and creative solutions to enhance quality patient outcomes in a safe environment. The future of healthcare will require new thinking, competencies, and inter-professional collaboration to create new systems of care.

### ***Collaboration***

Optimizing the use of resources for the best outcomes requires working together in an inter-professional and intra-professional collaborative effort. Interdisciplinary collaboration enhances the capacity of others for mutual benefit. A common purpose is achieved by sharing risks, resources, responsibilities and

rewards. Nurses at a graduate level practice beyond basic communication, coordination and cooperation to become fully engaged collaborative partners.

### ***Compassion***

Compassion is caring in action and humanism is a core value of WesternU. Together compassion and humanism guide the nursing curriculum in the context of valuing diversity and the quality of life for individuals, families and communities. The recipients of compassionate and humanistic nursing care are complex beings influenced through genetic, biological, behavioral, cultural and environmental factors.

### **Boyer Model of Scholarship**

Scholarship is integral to the learning environment and helps define outcomes achieved by students, faculty, and staff. The CGN embraces the Boyer Model of Scholarship as a dynamic framework fitting for leaders in advanced practice nursing who engage in activities that transcend knowledge acquisition and traditional learning.

### ***Discovery***

The pursuit of new knowledge through research and creative activities such as publishing journal articles, authoring/editing books, presenting at conferences, reporting on new research, and/or literary works.

### ***Integration***

The connection of knowledge and discovery into larger patterns and contexts, creating new perspectives and transcending disciplinary boundaries to give meaning to isolated facts.

### ***Application***

The employment of disciplinary expertise to results that can be shared and/or evaluated by peers. The application advances beyond the provision of service to those within WesternU to the greater community of health care and education.

### ***Sharing knowledge***

Theory, evidence-based practice and research create a dynamic process that fosters creativity, independence, clinical reasoning and moral imagination.

### ***Student-Centered Learning Environments***

Student-Centered Learning Environments position students to be active participants in the learning experience. In safe and respectful environments, faculty and staff engage in interactive processes with students. In this atmosphere, faculty act as facilitators and role models while focusing on the provision and organization of the curriculum to guide students in the construction and structure of their nursing knowledge. Together, students and faculty co-create a milieu of respectful questioning, mutual growth and evaluation. Students bring self-directed learning, a desire to excel, reflection, a respectful attitude, and willingness to participate in active engagement. The CGN staff guide students through University and college processes and requirements to assure support within learning environments.

### **Program Offerings**

The College of Graduate Nursing offers two degrees and two professional certifications. There is currently one possible path of entry into the Doctor of Nursing Practice program, four paths into the Master of Science in Nursing program and five concentrations within the MSN degree offerings:

#### ***Degrees and Certificate***

- Doctor of Nursing Practice
- Master of Science in Nursing
- Post-Master’s Family Nurse Practitioner Certificate
- Post-Graduate Emergency Nurse Practitioner Certificate

#### ***MSN Entry Pathways***

- Master of Science in Nursing (BSN/RN to MSN)
- Master of Science in Nursing (ADN/RN to MSN)
- Master of Science in Nursing-Entry (Bachelor’s to RN/MSN)

#### ***MSN Concentrations***

- Ambulatory Care Nursing
- Family Nurse Practitioner
- Health Systems Leadership – Administrative Nurse Leader
- Health Systems Leadership – Clinical Nurse Leader
- Nursing Generalist (for MSN, Entry Level only)

### **Program Descriptions**

Web-based learning is used in all programs. Graduate level courses combine web-based learning with campus-based seminars. Web-based learning consists of asynchronous discussion boards, group projects, written assignments, competency assessments and other learning activities. On-campus or virtual synchronous sessions include didactic classes, clinical training and workshop simulation experiences, faculty and peer interaction, student presentations, competency assessments, and guest presentations. This educational model is designed to meet the needs of adult learners, minimize time on campus and prepare graduate-level professional nurses. MSN-Entry students are prepared for web-based learning as early as their first semester of study. Courses include web-enhanced learning, clinical simulation and interactive computer-based exercises in an on-campus environment.

### ***Doctor of Nursing Practice (DNP)***

The Doctor of Nursing Practice (DNP) program is designed for master's level prepared nurses. The curriculum requires the completion of 33-39 didactic semester units and (1000 hours of supervised direct or indirect practice hours) over a two-year period. An extended three-year option is also available. Supervised clinical and practice hours completed in the student's Master's in Nursing program or related health care field may contribute to the DNP practice hours. Practice hours can be completed each semester. Students complete a practice-based DNP Project. Graduates will be prepared for the expanding role functions and the needs of future advanced nursing practice. Transforming health care delivery recognizes the critical need for clinicians to design, evaluate and continuously improve the context within which care is delivered. Nurses prepared at the doctoral level with a blend of clinical, organizational, economic, and leadership skills will be able to affect health care policy and outcomes.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### **Post-Master's FNP Certificate (Post Master's FNP)**

The Post-Master's Family Nurse Practitioner Certificate program (Post Master's FNP) curriculum requires 29 didactic semester units and 15 clinical units and can be completed in three semesters (one year); however, a two-year option is available. The two-year option is recommended for those students who need to work full-time while completing the program. This program requires the completion of 675 precepted clinical hours. The Post-Master's FNP certificate program is for nursing professionals who have a Master's in Nursing degree, Master's degree in a health-related discipline, and/or a doctorate in nursing and want to become certified as a Family Nurse Practitioner. The Post-Master's FNP Certificate program requires three to six semesters to complete, depending upon enrollment status. Post Masters FNP students will average 12-24 clinical hours per week depending on their choice of a 1 year or 2-year option. Individuals who complete the curriculum will be prepared to meet the criteria established by the California Board of Registered Nursing as advanced practice nurses and be eligible for national certification.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### **Post-Graduate Emergency Nurse Practitioner Certificate**

The Post Graduate Emergency Nurse Practitioner (ENP) Certificate curriculum is a flexible web-accessible program with a clinical preceptorship, one off-campus and one on-campus application-skills intensive. This certificate can be completed in two semesters. The ENP Certificate is designed for nationally certified Family Nurse Practitioners (FNPs) who desire or may be currently working in the Urgent Care or Emergency Department setting. CGN's two semester certificate curriculum allows students to be eligible to apply for the national certification exam as Emergency Nurse Practitioners in a short seven months. The curriculum itself consists of two, 6-unit courses (didactic and clinical). The ENP curriculum includes 270 supervised clinical practice hours in the urgent care and emergency department settings.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### ***MSN/Ambulatory Care (MSN/AC)***

The Master of Science in Nursing/Ambulatory Care program (MSN/AC) requires students to complete 35 didactic semester units, 5 semester units of clinical experience and can be completed over 6 semesters (2 years). A three-year extended option is available. The MSN Ambulatory Care program advances primary care for patients, families and communities in a variety of outpatient settings. The master's degree prepared nurse utilizes evidence-informed practice to optimize patient, family, and community health in outpatient ambulatory settings such as, but not limited to: Family practice and specialty clinics, public health, global health, home health, school health, Employee health, same-day surgical centers, dialysis centers and prison healthcare clinics.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend pre-program orientation prior to fall entry. GN 5000 orients graduate students to web-based learning, and CGN policy and resources.

### ***MSN/Family Nurse Practitioner (MSN/FNP)***

The Master of Science in Nursing/Family Nurse Practitioner (MSN/FNP) curriculum requires the completion of 49 didactic semester units and 15 clinical semester units over a two- or three-year period. A three-year curriculum option is recommended for those students who need to work full-time while progressing in the program. This program requires the completion of 675 precepted clinical hours. Students begin clinical experiences in the first semester, after they have been cleared by the FNP faculty in basic clinical assessment skills. MSN/FNP students will average 8-12 clinical hours per week. Graduates will be prepared to meet the criteria established by the California Board of Registered Nursing as advanced practice nurses and be eligible for national certification. Family Nurse Practitioners work in a variety of health care settings independently, or in groups of health care professionals, under collaboratively developed and agreed upon standardized procedures.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### ***MSN/Health Systems Leadership–Administrative Nurse Leader (MSN/ANL)***

The Master of Science in Nursing/Health Systems Leadership – Administrative Nurse Leader (MSN/ANL) curriculum requires students to complete 37 didactic and 5 clinical (leadership practicum) semester units and can be completed in six semesters (two years). A three-year extended option is available. This graduate program provides the bachelor's prepared Registered Nurse with the latest knowledge and applied skills to be an effective administrative leader advancing better care, better health and lower costs. Today's health care systems require nurse leaders who can integrate experience, knowledge, research and technology to lead at the unit, clinic or department level. This program combines the flexibility of on-line learning, preceptored practicums and seminar weekends to facilitate graduate education for professional nurses.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### ***MSN/Health Systems Leadership–Clinical Nurse Leader (MSN/CNL)***

The Master of Science in Nursing/Health Systems Leadership – Clinical Nurse Leader (MSN/CNL) curriculum requires students to complete 40 didactic and 9 clinical semester units. This program can be

completed in six semesters (two years). A three-year extended option is available. This graduate program is designed for baccalaureate prepared Registered Nurses interested in becoming advanced generalists at the point of care. The CNL is prepared to lead patient safety and quality improvement, evidence-based practice, risk reduction, and care coordination. The CNL works with interprofessional teams caring for a variety of patient populations in all practice settings. This program combines the flexibility of on-line learning, preceptored practicums and seminar weekends to facilitate graduate education for professional nurses.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation session prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### ***MSN, Entry Program (MSN-E)***

The Master of Science in Nursing–Entry Program (MSN-E) is designed as an entry into master’s level nursing for students with bachelor’s degrees that are not in nursing. MSN-E students complete 90 units (59 units didactic and 31 units clinical) in the curriculum, (The MSN-Entry program adheres to the nursing education standards from the American Association of Colleges of Nursing (AACN) Master’s Essentials and Quality and Safety in Nursing Education (QSEN). Graduates of the program are prepared to lead patient quality and safety initiatives, apply evidence-based practice with interprofessional teams, and lead systems of care delivery.

The curriculum is delivered in 6 semesters with a full-time unit load, all campus-based. Upon successful completion of the program, students will be eligible to take the NCLEX licensing examination and receive an MSN degree.

The MSN-E program prepares students to meet society’s need for professional nurses who think critically and exercise leadership in providing competent nursing care. The semesters are focused on the application of the nursing process, which incorporates clinical decision making for assessing, diagnosing, implementing and evaluating a plan of care. The nursing process provides a framework for making decisions that require humanistic technical skills and scientific knowledge for nursing interventions. Nursing education and the nursing process incorporate the care components of health promotion, disease prevention and restoration of health, client advocacy, cultural sensitivity, client safety/protection, hygiene, care and comfort.

The curriculum for the MSN-E program combines didactic learning on-campus and clinical training at regional clinical facilities, as well as skills practice and critical experiences in simulation. Students can expect to be on campus a minimum of two days a week and at a clinical agency an additional two to three days per week. MSNE students must complete the three-course Master Project series that serves as a platform for the integration of AACN’s *Master of Nursing Essentials* in the form of a proposed quality improvement project to improve patient care, patient outcomes, or work design.

MSN-E students who wish to enter the FNP program will first receive the MSN degree and will be required to submit a Post-Master’s application. Students wishing to enter the FNP program must submit a standard application through the Office of Admissions. MSN graduates will be required to have completed 1800 hours (1 year, full-time) RN work experience prior to acceptance into the FNP program. All WesternU College of Graduate Nursing graduates will be given first consideration for a seat in the FNP program.

### ***MSN, ADN/RN to Master's Program (ADN/RN-MSN)***

The Master of Science in Nursing – Associate Degree in Nursing/RN to master's program (ADN/RN to MSN) is designed for Registered Nurses with an Associate Degree in Nursing to complete the Baccalaureate in Nursing Essentials (bridge) courses and progress into the master's specialty concentration of their choice. ADN-MSN students complete 44 didactic and 11 clinical semester units for the Health Systems Leadership - Clinical Nurse Leader concentration, 41 didactic and 7 clinical semester units for Health Systems Leadership – Administrative Nurse Leader, or 42 didactic units and 7 clinical semester units for the Ambulatory Care Nursing concentration. This program can be completed in six semesters however, extended three-year curriculum grids are available for students who plan to continue full-time practice while in the program.

Students who do not have previous RN work experience are expected to be employed as a Registered Nurse (RN) prior to acceptance into the program and must continue working as an RN during completion of graduate coursework. Concurrent nursing practice with graduate education provides students with the unique opportunity to apply and integrate advanced knowledge and skills into new professional roles.

ADN/RN students interested in the post-Master's FNP program may submit an application towards the end of the MSN program. Students wishing to enter the FNP program immediately following the completion of the MSN complete an internal CGN application to enter the program. Any student who chooses to enter the program at a later date submits a standard application to the FNP program as described on the university website. As a prerequisite to the FNP Program, MSN graduates are required to have completed 1800 hours (1-year, full time) RN practice experience prior to acceptance into the FNP program. All WesternU College of Graduate Nursing graduates are given first consideration for a seat in the FNP program.

The College of Graduate Nursing's (CGN's) admission standards for associate degree prepared nurses includes evidence of current RN licensure in good standing from a Board of Registered Nursing approved program, completion of all pre-requisite courses, suitable letters of reference, and evidence of scholarly writing. Given multiple entry points to the profession of nursing, the CGN faculty believes that an Associate Degree prepared Registered Nurse (RN) will successfully meet rigorous course demands and will be well-prepared to advance the profession of nursing with graduate education. The curriculum offers students opportunities to master AACN Baccalaureate Essentials through community health, research and theory, and leadership courses.

Students are required to enroll in GN 5000 (Communication and Information Management) and attend the pre-program orientation prior to fall entry. GN 5000 orients students to web-based learning and CGN policy and resources.

### ***Nursing Curriculum – 30 Unit option***

The California Board of Registered Nursing mandates a 30-unit option and candidates completing this are eligible to take the National Council of State Boards of Nursing Examination (NCLEX) to acquire licensure as a Registered Nurse in the State of California. Other states may not recognize this option as valid preparation for R.N. licensure and, therefore; not grant interstate licensure. Individuals completing this option are not graduates of Western University of Health Sciences and a master's degree in nursing is not awarded upon completion of the 30-unit option. Applicants are admitted on a space available basis. Students seeking this option should contact the College of Graduate Nursing Student Affairs office during the month of May each year to determine space availability. Accepted students will need to show

verification of a current LVN license, completion of all required pre-requisite courses and complete a Non-Degree Seeking Student Application.

## **Instructional Design**

### ***Campus Learning (MSN-E Courses)***

The curriculum for the MSN-E program is designed for the adult learner and uses both traditional campus-based learning and introduction to web-based learning. Didactic courses include lecture, simulated clinical experiences, clinical skills training, and structured laboratory experiences. Students will begin acute care hospital experiences in semester one.

### ***Distance Learning (Post-Licensure Courses)***

The College of Graduate Nursing programs are designed for the adult learner. The design uses educational and instructional learning theories that emphasize outcome competencies as the desired goal, rather than time on task, and individualized instructional strategies as well as classroom and clinical instruction.

The instructional modality that is most evident in this curriculum is web-based learning. The majority of courses include required asynchronous discussion sessions in which students and faculty participate in collaborative learning. Students are expected to be online and engaged in learning activities from the first day of the first semester. The CGN learning management system is Blackboard and courses are designed to provide the learner with the information needed to be successful in each course including learning objectives, content, learning activities, evaluation methods and grading criteria.

### ***Integrated Courses***

For the Family Nurse Practitioner concentrations (MSN/FNP and Post Master’s FNP) health care issues are studied with a focus on common, acute, chronic and complex health problems across the life span. Didactic and clinical are concurrent throughout the program.

## **Outcome Competencies for Graduates**

Upon program completion, graduates of the Western University of Health Science’s College of Graduate Nursing MSN and DNP Programs will be able to:

	<b>CGN MSN Outcome</b>	<b>CGN DNP Outcome</b>
1	Incorporate specialized knowledge, theories, and models of care from nursing and related disciplines across all domains of scholarship.	Develop effective strategies and specialized knowledge using models of care from nursing theories, nursing research and related disciplines across all domains of scholarship.
2	Demonstrate leadership skills through decision-making in high quality health care delivery using complex principles in the design, delivery, and evaluation of health care at the microsystem level.	Apply and implement leadership skills through decision-making in high quality health care delivery using complex principles in the design, delivery, and evaluation of health care at the macrosystem level.
3	Lead quality initiatives that integrate and analyze best available evidence to improve	Design, develop, and evaluate quality initiatives that integrate the best available evidence that

	CGN MSN Outcome	CGN DNP Outcome
	and sustain optimal health care quality and safety at the individual and system level.	improves and sustains optimal health care quality and safety at the population level.
4	Critically assess and integrate evidence for evaluating practice outcomes across care delivery systems.	Design, implement, and evaluate processes across care delivery systems to direct changes in practice outcomes and trends in population health.
5	Participate in the application of nursing knowledge through the integration of theory and research.	Translate relevant theories and research to improve practice and practice environments.
6	Analyze current and emergent technologies to support safe practice environments, optimize patient safety, maximize cost effectiveness, and improve health outcomes.	Develop and execute strategies to extract data from information systems including databases that optimize healthcare models and improve health outcomes.
7	Discuss the multi-level political, social, and ethical factors of nursing practice and health care delivery systems.	Apply and engage in multi-level political, social, and ethical factors associated with nursing practice and health care delivery systems to demonstrate advocacy for vulnerable populations.
8	Participate in interprofessional collaborative teams throughout multilevel healthcare delivery systems.	Lead interprofessional collaborative teams throughout multi-level healthcare delivery systems.
9	Apply population-based care concepts throughout all levels of healthcare delivery.	Engage as a change agent to lead population-based care throughout all levels of healthcare delivery.

## Certifications and Licensures

### *National Council on Licensure Exam (NCLEX)*

The Board of Registered Nursing (BRN) allows the candidates for RN licensure to complete the necessary paperwork for the NCLEX exam two weeks prior to the completion of the MSN-E curriculum. Students are directed to the [California BRN](#) for current information regarding the NCLEX application. The college will submit required verification of courses completed four weeks prior to student's eligibility. Official transcripts need to be ordered by the student in order for the College of Graduate Nursing to send them to the BRN. If the student fails the exam the first time, he or she will be required to wait forty-five days before retaking the exam.

### ***National Certification as a Family Nurse Practitioner***

Graduates are required to take one of the national certification examinations as a Family Nurse Practitioner within six months of graduation. Most states require students to pass a national certification exam for state recognition, and most employers require certification. Therefore, students are encouraged to contact their Board of Registered Nursing prior to enrollment to clarify state requirements. Currently there are two bodies, which provide certification for nurse practitioners: the American Nurses Credentialing Center (ANCC) of the American Nurses Association and the American Association of Nurse Practitioners (AANP). Students should check with their state's board of nursing to determine if a specific exam is required. Preparation for this national certification examination is done throughout the FNP courses, and during a mandatory 3-day review course that is held on campus in conjunction with the July seminar session.

### ***National Certification as an Emergency Nurse Practitioner***

Emergency Nurse Practitioner certificate graduates are eligible to take the national certification examination as an Emergency Nurse Practitioner following completion of the program. Preparation for this national certification examination is done throughout the ENP courses and procedural skills intensives. Emergency Nurse Practitioner certification review courses are provided by a number of professional educational groups and students are highly encouraged to enroll to prepare for achieving national certification as an ENP.

## **Personal Competencies for Admission and Matriculation**

A candidate for admission to the College of Graduate Nursing program must possess, or be able to achieve through a reasonable accommodation, certain intellectual, emotional, and physical abilities, that would enable the individual to carry out the activities described in the sections that follow. Upon matriculation to the program, the student must continue to possess, or be able to achieve through a reasonable accommodation, the personal competencies outlined below throughout their progression in the College of Graduate Nursing program. Graduate Nursing requires the performance of specific essential functions, which include but are not limited to the broad skills categories defined below.

For candidates or students who require a reasonable accommodation in order to meet the competencies outlined below, please contact the Harris Family Center for Disability and Health Policy/Accommodation and Resource Center (CDHP/AARC) at (909) 469-5297.

Under all circumstances, a candidate or student should be able to perform the following in a reasonably independent manner, with or without a reasonable accommodation:

### **Computer Literacy**

Students are expected to have basic computer literacy skills prior to enrollment. Students should demonstrate skill in basic word processing, Microsoft applications (Word, PowerPoint, and Excel), use of the Internet, e-mail, and on-line literature searches. Students will be expected to meet Basic Computer Competencies, Information Literacy, and Clinical Information Management competencies as outlined in the [TIGER \(Technology Informatics Guiding Education Reform\) initiative](#).

### **Intellectual Skills**

In addition to essential academic content and performance skills, each course requires learning activities that foster intellectual skill development for critical thinking and decision making as well as oral and written communication.

### **Technical Guidelines for Nursing Practice (MSN-E)**

Nursing education requires not only the accumulation of scientific knowledge, but also the simultaneous acquisition of technical skills and professional attitudes and behavior. Nursing school faculties have a responsibility to society to matriculate and graduate the best possible nurses. Admission to nursing school has been offered to those most qualified for the practice of nursing. Technical standards presented in this document are prerequisite for admission and graduation from the College of Graduate Nursing at Western University of Health Sciences. Graduates of the CGN must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care services. All courses in the MSN-E curriculum are required in order to develop the essential skills necessary to become a competent nurse.

There are essential functions or abilities necessary for admission and progression in the College of Graduate Nursing program at Western University of Health Sciences. The candidate must be able to perform all essential functions (with or without accommodations). The College of Graduate Nursing follows the Western University of Health Sciences non-discrimination policy, and students requesting accommodations should contact the Harris Family Center for Disability and Health Policy (HFCDHP) at (909) 469-5441. These essential functions include, but are not limited to, the following:

### ***Observation (sensory)***

Candidates must be able to observe patients and demonstrations, close up and at a distance, to learn skills and to gather patient data (e.g., observe a patient's gait, appearance, posture, etc.). Candidates also must possess functional use of the sense of vision and somatic sensation. Observation is enhanced by the functional use of the sense of smell.

### ***Communication***

Candidates must have the ability to communicate orally and in writing with patients, families, groups and other members of the healthcare team, as well as faculty and peers. Candidates must also be able to interpret communication of others. Candidates also must be able to read and comprehend written materials.

### ***Psychomotor Skills***

Candidates must have sufficient motor function to perform nursing tasks and to obtain data from patients using tactile, auditory, and visual maneuvers. Candidates must be able to execute motor movements to provide required general nursing care as well as emergency treatments.

### ***Mobility and Stamina***

A student must possess sufficient gross and fine motor skills and endurance to provide safe and effective nursing care in all health care settings. Students must have the ability to perform basic life support (including CPR); function in an emergency situation; safely assist a patient in moving (e.g., from wheelchair to commode, from chair to bed, lift and transfer from gurney to bed); calibrate and use equipment; perform treatments and procedures; apply pressure to stop bleeding; manipulate diagnostic instruments to adequately perform a physical assessment; and sit, stand and move about in patient environments for 12-hour periods.

### ***Tactile***

A student must have sufficient tactile ability to perform a physical assessment of a patient and to perform procedures necessary for nursing care. Students must have the ability to perform palpation and other functions necessary for a physical exam; assess texture, shape, size and vibration; note temperature changes in skin and equipment; perform therapeutic functions (e.g., inserting a urinary catheter or IV, change dressings, give medications).

### ***Intellectual and Cognitive Abilities***

Candidates must be able to measure, calculate reason, analyze, synthesize, integrate, and apply information in making clinical judgments. Problem solving, a clinical skill required of nurses, requires all of these intellectual abilities. In addition, candidates must be able to comprehend 3-D relationships and to understand the special relationships of structures.

### ***Behavioral and Social Attributes***

Candidates must possess the emotional health required to use their intellectual abilities fully. This may be demonstrated by exercising good judgment; promptly completing all responsibilities attendant to the care of patients and aggregates; and developing mature, sensitive, and effective relationships with patients, families and other health care workers as well as faculty and peers. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties and ambiguities.

***Ethical Standards***

A candidate must demonstrate the ability to reason morally and practice nursing in a professional and ethical manner with patients, families, and other health care workers as well as with faculty and peers.

## Admissions Policies and Procedures

### Department of Education Regulations for Out of State Applicants

State and federal laws require that colleges and universities obtain authorization to offer online degree programs in any state where their students reside. All applicants from outside the state of California, or those in-state applicants who are contemplating moving to another state at some time during the completion of the program, should review the current list of acceptable states located on our web site before submitting their application.

### Non-Discrimination Policy

In accordance with all applicable federal, state, and local laws, Western University of Health Sciences (WesternU) is committed to ensuring a campus community free from unlawful discrimination. Accordingly, WesternU prohibits unlawful discrimination on the basis of race, color, national origin ancestry, citizenship, ethnicity, creed, religion or religious creed, sex or gender (including gender identity), marital status, sexual orientation, disability (both physical and mental) including HIV and AIDS, medical condition (cancer and genetic characteristics), pregnancy (which includes childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding), age, genetic information, military and veteran status, or any other characteristic protected under applicable law, in the administration of its programs or activities. WesternU also prohibits unlawful harassment, including Sexual Harassment. Lastly, WesternU is committed to providing equal access to and equal opportunities to all members of its campus community in accordance with all applicable laws.

This non-discrimination policy applies to applicants, students, and alumni. Additional nondiscrimination information can be found in the Nondiscrimination, Anti-Harassment, and Anti-Retaliation Policy, located in the University Catalog.

### Reasonable Accommodation for Disabilities

Students must be able to perform all the essential functions of the program with or without accommodation. A student who discloses a disability and requests accommodation will be referred to the Harris Family Center for Disability and Health Policy (CDHP). The student may be asked to provide documentation of the disability for the purposes of determining appropriate accommodations. The College of Graduate Nursing will provide reasonable accommodations but is not required to make modifications that would substantially alter the nature or requirements of the program. A student with questions regarding reasonable accommodation can contact the CDHP Office.

### Application Requirements

The application requirements shown in this catalog apply to applicants who are seeking entry for the 2019/2020 academic year. Current admission and application requirements for the programs offered in the College of Graduate Nursing, including prerequisite coursework requirements, can be located on the [Prospective Student website](#).

#### *DNP*

- Completed Application
- Personal Statement (career trajectory)
- Two Recommendation forms (from persons who can attest to the applicant's capacity for doctoral level work)

- Curriculum Vitae/Résumé
- Sample of scholarly writing (publication, unpublished manuscript, academic thesis or paper, work product or report, curriculum, other examples)
- Application Fee
- Official transcripts from all colleges/universities attended
- Copies of all applicable active and unencumbered licenses and certifications
- Documentation of previous practice hours from MSN program (if applicable)
- Phone interview (for selected applicants)

***Post-Graduate Emergency Nurse Practitioner Certificate (ENP)***

- Completed Application
- Two Reference Forms (faculty & employers within the past two years)
- Curriculum Vitae/Resume
- Scholarly Essay
  - The scholarly essay should reflect how obtaining the ENP certificate would contribute to your professional development through advancing practice.
- Application Fee
- Official Transcript Reflecting Graduate Degree in Nursing
- All official transcripts are due upon acceptance
- Copies of national certification as Family Nurse Practitioner (FNP) and unencumbered licenses
- Phone Interview (for selected applicants)

***Post-Masters FNP, MSN/FNP, MSN/ANL, MSN/CNL, MSN/AMB***

- Completed Application
- Two Reference Forms (faculty & employers within past two years)
- Curriculum Vitae/Résumé
- Personal Statement
  - MSN/FNP, MSN/AMB, FNP programs: Address your understanding of advanced practice nursing, your personal career goals and how your background strengthens your aptitude with regard to becoming an advanced practice nurse.

- MSN/ANL, MSN/CNL programs: Address your understanding of professional nursing, your personal career goals and how your background strengthens your aptitude to become a master's prepared nurse leader
- Application Fee
- Official transcripts from all colleges/universities attended
- Copies of all applicable active and unencumbered licenses
- Phone interview (for selected applicants)

***Post-Graduate Emergency Nurse Practitioner Certificate (ENP)***

- Completed Application
- Two Reference Forms (faculty & employers within the past two years)
- Curriculum Vitae/Resume
- Scholarly Essay
  - The scholarly essay should reflect how obtaining the ENP certificate would contribute to your professional development through advancing practice.
- Application Fee
- Official Transcript Reflecting Graduate Degree in Nursing
- All official transcripts are due upon acceptance
- Copies of national certification as Family Nurse Practitioner (FNP) and unencumbered licenses
- Phone Interview (for selected applicants)

***MSN-E***

- Completed application
- Two Reference Forms (1 from professional colleague, 1 from faculty/employers)
- Curriculum Vitae/Résumé
- Personal Statement which addresses your motivation for graduate study to become a nurse, personal career goals, and how your background strengthens your aptitude to become a master's prepared nurse
- Application fee
- Official transcripts from all colleges/universities attended

- TOEFL scores for ESL applicants
- On-campus interview

### ***ADN/RN to MSN***

- Completed Application
- Two Reference Forms (1 from professional colleague, 1 from faculty/employers)
- Curriculum Vitae/Résumé
- Personal Statement which addresses your motivation for graduate study to become a master's prepared nurse, personal career goals, and how your background strengthens your aptitude to become a master's prepared nurse
- Application fee
- Official transcripts from all colleges/universities attended
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- TOEFL scores for ESL applicants
- Phone interview (for selected applicants)

Decisions of the Admissions Committee regarding the admission of applicants to its programs are final.

### **Prerequisite Requirements**

#### ***Doctor of Nursing Practice (DNP)***

- Master of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program. Individuals with a Bachelor of Science (BSN) degree in nursing and with a master's degree in another field will be considered on a case-by-case basis.
- Theory (2 graduate semester units) with a grade of B- or better
- Research (2 graduate semester units) with a grade of B- or better
- Registered Nurse (RN) active and unencumbered licensure in the state where practice hours will be completed

#### ***Post-Master's Family Nurse Practitioner Concentration (FNP Only)***

- Master of Science in Nursing or a Masters/Doctoral degree in a related field from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program

- Bachelor of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program (Bachelor's in a nursing related field will be reviewed on a case-by-case basis)
- GPA of 3.0 in the last 60 semester units or 90 quarter units
- Statistics (3 semester units) with a grade of C or better from a regionally accredited U.S. institution
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN)

***Post-Graduate Emergency Nurse Practitioner Certificate***

- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- Verification of an active family nurse practitioner national certification by the ANCC or AANP.

***Master of Science in Nursing/Ambulatory Care Nursing Concentration (MSN/AC)***

- Bachelor of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program (Bachelor's in a nursing related field will be reviewed on a case-by-case basis)
- GPA 3.0 in the last 60 semester units or 90 quarter units
- Statistics (3 semester units) with a grade of C or better from a regionally accredited U.S. institution
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN). Students who do not have previous RN work experience are expected to be employed as registered nurses before being accepted into the program and must continue working as an RN as they complete graduate coursework.

***Master of Science in Nursing/Family Nurse Practitioner Concentration (MSN/FNP)***

- Bachelor of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program (Bachelor's in a nursing related field will be reviewed on a case-by-case basis)
- GPA of 3.0 in the last 60 semester units or 90 quarter units
- Statistics (3 semester units) with a grade of C or better from a regionally accredited U.S. institution
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN)

***Master of Science in Nursing/Health Systems Leadership/Administrative Nurse Leader Concentration (MSN/HSL/ANL)***

- Bachelor of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program (Bachelor's in a nursing related field will be reviewed on a case-by-case basis)
- GPA 3.0 in the last 60 semester units or 90 quarter units
- Statistics (3 semester units) with a grade of C or better from a regionally accredited U.S. institution
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN). Students who do not have previous RN work experience are expected to be employed as registered nurses before being accepted into the program and must continue working as an RN as they complete graduate coursework.

***Master of Science in Nursing/Health Systems Leadership/Clinical Nurse Leader Concentration (MSN/HSL/CNL)***

- Bachelor of Science in Nursing from a National League of Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited program (Bachelor's in a nursing related field will be reviewed on a case-by-case basis)
- GPA 3.0 in the last 60 semester units or 90 quarter units
- Statistics (3 semester units) with a grade of C or better from a regionally accredited U.S. institution
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN). Students who do not have previous RN work experience are expected to be employed as registered nurses before being accepted into the program and must continue working as an RN as they complete graduate coursework.

***Master of Science in Nursing – Entry Concentration (MSN-E)***

- Bachelor's degree in any field other than nursing from an accredited institution
- GPA of 3.0 in the last 60 semester units or 90 quarter units
- Completion of the following prerequisite courses with a grade of C or better in each:
  - Communications/English Composition (6 semester units)
  - Statistics (3 semester units)
  - Social Sciences (3 semester units)
  - Psychology (3 semester units)

- Nutrition (3 semester units)
- Human Anatomy (4 semester units) with lab (minimum of 5 units if combined with Physiology)
- Human Physiology (4 semester units) with lab (minimum of 5 units if combined with Anatomy)
- Microbiology (4 semester units) with lab

***Master of Science in Nursing – Associate Degree/RN to Master’s Concentration (ADN/RN - MSN)***

- Associate degree in Nursing from a Board of Nursing approved institution
- GPA of 3.0 in the last 60 semester units or 90 quarter units
- Completion of the following prerequisite courses with a grade of C or better in each:
  - Communications/English Composition (6 semester units)
  - Statistics (3 semester units)
  - Social Sciences (3 semester units)
  - Psychology (3 semester units)
  - Nutrition (3 semester units) (may be waived if integrated in your ADN program)
  - Human Anatomy (4 semester units) with lab (minimum of 5 units if combined with Physiology)
  - Human Physiology (4 semester units) with lab (minimum of 5 units if combined with Anatomy)
  - Microbiology (4 semester units) with lab
- Demonstrated capacity to succeed at a graduate degree level
- Registered Nurse (RN) active and unencumbered licensure in the state where precepted clinical hours will be completed
- 1 year (1800 hours) of experience as a Registered Nurse (RN). Students who do not have previous RN work experience are expected to be employed as registered nurses before being accepted into the program and must continue working as an RN as they complete graduate coursework.

**Nursing Curriculum 30 Unit option – Licensed Vocational Nurse to RN (LVN-RN)**

- LVN licensure
- GPA of 3.0
- Completion of the following prerequisite courses with a grade of C or better in each:
  - Human Physiology (4 semester units) with lab

- Microbiology (4 semester units) with lab

Students who do not meet the GPA requirements for admission into any of the College of Graduate Nursing programs may petition the Admissions Committee for special consideration. If admitted on probationary status, a student must achieve a GPA of 3.0 in pre-program and/or first semester courses with no options for remediation.

### **International Applicants**

International applicants who are not U.S. citizens and who are living in the U.S. should be prepared to provide proof of legal U.S. residency at the time of interview. Proof of legal U.S. residency is required prior to any offer of acceptance. For detailed information, please visit our web page for [International Students](#).

### **Transfers from Other Schools/Course Waivers/Prior Military Education and Experience**

The College of Graduate Nursing does not accept undergraduate course work for graduate level credit, (with the exception of the MSNE BRN core courses required for licensure or ADN-MSN bridge courses). Graduate level courses taken at accredited institutions and prior military education and experience can be used for credit transfer if the course work meets the corresponding requirements of the CGN course.

A student may request transfer of credit in the following situation: If he/she can demonstrate that a similar graduate level course was taken at another accredited academic institution, within the past five years, with a minimum grade of C+ (pre-licensure) or B- (post-licensure) earned in that course and with equivalent semester units. A similar course is defined as a course that covers a significant portion of the WesternU course content (to be determined by the WesternU course instructor).

No transfer credit will be given for the following courses:

- GN 5000 – Communication and Information Management
- IPE 5000 – Patient Centered Cases I
- IPE 5100 – Patient Centered Cases II
- IPE 6000 – Team Training in Healthcare I
- IPE 6100 – Team Training in Healthcare II
- GN 5410 – Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician I
- GN 5411 - Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician II
- GN 5690 – Clinical Comps I
- GN 5691 – Clinical Comps II (if applicable)
- GN 5692 – Clinical Comps III (if applicable)
- GN 5900 – Collaborative Project
- GN 5990 – APN Master’s Project
- GN 5999 – Master’s Project
- GN 7570 – Administrative Nurse Leader Clinical Experience
- GN 7550 – RN Clinical Seminar
- GN 7570 – CNL Clinical Experience
- GN 8090 – Practice Immersion Project
- GN 8999 – Continuous Enrollment/Dissertation

### ***Procedure for Transfer Credit***

Any student who wishes to receive transfer credit must submit in writing to the Program Director at least thirty (30) days prior to matriculation in the program:

1. His/her intent transfer course credit, and;
2. Documentation, including course description, course outlines, course syllabus, completed work, transcripts, military transcripts, etc., to demonstrate course equivalency. Military transcripts in accordance with American Council Education (ACE) guidelines shall contain the following information:
  - Personal service member data
  - Military course completions —with full descriptions and credit recommendations
  - Military occupations — full descriptions, skill levels, and credit recommendations
  - College-level test scores

It is the responsibility of the student to provide sufficient documentation to show equivalency to WesternU coursework. Upon receipt of the student's intent to use transfer credit and the written documentation of course equivalency, the Program Director will submit the written documentation to the faculty member teaching the WesternU course that is being challenged for review and consideration of credit transfer approval. The faculty member will review the documentation and issue a recommendation to allow or deny the transfer to the Program Director at least 10 days prior to the date of registration. No tuition fees are paid for transfer credits, and the courses do not count in the computation of the GPA.

### ***Partial Course Waiver (Challenge) Policy***

Course challenge is defined as a student's request for exemption from a specific CGN course requirement (assignment, clinical hours, or partial course requirement) due to prior similar coursework including prior military education and experience. The College of Graduate Nursing recognizes that our nursing students come into the college with previous academic experience, military education and experience or nursing degrees and that not all courses meet the full transfer requirements. Therefore, a student may choose to challenge a portion of the course or request to have a portion of the clinical hours waived.

Requests for waivers must meet the same standards and follow the same required procedure as listed in the Course Transfer policy. See the Clinical Policy section of this catalog for more information regarding FNP clinical hour waiver.

### ***Appealing Course Transfer or Waiver Decisions***

Students have a right to appeal the faculty member's recommendation to deny a course transfer or waiver. Such appeals will be forwarded to the Dean of the CGN who has final authority in the waiver determination. The Registrar will be informed of the final determination of the course transfer request.

### ***Residency Requirement***

A minimum of 17 units must be taken in residence at Western University of Health Sciences to receive a Nurse Practitioner Certificate or Master of Science in Nursing degree from the University, 12 units for the ENP certificate and 18 units for the Doctor of Nursing Practice degree.

## **Additional Matriculation Requirements**

### ***Computer Requirements for all Programs***

Due to the nature of the College of Graduate Nursing programs, laptop computers and internet access are required. The minimum and recommended specifications can be found at <http://www.westernu.edu/computing/computing-students/>.

### ***CPR Certification***

Current American Heart Association Basic Life Support for Healthcare Providers certification is required throughout all programs of study. All students are required to complete an American Heart Association Basic Life Support for Healthcare Providers course prior to beginning courses. It is the responsibility of the student, not the College of Graduate Nursing to assure that requirements are met and maintained. A copy of a current card verifying completion of a course must be on file in the College prior to beginning the program. If not completed, students will be blocked from registration or removed from classes. Students can contact the American Heart Association at [www.americanheart.org](http://www.americanheart.org) for dates, times, and location of CPR certification classes.

### ***Criminal Background Check for all CGN Students***

To meet State regulations and hospital accreditation requirements, health care facilities require nursing students to complete criminal background checks and/or Live Scan prior to the first day of clinical. This regulation serves to assure patient safety.

Certain convictions may prevent students from entering hospitals or clinics, which may hinder a student's ability to complete the program. If a criminal conviction is shown on the report, hospitals or other health care facilities have discretion as to whether the individual may enter the clinical facility as a nursing student. In certain cases, the results of the Background check may require that our offer of acceptance be revoked.

Certain convictions may also prevent students from obtaining RN licensure in the State of California or other states. Please visit the California Board of Registered Nursing website at [www.rn.ca.gov](http://www.rn.ca.gov) for more information about Live Scan reports required for RN licensure.

If a student takes a leave of absence or is placed on academic suspension during the program, the student will be required to submit to a new criminal background check and/or Live Scan prior to returning.

All students will be required to complete a criminal background check and/or Live Scan prior to matriculation. Upon acceptance of admission to the program, applicants will be given the necessary information for completing the required criminal background check and/or Live Scan.

### ***Additional Live Scan Fingerprinting for ADN/RN-MSN MSN-E and FNP Students***

Students admitted to the MSN-E program will be required to complete additional Live Scan fingerprinting at the end of their third semester, in preparation for Community Health Nursing and in their sixth semester in preparation for taking the nursing boards.

Students admitted to the ADN to MSN program may be required to complete Live Scan fingerprinting at the end of their first semester in preparation for entering Community Health clinical in their second semester.

Students admitted to the FNP program may be asked to complete Live Scan fingerprinting before entering county facilities or when listed as a requirement with the affiliated site.

### ***Student Release of Information***

All entering students will need to sign a release of information form authorizing the College of Graduate Nursing to release the student's social security number, health and immunization status, criminal background check results, BLS verification, and health insurance coverage to any requesting agency that enters into a clinical partnership with the College. Additionally, some facilities may require fingerprinting. This is required for government and military health facilities who serve clients 18 years of age or younger.

### ***New Student Orientation***

All students enrolled in the College of Graduate Nursing will be required to attend the University campus orientation in August prior to beginning classes their first year. During orientation, students will participate in both college and university sessions. Students will be provided with information regarding the orientation program. Students are welcome to invite their family members to attend the annual Convocation and White Coat ceremonies, which occur at the end of orientation week. Students will have the opportunity to purchase medical equipment, textbooks, and uniforms (if applicable) during the on-campus Orientation/Welcome Week.

### ***Pre-Program (Orientation and GN 5000)***

During orientation, students in all programs are required to attend mandatory sessions, which will include distance learning strategies and requirements along with an overview of the college policies, resources and curriculum. All students accepted into any of our programs will begin GN 5000 Communication and Information Management, which prepares students for success in Western University of Health Sciences' courses, prior to orientation. Students must successfully complete the GN 5000 pre-program course prior to beginning fall courses. Due to the campus-based nature of the MSN-E program, the MSN-E students will not be required to register for the GN 5000 course but will instead have sections of the learning module delivered directly in the program.

## Registration

All WesternU students are required to register by the registration deadlines specified by the University Registrar. Registration dates are posted on the [Registrar's Office](#) website. Failure to register by the deadline may be grounds for administrative withdrawal. All students registering after the posted deadline will be assessed a \$30.00 per business day late fee.

Full tuition and fees and all prior debts must be paid in full on or by posted deadlines each academic year. Matriculation is subject to the satisfactory completion of all academic requirements and payment of all outstanding debts to the University. The receipt of the final transcript(s) from all colleges/universities attended and a physical examination with documentation of required immunizations (if applicable) prior to registration are additional requirements for incoming students.

### Registration Late Fee Appeals

If you are assessed late fees for a registration period, you may submit an appeal to the Registrar. For additional information on the appeal process, please see the [Registration Late Fees](#) page on the Registrar's Office website.

### Student Health Insurance Requirement

All full-time students at Western University of Health Sciences are required to have active health insurance while enrolled. All students are automatically assessed half of the entire year's insurance premium and will be enrolled in the student health insurance plan until they submit proof of coverage that meets the University's requirements. For additional information on student health insurance requirements and/or waiving out of the student health insurance plan, please see the [Student Health Insurance](#) page on the Registrar's Office website.

### Student Initiated Changes in Enrollment Status

#### *Course Drop/Withdrawal*

Students may voluntarily drop a class by working with the Assistant Dean of Student Affairs and completing the necessary paperwork. For students enrolling in Pre-licensure courses, students may voluntarily drop a class by working with the Assistant Dean of Student Affairs and completing the necessary paperwork. Course drops are processed as follows:

<b>0-20% of Course Completed</b> (Based on Course Start/End Dates)	Course is removed from student's registration and will not appear on student's academic transcript.
<b>20-99% of Course Completed</b> (Based on Course Start/End Dates)	Course is assigned a grade of 'W' to indicate the student withdrew from the course. 'W' grades will appear on the student's academic transcript but will not be included in the student's GPA calculation.
<b>100% of Course Completed</b> (Based on Course Start/End Dates)	Course is assigned the grade earned.

#### *Leave of Absence*

A student may request a Leave of Absence (LOA) with the occurrence of a medical emergency or illness, personal issues, financial hardship, or military service. Students must be in good academic standing to be

eligible for a Leave of Absence. For additional information on requesting a Leave of Absence, please see 'Student Initiated Changes in Enrollment Status' in the University Catalog, General Academic Policies and Procedures section.

### ***Withdrawal from University/Academic Program***

Matriculation at the University is a privilege granted in consideration of specified levels of performance and of maintaining established standards of scholarship as well as personal and professional conduct. The University reserves the right to require withdrawal at any time deemed necessary to safeguard standards of scholarship, conduct, and orderly operation. The student concedes this right by act of matriculation. For additional information on Withdrawing from the College of Graduate Nursing, please see 'Student Initiated Changes in Enrollment Status' in the University Catalog, General Academic Policies and Procedures section.

### **Time Limits**

Standard admission and matriculation to the CGN programs are intended for full-time enrollment. Depending upon the program some students may select a part-time/extended curriculum. Each of the programs offered is built around a sequence of courses that builds on knowledge and skills attained in prior courses. Consequently, academic progression is based on successful completion of each course in a program, in sequence. Students are expected to enroll in and successfully complete each course in a sequential progression. Most CGN programs offer an extended curriculum that meets full time semester status to meet financial aid requirements.

Part-time or extended enrollment is possible for all programs except the MSNE program. Students requiring part-time enrollment are encouraged to meet with the program director prior to matriculation. Students who decide that they need to switch from full-time enrollment to part-time enrollment are required to meet with the program director before sending the request to the Assistant Dean of Student Affairs.

The maximum time allowed for completion of all academic requirements is shown below. Students who are unable to complete degree requirements prior to the maximum time for completion may be subject to Administrative Withdrawal.

<b>Full-Time Enrollment</b>	<b>Normal Time to Completion</b>	<b>Maximum Time to Completion</b>
ADN/RN-MSN	2 years	3 years
BSN/RN-MSN	2 years	3 years
MSNFNP	2 years	3 years
MSN-E	3 years	3 years
FNP	1 year	1 year, 6 months
ENP	2 semesters	3 semesters
DNP	3 years	4 years, 6 months
<b>Extended Enrollment</b>	<b>Normal Time to Completion</b>	<b>Maximum Time to Completion</b>
ADN/RN-MSN (3 YR Extended)	3 years	4 years, 6 months
BSN/RN-MSN (3 YR Extended)	3 years	4 years, 6 months
MSN/FNP	3 years	4 years, 6 months
FNP (2 YR Extended)	2 years	3 years
DNP (3 YR Extended)	4 years	6 years

**Full-Time/Part-Time Status**

Graduate nursing students enrolled in 5.00 or more units are considered full-time students. Graduate nursing students enrolled in 3.75 to 4.99 units are considered three-quarters-time students. Graduate nursing students enrolled in 2.50 to 3.74 units are considered part-time students.

## Tuition and Fees

By action of the Board of Trustees, CGN tuition and fees for the 2019/2020 academic year (subject to change) are as follows:

\$921.00	Per credit hour tuition, ADN/RN-MSN
\$921.00	Per credit hour tuition, BSN/RN-MSN
\$921.00	Per credit hour tuition, MSN/FNP
\$1,138.00	Per credit hour tuition, MSN-E (Pre-Licensure)
\$921.00	Per credit hour tuition, MSN-E (Post-Licensure)
\$921.00	Per credit hour tuition, Post-Master's FNP
\$921.00	Per credit hour tuition, Post-Graduate ENP
\$1,205.00	Per credit hour tuition, DNP
\$677.00	Clinical Fee, per semester for clinical enrollment
\$40.00	Annual Student Body Fee*

### Other Fees and Expenses

\$15.00	Name Tag (One-time cost)
\$30.00	Registration Late Fee (per business day)
\$350.00	Graduation Fee
\$470.00	Annual Parking Permit (Auto) (optional)
\$40.00	Locker Key Replacement Charge (if applicable)
\$10.00	Official Transcript (Each)
\$21.00	Rush Transcript, First Class Mail (Each)
\$25.00	Rush Transcript, Federal Express (Each)
\$10.00	Student ID Replacement Fee

### Additional Fees and Expenses (Pre-Licensure Programs)

\$2,200.00	Required texts (approximate)
\$200.00	Uniforms (approximate)
\$637.50	Per semester, On-line Curriculum Support Tool
\$60.00	Background Check (approximate)
\$60.00	Drug Screening (approximate)
\$110.00	1-2-day Nursing Conference (required)
\$2,000.00	Computer (approximate)
\$600.00	Required Clinical Supplies

### Additional Fees and Expenses (Post-Licensure Programs)

\$2,000.00	Required texts and statistical software (approximate)
\$500.00	Medical Equipment (approximate)
\$2,000.00	Computer (approximate)
\$TBD	Lodging/Meals/Travel (varies based on distance/mode of travel)
\$900.00	FNP Review Course Fee (approximate, FNP students only)
\$2,000.00	ENP Skills Intensive (\$1000 per semester, ENP students only)
\$500.00	Required Clinical Supplies (FNP students only)
\$100.00	Required one-time fee for Typhon clinical log system access

### **Administrative and Clinical Fees for Additional Terms**

Students who are extending their program to complete their program requirements must pay the clinical fee if applicable and/or the administrative fee (\$500.00) for each semester that enrollment is continued. This option is only available with the approval of the Program Director and the Dean.

DNP students who are in progress with the DNP Scholarly Project will register for the 8999 continuous enrollment course and will be assessed the \$750.00 administrative fee for each semester until DNP Scholarly Project status is reached.

### **Required Texts**

Students are responsible for obtaining all textbooks prior to the beginning of each semester. Students are encouraged to purchase textbooks through the WesternU Bookstore. Students may explore other purchasing options as well (other medical bookstores, on-line booksellers, etc.); however, the expectation is that students will be in possession of all required textbooks by the first day of the semester, regardless of the purchase source.

WesternU Bookstore hours are 7:30 am to 5:00 p.m. Monday-Friday with some Saturday options during seminar sessions. Summer hours are reduced to 8:00 am to 4:30 pm. In addition, books can be ordered from the Web by linking to the bookstore from the University's home page. Software and media resources are also available. For students using credit cards, textbooks may be ordered by phone or via the Web and mailed directly to a student's home. The WesternU Bookstore phone number is (909) 469-5416.

### **Required Clinical Supplies**

#### ***MSN-E***

Students must have the following items:

- Watch with a second hand
- White Lab Coat with CGN Logo
- Two (2) Official CGN Uniforms
- Western U CGN Name Tag (to be worn at all times in clinical setting)
- Stethoscope with bell and diaphragm
- Penlight
- Kelly clamp
- Bandage Scissors
- Calipers
- Calculator

#### ***MSN/FNP, Post-Masters FNP***

Students must have the following items:

- White Lab Coat with CGN Logo (to be worn at all times in clinical setting)
- WesternU CGN Name Tag (to be worn at all times in clinical setting)
- Ophthalmoscope/Otoscope (encouraged, but optional)
- Reflex Hammer (optional)
- Stethoscope with bell and diaphragm capabilities

#### **Post-Graduate ENP**

Students must have the following items:

- White Lab Coat with CGN Logo (to be worn at all times in clinical setting)
- WesternU CGN Name Tag (to be worn at all times in clinical setting)
- Ophthalmoscope/Otoscope/Reflex Hammer (optional)
- Stethoscope with bell and diaphragm capabilities (required)

### ***MSN/Ambulatory Care***

Students must have the following items:

- White Lab Coat with CGN Logo (to be worn at all times in clinical setting)
- WesternU CGN Name Tag and Identification (to be worn at all times in clinical setting)
- Stethoscope with bell and diaphragm capabilities
- Pen light

All equipment may be purchased from any medical supply company or the University Bookstore.

# General Academic Policies and Procedures

## Academic Year

The College of Graduate Nursing has a twelve-month academic calendar, which begins in August and includes three semesters with intersessions between each semester. Approximate times for semesters are:

Fall:	August – December
Spring:	January – April
Summer:	April – August

The first year MSN-E students will have one introduction week in their first semester of study at the start of term and may have an additional week at the end of the semester for IPE studies.

## Academic/Clinical Advisement

All students are assigned a faculty advisor upon matriculation into the program. Entering students are encouraged to contact their faculty advisor no later than the first month of enrollment in the program. Such contact may take place in person, on-line, or on the telephone. Although advisors are assigned, the student may, with the agreement of the Program Director, request a different advisor. Reasonable efforts will be made to assign a student to the advisor of choice.

Continuing students have the opportunity to contact designated faculty advisors and/or individual instructors on-line, by appointment in person or telephone, or at any seminar weekend. Regular and on-going contact with the academic advisor is encouraged as one method to enhance success in the program.

## Assignment Due Dates

Assignments for all classes will be submitted to the instructor on the date listed in the syllabus. Each instructor will clarify these dates at the beginning of each semester. It is the student's responsibility to contact the instructor if any due date is unclear. If an assignment is submitted on-line, the student is responsible for ensuring that the assignment was received or posted in a timely manner. It is each individual instructor's discretion whether to accept late work. The instructor has the right to refuse to accept an assignment turned in after the due date. Late assignments may, at a minimum, receive point deductions. The instructor will notify the student at the beginning of each semester of the process for late assignments, if any. Postings after the closing of an on-line discussion board will receive a grade of zero.

## Attendance Policies

Students are required to attend and participate at all seminar sessions. Face-to-face learning is a valued part of the curriculum. Attendance at entire class sessions is required for all scheduled instructional periods, be they on-line or during a seminar weekend. Absence or tardiness from instructional periods for any reason does not relieve the student from the responsibility for the material covered during instructional periods. Tardiness or absence patterns will be viewed as violations of Standards of Academic Integrity, Professionalism and Student Conduct and students will be referred to the Student Performance Committee for review. Further, students who submit discussion board postings or other homework during class time will not receive credit for that work, unless submission is directed by the instructor during the session, as students are required to be engaged in learning activities.

### ***Unscheduled Emergent Issues***

If extenuating or emergent circumstances preclude seminar attendance (i.e. military obligations, serious illness, extreme weather), the student is required to notify the director of their program as soon as possible. The director in consultation with program faculty will determine if remediation for missed courses can be accommodated through alternative assignments, technology or make-up examinations. The exact details of the remediation will be determined by the Director in consultation with the faculty of record. The student must understand that missed seminar classes could result in academic suspension or the need for the student to take a leave of absence. Additionally, students who extend their program beyond the normal expected date of completion may be required to attend missed seminar sessions (curriculum) and are subject to administrative fees (continuation fees).

### ***Non-Emergent Issues***

Absences from seminar sessions due to non-urgent issues will result in an automatic failed grade for the courses(s) and students will be referred to the Student Performance Committee.

### ***DNP Clinical/Practice Experience Attendance***

1000 hours of practice experience (direct or indirect) are required to meet the DNP standards. A minimum of 500 of the required hours must be obtained at the DNP level. Practice hours will be recorded and monitored throughout each semester and a faculty member will serve as a coordinator for the practice experience. In addition, each student will have a practice mentor at each agency in which they complete practice hours. As a practice-based program, it is expected that students complete all practice hour requirements and the DNP Scholarly project. Students are responsible for notifying the clinical agency and/or clinical coordinator before the scheduled time if he/she is unable to attend a planned practice experience. Students will not be allowed to attend practice experience without submission of the appropriate paperwork, first receiving clearance from the CGN clinical faculty, and receiving the official clearance email from the CGN Clinical Affiliations Manager. Students who violate the clinical clearance process will be sent to the Student Performance Committee and face possible dismissal.

Note: Once accepted into the DNP program, students are required to show verification of supervised clinical hours from their MSN or other master's health related program.

### ***FNP Clinical Attendance***

As a clinically based program, it is expected that students will follow the guidelines as presented in the syllabus for the GN 7570 (Clinical Experience) course and in the Clinical Preceptor Guide. Unexcused absences from planned clinical experiences are not acceptable. The Clinical Preceptor will inform the Clinical Administrator of all unexcused absences within 72 hours of the absence. As stated in the syllabus for GN 7570 (Clinical Experience) course, students are responsible for notifying the Clinical Preceptor before the scheduled clinical time if he/she is unable to attend. It is understood that all clinical experiences are concurrent with the didactic content of the program. To this end, students begin their clinical rotations the first semester of the program after they have completed competency assessments of their Physical Assessment skills. Students will not be allowed to attend practice experience without submission of the appropriate paperwork, first receiving preceptor and site approval from the CGN clinical coordinator and receiving official clearance from the CGN Clinical Affiliations Manager. Students who violate the clinical clearance process will be referred to the appropriate Program Director and the Student Performance Committee to face possible dismissal.

### ***ENP Clinical Attendance***

As a clinically based program, it is expected that students will follow the guidelines as presented in the syllabus for the GN 5410/5420 (Clinical Experience) course and in the Clinical Preceptor Guide. Unexcused absences from planned clinical experiences are not acceptable. The Clinical Preceptor will inform the Clinical Administrator of all unexcused absences within 72 hours of the absence. As stated in the syllabus for GN 5410/5420 (Clinical Experience) course, students are responsible for notifying the Clinical Preceptor before the scheduled clinical time if he/she is unable to attend. It is understood that all clinical experiences are concurrent with the didactic content of the program. To this end, students begin their clinical rotations the first semester of the program. Students will not be allowed to attend practice experience without submission of the appropriate paperwork, first receiving clearance from the CGN clinical faculty, and receiving the official clearance email from the CGN Clinical Affiliations Manager. Students who violate the clinical clearance process will be sent to the Student Performance Committee and face possible dismissal.

### **MSN-E Attendance for Campus-based Courses**

Students may not miss any more than two class sessions per course for campus-based courses (offered in semesters 1-4). The student must notify the professor prior to the scheduled beginning of the class period of his/her absence. If a student misses more than two class sessions of a course, the student will be required to meet with the faculty member to determine if remediation is required to meet course objectives. The student may also be required to meet with the Program Director.

### ***MSN-E Clinical Attendance***

Clinical rotations are required for students to complete this program. Students are required to report to all clinical rotations and to be on time. If the student expects to be late or absent, the student must notify the clinical instructor and the rotation unit prior to the scheduled rotation start time. Because clinical time is mandated by the Board of Registered Nursing, students who miss clinical hours will still be held responsible for mastering the clinical objectives within instructor-approved settings. To meet the objectives for clinical courses and Board of Nursing mandates, students may not miss more than 15% of the required clinical hours for the course. If a student misses more than 15% of the required clinical hours for a course, the student will fail the course. The student may appeal this decision through a written petition to the Director of the program. The Director, in consultation with the clinical faculty, will determine whether the student will be allowed to continue in the clinical rotation or seek a referral with the Student Performance Committee for further consideration.

### ***ADN to MSN bridge courses, AMB, ANL, CNL Clinical Attendance***

Students are expected to adhere to guidelines in the GN 7570 course syllabus and Clinical Handbook. Unexcused absences from scheduled clinical experiences are not acceptable. As stated in the syllabus for the GN 7570 clinical experience courses, students are responsible for notifying the Clinical Preceptor before the scheduled clinical time if unable to attend. Students will not be allowed to attend practice experience without submission of the appropriate paperwork, first receiving preceptor and site approval from the CGN program director or clinical coordinator and receiving official clearance from the CGN Clinical Affiliations Manager. Students who violate the clinical clearance process will be referred to the appropriate Program Director and the Student Performance Committee to face possible dismissal.

### **Electronic Mail Correspondence Policy**

Faculty, staff, and students of the CGN are expected to respond to electronic communication within 72 hours of receipt. All CGN e-mail users must adhere to the following guidelines, in addition to the University's Appropriate Use policies.

1. Every student, faculty, and staff member of the CGN must have a current version of Antivirus software installed on any computer used to send and receive files or correspondence with other members of WesternU.
2. Faculty, staff, and students may only forward appropriate e-mail content and must carefully review all parts of an e-mail, including wording written by another person prior to forwarding an e-mail.
3. E-mail is not a completely secure communication medium. Faculty, staff, and students must take responsibility for e-mail content and be sensitive to confidential information.
4. The CGN bans the mass forwarding of social media and non-academic messages.
5. Faculty, staff, and students need to be aware that hoaxes, urban legends, and unsubstantiated virus warnings perpetuate fear and waste time. Prior to forwarding such messages, the sender must first substantiate it to the best of his/her ability and then only forward it to CGN for distribution to students and faculty.

### **Videotaping, Audiotaping, Still Photography and Digitized Note Taking in Laboratories and Lecture Halls**

Videotaping, audiotaping, still photography and digital note taking are not permitted in the University laboratories and lecture halls without express permission of the involved instructor or through approved accommodations from the CDHP office. For details on how to obtain permissions, please refer to the University section of the Catalog.

### **CGN Social Networking Guidelines**

The CGN understands the potential benefits of electronic social networking sites, but also recognizes the inherent risks that come with their misuse. In an effort to help protect our faculty, staff and students the college has established the following guidelines.

1. Respect copyright laws, and reference or cite sources appropriately. Plagiarism rules apply to online usage as well.
2. Be aware that University/College or Hospital partner logos and trademarks may not be used without written consent.
3. Understand that your online presence will also reflect upon your professional image. Weigh the risks and benefits of self-disclosure.
4. Always respect the delicate relationship between patient and healthcare provider, student and faculty, and employer and employee.
5. Information that you post should comply with existing policies and laws governing privacy and dissemination of data.
6. Be sure to clearly state that the view expressed are your own and do not represent the views of others.

7. Remember that electronic sites are never completely secure and that what you post, when seen by one, will eventually be shared with others.

### **American Psychological Association Format**

Scholarly writing is the cornerstone and capstone of critical thinking and evidence-based knowledge in graduate education. Students are expected to conduct professional nursing and interprofessional health literature reviews and analyze findings in scholarly formal papers and designated discussion boards throughout their course of study. Students are required to follow the guidelines of the American Psychological Association (APA) for all scholarly submissions.

The College of Graduate Nursing requires the most current edition of the APA formatting style for all formal papers. *The Publication Manual of the American Psychological Association* may be purchased at the University Bookstore.

### **The DNP Scholarly Project**

The DNP Scholarly Project will be an independent individual student demonstration of program outcome competencies facilitated by a faculty Project Team Leader, and a DNP Practice Mentor. Detailed discussion of the project format, development, and implementation process is outlined in the DNP Scholarly Project Handbook. Final approval of all project team members will be made by the College of Graduate Nursing DNP Director.

### **DNP Continuous Enrollment Policy**

If a DNP student does not finish his/her DNP Project within the two years of coursework, he/she must enroll in CGN 8999 – Continuous Enrollment each semester, up to the four-and-a-half-year time limit for the completion of the degree. Students who do not enroll in CGN 8999 will be administratively withdrawn from the program. A \$750 extension fee is charged for each term of enrollment. CGN 8999 is a three-unit repeatable course that is not required for the DNP degree and is therefore not covered by financial aid. Students enrolled in CGN 8999 are considered half time and eligible for loan deferment.

### **Student Concerns/Continuous Quality Improvement (CQI) & Formal Complaint Policy**

The College of Graduate Nursing welcomes constructive comments from students and values comments as a resource for positive change. Most complaints or issues of concern will be resolved through informal avenues such as:

- direct communication between parties,
- anonymous submission via the suggestion box in the CGN classroom,
- guidance from faculty advisor or other resources,
- completion of course evaluations at the end of each semester
- information sharing with the class representatives.

### ***Formal Complaints***

The college encourages the use of informal resolution in all cases but recognizes the need for a formal complaints process for issues that cannot be resolved informally or that are of a more serious nature. Complaints may be regarding a 'student to student' matter, 'student to faculty', 'student to staff' or a

general college-based issue. Formal complaints must be submitted in writing within 30 days of the initial incident and must be signed by the student in order to be considered a formal complaint. Due to the nature of our distance programs, an email coming directly from the student's WesternU email account will be considered as a signature by the student. Formal student complaints can be submitted to the CGN Administrative offices in person or via mail, fax, or email and should be addressed to the following people, in subsequent order, starting with #1, until the student feels their issue has been resolved:

1. Faculty member,
2. Program Director,
3. Assistant Dean of Student Affairs,
4. Dean,
5. University Vice President of Student Affairs or Provost,
6. President.

Emailed correspondence is sent to the person in the chain above. Mailed correspondence for 1-4 above can be sent to:

**Western University of Health Sciences**  
College of Graduate Nursing, Attn. Student Affairs  
309 East Second Street  
Pomona, CA 91766-1854

Faxed correspondence to CGN is sent to 909-469-5521.

Each recipient of the formal complaint will acknowledge receipt and will process the formal complaint within 10 business days by either:

- Resolving the issue from a neutral perspective.
- Referring the issue to the Student Performance Committee (if academically or student conduct related).
- Forwarding the case to the University Vice President of Student Affairs or Provost (when it is a matter of discrimination or sexual harassment that cannot be resolved within the college) or
- Determining that no action is warranted.

The complainant will then be notified of the results and any next steps to be taken.

Any complaint being reported more than 30 days after the initial incident shall be considered already resolved unless there are extenuating circumstances. Students shall not be retaliated against for filing a formal complaint but correspondingly should not use the formal complaint process irresponsibly. All formal complaints shall be tracked along with their outcomes to identify quality improvements in the college programs and all pertaining files kept in the CGN Office of Student Affairs.

## Standards of Academic Integrity, Professionalism, and Student Conduct

The University Standards of Academic Integrity, Professionalism, and Student Conduct can be located in the University Catalog. The standards outlined below are in addition to those outlined in the University Catalog. Students are expected to be aware of, and abide by, both University and applicable College policies.

Honesty and ethical standards are dimensions of integrity. The CGN faculty and administration believe that professional integrity begins with the student nurse and the nurse as student. Academic integrity is essential to scientific knowledge and competent skill acquisition required for successful completion of all CGN programs and safe patient care. Integrity is supported by three domains of the American Nurses Association Code of Ethics for Nurses. These are:

- The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth.
- The nurse participates in the advancement of the profession through contributions to practice, education, administration, and knowledge development.
- The profession of nursing, as represented by associations and their members, is responsible for articulating nursing values, for maintaining the integrity of the profession and its practice, and for shaping social policy.

American Nurses Association (2015) *Code of Ethics for Nurses with Interpretive Statements*, Silver Spring, MD: American Nurses Publishing.

As such, the CGN has no leniency for students engaging in cheating, plagiarism and fabrication. Students charged with any of these violations will be referred to a discipline process. The following definitions of cheating, plagiarism and fabrication are presented as examples and are not inclusive.

### Cheating

Cheating is defined as “intentionally using or attempting to use unauthorized materials, information, or study aids in any academic exercise. Examples of cheating include:

- Unauthorized use of notes, text, or other aids during an examination.
- Copying from another student’s examination, research paper, case write-up, lab report, course assignment, computer disc, etc.
- Talking during an examination.
- Handing in the same paper for more than one course without the explicit permission of the instructor.
- Perusing a test or faculty notes/handouts before it is given.
- Collaboration on a test, quiz, assignment, or project with others without course faculty authorization

- Using unauthorized materials to complete an exam or assignment.
- Using a communication device such as a cell phone, page, PDA, or electronic translator to obtain unauthorized information during an exam
- Using online resources such as Web sites or e-mail while completing an online exam without the permission of the course faculty
- Copying computer files from another person and representing the work as you own
- Taking an exam for another student or permitting someone else to take a test for you
- Allowing others to do research or writing of an assignment (including application), e.g., using the services of a commercial term paper company, using the services of another person (family member, tutor, etc.) inappropriately, without acknowledgement.
- Sharing a take-home examination, course assignment, case write-up, lab report, etc., with another without expressed permission from the faculty.”

*(Brady, 2005; Office of Student Conduct and Conflict Resolution, Northeastern University, 2006).*

## **Plagiarism**

The University does not tolerate plagiarism in any form. Plagiarism involves the use of another’s work without properly giving credit for that work. This includes not properly citing information from another person’s work when stating facts or statistics or when paraphrasing. Plagiarism is grounds for dismissal from the College. To assure that students understand CGN’s policy on academic honesty, students are required to sign this policy during orientation.

Plagiarism is defined as:

“Presenting as one’s own work the work of another person (for example, the words, ideas, information, data, evidence, organizing principles or style of presentation of someone else) is plagiarism. Plagiarism includes paraphrasing or summarizing without acknowledgment, submission of another student’s work as one’s own, the purchase of prepared research or completed papers or projects, and the unacknowledged use of research sources gathered by someone else. Failure to indicate accurately the extent and precise nature of one’s reliance on other sources is also a form of plagiarism. The student is responsible for understanding the legitimate use of sources, the appropriate ways of acknowledging academic, scholarly, or creative indebtedness, and the consequences for violating University regulations. Examples of plagiarism include:

- Failure to acknowledge the source(s) of even a few phrases, sentences, or paragraph
- Quotation or paraphrase of paragraph-length sections of a paper
- Failure to acknowledge the source(s) of a major idea or the source(s) for an ordering principle central to the paper’s or project’s structure

- Failure to acknowledge the source (quoted, paraphrased, or summarized) of major sections or passages in the paper or project.
- The unacknowledged use of several major ideas or extensive reliance on another person's data, evidence, or critical method.
- Submitting as one's own work, work borrowed, stolen, or purchased from someone else."

*(State University of New York, Albany, 2007)*

Fabrication is defined as "Intentional and unauthorized falsification, misrepresentation, or invention of any information, data or citation in an academic exercise. Examples of fabrication include:

- Making up the data for a research paper.
- Altering the results of an experiment or survey.
- Listing a citation for a source not used.
- Stating an opinion as a scientifically proven fact."
- Falsely recording attendance at clinical and/or completion of required clinical hours.

*(Northeastern University, 2006).*

Please note that all issues regarding plagiarism apply to all written assignments, including, but not limited to, papers, discussion boards, presentations and all testing.

## Standards of Academic Progress

For successful progression through the curriculum, the College of Graduate Nursing has a standard of academic performance, which is higher than that for undergraduate education. A minimum overall grade point average of 3.00 is required for progression in all programs and for graduation. Each student's progress is based on successful attainment of the Outcome Competencies (as outlined in the curriculum) and through demonstration of critical thinking skills and competency in written and oral communication. The faculty determines if the student has demonstrated the knowledge, skills, and attitudes necessary to be eligible to progress to the next semester.

### Student Performance Committee

The Student Performance Committee (SPC) is composed of the Chair, a minimum of four faculty members representing various concentrations within CGN's programs, and the Assistant Dean of Student Affairs as an ex-officio member for record keeping, observance of due process, and student support. The Chair and two faculty members shall have a minimum of three years of full-time graduate teaching experience and the other faculty members shall have a minimum of one full-time year graduate teaching experience. Additional faculty members are selected to serve as alternates. SPC Members are selected by the CGN faculty and approved by the Dean. The responsibilities of the Committee include, but are not limited to:

1. Student performance and progression review for determination of student academic probationary status.
2. Student professional conduct or academic review, including but not limited to alleged dishonesty, plagiarism, professionalism, cheating, behavioral issues, and/or other forms of misconduct.
3. Consultation for the development of academic performance and professional conduct policies.
4. Review of grade appeals.
5. Review of course remediation due to failure or the inability to complete course requirements.
6. Review of application for readmission to the College.
7. Review of student progress for graduation recommendations.
8. Review of other academic disputes or grievances.

SPC recommendations are the result of a majority vote. Any Committee Member who is the advisor or instructor of record for a student whose progress is being evaluated by the Committee shall recuse themselves from voting and a member from the SPC alternate pool will take their place. The Chair communicates committee recommendations to the Dean. The Dean makes a final decision and notifies the student directly. Recommendations of the committee and/or action of the Dean may include, but are not limited to:

1. Clearance from alleged violation
2. Remediation

3. Requirement of psychological and/or educational assessment and intervention with documentation that student can meet all CGN program requirements
4. Requirement of physical examination and/or diagnostic evaluation by a physician or nurse practitioner (appropriate to the situation) with documentation that student can meet all CGN program requirements
5. Academic and/or Conduct probation
6. Academic and/or Conduct suspension
7. Dismissal

Once the Dean has made the final decision a letter or email will be sent to the student outlining the outcome and subsequent implications. Once the student has been informed the Dean will then notify the Student Performance Committee Chair, the appropriate program Director and the Assistant Dean of Student Affairs. The decision process will happen within ten business days of committee recommendation submission.

All cases that come to the Student Performance Committee are treated fairly and all potential opportunity for a positive outcome are considered.

#### ***Non-Student Conduct Hearing Procedures***

When a matter is referred to the committee and the committee has received all relevant documentation the committee will notify the student that the review process has begun. A review will be completed within 10 business days (excluding University holiday or inter-sessions occurring during the evaluation period). The procedure for Committee review is as follows:

1. To initiate a review, the faculty, staff or student who is bringing a complaint forward will gather all pertinent information and present it to the Director of the appropriate program. The Director, after evaluating the information, will then forward the request for SPC review to the SPC Chair and the Assistant Dean of Student Affairs, including a detailed description of the course failure or incident to be reviewed.
2. Once the request has been forwarded to the Committee, the student will be notified by the Assistant Dean of Student Affairs and requested to submit a response (petition). If the outcome has the potential for suspension or dismissal, the student is given the opportunity to attend the Student Performance Committee meeting in person. If the student does not live locally, every effort will be made to accommodate attendance through electronic means. SPC meetings with the student present are audio- recorded unless consent is not given by the student to do so.
3. The Committee may perform additional fact-finding including requests for additional documentation from faculty of record, student or other persons with knowledge of the issue. The Assistant Dean of Student Affairs will counsel the student on the process and act as a guide to assist the student as needed.
4. The student may request permission for a mentor to appear at the meeting. It is the student's responsibility to make the request in writing, and to identify the proposed mentor. The Chair will determine whether to grant the student's request. The mentor's role will only be one of emotional

support and they are not to participate in the meeting unless the Committee feels that the mentor has information directly related to the case, at which time they will become a witness and no longer act as a mentor.

5. All recommendations of the Student Performance Committee shall be made in writing to the Dean of the College of Graduate Nursing, who will then make a final decision and inform the student in writing within five business days. If dismissal is the recommendation, the Dean may choose to meet with the student before making a final decision. A note taker will be present in all meetings with the Dean.

### ***Student Conduct Hearing Procedures***

For a full account of the hearing process, please refer to “Information for Students about Hearings Involving Alleged Violations of the Standards of Student Conduct”, located in the General Section of the University Catalog.

### ***Student Appeal Process***

In accordance with the University catalog, the Dean shall have authority to make decisions regarding a student’s status in matters of academic progression/promotion, suspension, student conduct, dismissal and graduation. Students may request an appeal of the Dean’s decision to the SVP/Provost by following the process defined in the ‘Student Appeal Process’ section of the University Catalog.

### **Program Completion/Graduation**

Unless the Dean of the College of Graduate Nursing has granted special permission, all students must attend and participate in the Commencement program. If the Dean grants special permission to be excused from the Commencement ceremony, the graduate may be required to present himself or herself to the Chief Academic Officer or appropriate Dean at another time to receive his or her diploma. Due to the nature of the CGN academic calendar, the Commencement ceremony takes place before the end of the academic year. In order to be placed on the list to participate in Commencement, the student must be on schedule for completing at least 75% of their coursework by May of their final academic year, and on schedule to complete 100% by December of the next academic year. Clinical hours are included in this policy, but program Directors will have discretion to set any determining mile markers along the way.

### ***MSN-E:***

Students who have met the following requirements will be considered candidates for the degree of Master of Science in Nursing:

- Completion of all course requirements with a minimum overall GPA of 3.00.
- Completion of all required clinical hours and clinical objectives with verification by the preceptor(s).
- Compliance with all the legal and financial requirements of the University as stated in the University Catalog.
- Demonstrated no serious deficiencies in ethical, professional or personal conduct as outlined in the universities Standards of Professional Conduct.

***Post-Licensure MSN/CNL, MSN/ANL, MSN/AMB:***

Students who have met the following requirements will be considered candidates for the degree of Master of Science in Nursing:

- Completion of all course requirements with a minimum overall GPA of 3.00.
- Completion of all required clinical hours and clinical objectives.
- Compliance with all the legal and financial requirements of the University as stated in the University Catalog.
- Demonstrated no serious deficiencies in ethical, professional or personal conduct as outlined in the University and/or College's Standards of Academic Integrity, Professionalism and Student Conduct.

***Post-Licensure MSN/FNP, Post Master's FNP***

Students who have met the following requirements will be considered candidates for the degree of Master of Science in Nursing and/or Family Nurse Practitioner Certificate:

- Completion of all course requirements with a minimum overall GPA of 3.00.
- Completion of a minimum of 675 FNP clinical practice hours for students pursuing the FNP Certificate. Students must satisfactorily demonstrate all clinical competencies.
- Compliance with all the legal and financial requirements of the University as stated in the University Catalog.
- Demonstrated no serious deficiencies in ethical, professional, or personal conduct as outlined in the University and/or College's Standards of Academic Integrity, Professionalism and Student Conduct.

***Post-Graduate ENP***

Students who have met the following requirements will be considered candidates for the Emergency Nurse Practitioner Certificate:

- Completion of all course requirements with a minimum overall GPA of 3.00.
- Completion of a minimum of 270 ENP clinical practice hours for students pursuing the ENP Certificate. Students must satisfactorily demonstrate all clinical ENP competencies.
- Compliance with all the legal and financial requirements of the University as stated in the University Catalog.
- Demonstrated no serious deficiencies in ethical, professional, or personal conduct as outlined in the University and/or College's Standards of Academic Integrity, Professionalism and Student Conduct.

## ***DNP***

Students who have met the following requirements will be considered candidates for the degree of Doctor of Nursing Practice:

- Completion of all course requirements with a minimum overall GPA of 3.00.
- Completion of a minimum of 1000 direct or indirect supervised graduate level clinical/practice hours. Students will be held responsible for gathering verification of clinical/practice hours to be used from their master's program. Students must satisfactorily demonstrate all program competencies.
- Satisfactory completion and presentation of the DNP Project.
- Compliance with all the legal and financial requirements of the University as stated in the University Catalog.
- Demonstrated no serious deficiencies in ethical, professional, or personal conduct as outlined in the University and/or College's Standards of Academic Integrity, Professionalism and Student Conduct.

## **Adverse Actions**

### ***Academic Probation***

Students must maintain a cumulative GPA of at least 3.00 each semester. If a student's GPA is below 3.00 for a semester or receives two or more "Incomplete" grades in one semester, the student will be placed on academic probation. Students may only be on academic probation for a maximum of two semesters. Students who are subject to academic probation for a third semester will be reviewed by the Student Performance Committee and may be at risk for dismissal. (See SPC section of this catalog section for process)

### ***Conduct Probation***

Students may be placed on conduct probation via the SPC process for ethical or behavior issues. If a student placed on conduct probation continues to have conduct issues, the matter will be referred to the SPC, or handled directly by the Dean, unless the student requests a hearing before the SPC. The Dean, consistent with the University catalog, can consider disciplinary sanctions up to and including dismissal in such matters.

### ***Failed Course Policy***

If a student fails a course, they may not take an equivalent course at another institution and transfer the course to Western University of Health Sciences. Students who fail a CGN course must retake and pass the course through the College of Graduate Nursing. Students failing a course may be reviewed by the Student Performance Committee and placed on academic suspension or potential dismissal. (See SPC section of this handbook for process)

### ***Financial Aid Warning Policy (Title IV and Title VII)***

If a student is not making Satisfactory Academic Progress (SAP) they may be placed on "Financial Aid Warning" status for the next payment period and continue to receive financial aid for that period. Financial Aid is any financial assistance offered to the student for paying for their education, such as loans,

scholarships, Federal Work-Study, grants and stipends (judged on the criteria of the stipend). Students who fail to make SAP by the end of the payment period lose Financial Aid eligibility.

It is the policy of the Financial Aid Office (FAO) that once a student has been placed on academic probation for not meeting SAP standards as defined by the college, the FAO will automatically place the student in a Financial Aid Warning status. During the next academic term, if the student does not meet SAP standards and the college places the student on academic suspension, the student will no longer be eligible for financial aid. If the student appeals the academic suspension and the appeal is approved, financial aid will be reinstated. If the student is directed to audit courses, those courses will not be covered by financial aid.

### ***Tutorial Assistance Program***

A Tutorial Assistance Program (TAP) has been established to assist students experiencing academic difficulty. Students will be recommended for this program by a faculty advisor or professor. Students may self-identify to TAP to receive assistance. The tutors will be chosen on the recommendation of the faculty in each discipline. Group tutoring is the methodology most used by the TAP department. For assistance, contact the Learning Enhancement and Academic Development Office (LEAD).

### ***Remediation***

#### **Remediation of a Specific Learning Assignment**

Remediation of learning activities within a course is at the discretion of the faculty. Remediation within a course is a privilege and not a right. Hence, if remediation is available, students may remediate one learning activity within a course to meet the grading policy for the course. The student must arrange for remediation within ten (10) business days of receiving a grade for that assignment. The instructor will outline required remediation and work with the student to establish a mutually agreed upon period to complete. The minimum passing grade of 77% pre-licensure or 80% post-licensure is the highest possible grade that can be achieved through remediation. If a student does not comply with the remediation contract, a grade of "U" will be received for the learning activity.

#### **Remediation of a Course**

A student who does not achieve a grade of C+ (pre-licensure) or B- (post-licensure) or higher in didactic or clinical courses will receive a grade of "U". The College will provide each student with the opportunity to demonstrate competency, however, remediation is a privilege, not a right. Students must have demonstrated the likelihood of success in the remediation process by active participation in the educational program including course attendance and participation, active involvement in clinical experiences, individual initiative and use of resources. Students who demonstrate the potential for remediation will be placed on academic probation or suspension by the Student Performance Committee (SPC) with a formal remediation contract. The remediation contract will outline the activities required for remediation, the outcomes expected for successful completion, and a date for completion. Copies of the remediation contract, signed by the faculty member and the student, will be filed with the CGN. The student may not enroll in any other CGN courses until a remediation contract has been approved by the SPC. To ensure a timely process, the Committee will strive to have a decision within ten business days of receipt of all relevant materials.

Students who receive a grade of U or NCR in a course must submit a formal petition to the SPC requesting to repeat the course and continue in the program. This petition must be received within one week of receipt of the failing grade. This petition should include a discussion of the reasons for course failure as

well as the strategies the student has identified to increase the likelihood of successful completion of the course in the future. Upon receipt of the student's petition to continue in the program, the SPC will review the student's petition and either recommend dismissal, a complete repeat of the course or a remediation contract will be created, in consultation with the instructor of record for the failed course. Two copies of the contract will be generated and will include all conditions necessary for course remediation and program continuation, with a statement that the student understands the terms of the contract. The student will sign one copy and return it to the College within one week of receipt.

Students can to remediate or repeat only two courses in the program. Options for remediation may include, but are not limited to, the following:

- Taking a comprehensive examination on the course content,
- Completing special projects or studies in the area(s) of deficiency; and/or,
- Repeating a specific learning objective.

### **The Grading of Remediated Curriculum**

Upon completion of the remediation contract, the instructor will submit a recommendation to the Student Performance Committee and the Dean. A grade of C+ is the highest possible grade that can be achieved through remediation of pre-licensure courses and a B- in all other courses. Upon successful remediation by completing one or more of the activities described above, the transcript is notated with the grade earned alongside the original grade. For example, a student who originally received a "U" grade and, who, by remediation, earned a "B-" grade will have a grade of "U/B-" entered on their transcript.

### **The Grading of Repeated Curriculum**

If a student is directed to repeat a course, the grade for the repeated course will be recorded on the official transcript separately and within the semester the repeated course was completed. The original course grade will remain recorded in the semester it was originally taken. Students will be charged full tuition for repeated coursework.

Only the repeated grade(s) for the course(s) will be included in the student's GPA calculation.

### ***Academic Suspension***

Students who have dropped below a 3.00 or who have failed a course will be placed on academic suspension by the Dean or Student Performance Committee as an alternative to withdrawal from the program. Students pursuing clinical concentrations who are placed on academic suspension may be subject to clinical skills evaluation prior to returning to the clinical setting (see SPC section of this catalog for process). See the **University Academic Suspension Policy** in the Overview section of the catalog for more information.

### ***Dismissal***

All information related to academic dismissal from the programs of the College of Graduate Nursing will be reviewed by the Student Performance Committee. Dismissal decisions are presented in writing to the Dean by the college Student Performance Committee. The Dean has the authority to accept or reject the decision.

Dismissal criteria include:

1. Failure to meet required minimum grade for a course(s) within the program.
2. A pattern of “Incompletes” in courses resulting in failure to complete the program in a timely manner.
3. Failure to meet the professional expectations of the University as outlined in the University Policies and Procedures section of the University Catalog.
4. Failure to complete all aspects of remediation as specified in the remediation contract for specific course(s).
5. Incidents of plagiarism, cheating, or other forms of dishonesty.
6. Failure to meet standards for professional conduct, and any breach of professional behavior in the clinical setting which could jeopardize patient care or relationships at clinical agencies used for training.
7. The discovery of misrepresentation, material omission, or falsification of materials required for admittance into the program.

Any student who is dismissed from the program must contact the Financial Aid Office and the Bursar’s Office to discuss any issues related to tuition and fees. Any dismissed student must immediately return his/her student ID badge to the Vice President for Enrollment Management and University Student Affairs. (See SPC section of this catalog for process). See the University Dismissal policy in the Overview section of this catalog for more information.

## Clinical Education

### Clinical Guides

In addition to the information contained in this catalog, each student enrolled in a clinical program in the College of Graduate Nursing will receive a clinical/mentor handbook specific to their program. Students will be responsible for following all clinical/practice policies contained in the clinical/mentor handbook for their program of study.

### Health and Immunization Requirements

All students are required to submit health and immunization documentation to the Student Health Coordinator yearly. If a student falls out of compliance, they will be suspended from clinical activities, a hold placed on their registration until all health, and immunization records are up to date. Please see the University Catalog overview for detailed health and immunization requirements.

### Professional Appearance and Dress Code

All students of the College of Graduate Nursing are expected to maintain a professional appearance. Professional appearance relates to clothing, hair, nails, shoes, carriage and communication. Students' appearance should not risk offending or disturbing clients, faculty or preceptors. Students must recognize that nursing is a service-oriented profession.

While on-campus, students must follow the WesternU Dress Code. In clinical agencies, students are active learners and are, in essence, guests in these agencies. Recognition of this status means that students must adhere to all agency policies and guidelines including acceptable attire and behavior.

- MSN-E unless otherwise instructed, the uniform requirements are as follows:
- A laboratory coat is required and must be worn, with the Western University of Health Sciences name tag, when in the hospital other than for clinical labs, for example, when selecting patients, going to medical records, or reviewing charts. Appropriate and professional attire is always required. Casual attire such as shorts, jeans, open-toed shoes, short tops showing midriff, etc., is never permissible in the clinical setting. This is in accordance with contractual agreements with clinical agencies for individuals when in the agency in a professional student role.
- The student will wear a uniform of burgundy pants and a burgundy tunic style top. An identifying patch will be sewn on the left sleeve. Nametags must be worn at all times. Undergarments should not be visible through the uniform. A short white lab coat may be worn over uniforms for added warmth while working with clients. If needed, black long-sleeved undershirt may be worn under uniforms for warmth. Nametags can be purchased at the University Bookstore.
- The professional looking student uniform is clean, pressed, and reflects frequent laundering.
- Clean, solid black, rubber-soled, enclosed heel and toe shoes with clean, black shoelaces if applicable. They should be designated for clinical use only. Strapless/backless shoes are unacceptable.
- Black socks must be worn to blend in with the black shoes.

- Hair should be worn away from the face, collar, and neck. It should be confined appropriately if long or full in style. Hairstyles should reflect professional comportment, i.e., no extreme styling, no excessive hair ornaments. Hair coloring should remain in the realm of what can be genetically transmitted.
- No fragrances should be worn in clinical settings. Because of the close and physical nature of direct care nursing, students are expected to be clean and odor free. If an offensive odor is noticed by faculty, staff, clients, or peers, the student will be asked to take corrective action.
- Jewelry is limited to a watch, one plain ring, and one pair of plain, inconspicuous earrings if ears are pierced. There should be no other visible jewelry. Any piercing other than earrings (i.e. nose, eyebrow, lip, tongue, etc.) should be removed when in the clinical setting.
- Tattoos should be covered with clothing, if possible.
- Nails should be appropriately groomed, and any nail polish should be clear or a pale color. False fingernails, tips, and acrylic nail covers harbor a wide variety bacteria and fungi and by law are not permitted in hospital settings.
- Some specialty areas may require uniform adaptations. Unless specifically instructed to do otherwise, the complete uniform, i.e., shirts, pants, shoes, and name badges will be worn in all clinical areas.
- It is advisable that all students own at least one pair of dress slacks that are appropriate for wearing in the community setting.
- Although gum chewing is not appropriate in clinical situations, breath mints may be advisable.

The College of Graduate Nursing must comply with the policies of various hospitals, clinics, and other agencies where clinical practice is scheduled. Students should be aware that additional dress restrictions and infection control policies might be required in specific departments of agencies or hospitals. Any other concerns will be addressed through your clinical instructor who has the final decision on dress code implementation. If unprofessional attire is reported in clinical agencies, clinical grades may be lowered, or preclinical access to patient records may be restricted; additionally, the student may be placed on probation for unprofessional behavior.

### **Practice-Based Training for DNP Students**

Practice-based assignments may begin in the second semester of the program and after the student has complied with all University health, safety, and immunization documentation requirements. A total of 1000 hours post baccalaureate are required in order to meet the DNP outcome competencies. Practice hours may be awarded from a student's MSN/or other master's program of study; however, a minimum of 500 hours must be completed within the Post-Masters DNP program.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits while completing clinical training.

### ***Mentors***

Practice hours provide the opportunity for the DNP student to meet the DNP Essentials. Practice hours require a clinical mentor. CGN requires that all mentors must be approved by the DNP leadership. To assist mentors, CGN provides clinical experts with a guidebook to clarify program and course objectives. A faculty Clinical Coordinator is assigned to serve as the coordinator for monitoring the practice hours. Each student will have a clinical mentor at each agency in which they complete clinical assignments. During the completion of the DNP project, the student's Faculty Team Leader and the Practice Mentor will serve as consultants for the student.

The College encourages multiple sites for specific experiences if needed to optimize student learning. A student's practice mentor and/or clinical resource person may suggest or assist with identifying and coordinating these experiences. Due to the distance delivery of the program, students are encouraged to identify qualified clinical resource persons in their community prior to starting the program. However, no practice hours may be initiated or completed until matriculated into the CGN and all clearances processes have been met. No student will be allowed to participate in any clinical/practice experience without first having complied with all the University health, safety and immunization documentation requirements and obtaining clearance from the college (for each site and each preceptor/mentor). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

If students have difficulty identifying practice mentors, the DNP faculty will assist students with securing qualified mentors or resource persons.

As expected with professional practice, all data gathered about an agency or individual patient and his/her health/illness, including all items within the medical record, are privileged information. Agency and client confidentiality must be maintained.

Students are encouraged to wear student identification and lab coats when appropriate while in the clinical/practice setting. Western University of Health Sciences maintains malpractice and accident insurance coverage for enrolled students. Professional nursing malpractice insurance (in the student role) is recommended but not required.

### ***Notification of Practice Hours***

The College requires students to notify the clinical/practice site and mentor or resource person when the student will be at the practice site. The student may not attend any practice hours without first obtaining the appropriate clearance from the College of Graduate Nursing for each site and mentor used. Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

### ***Practice Hours***

The DNP program is a completion program for master's prepared nurses and takes into account previous clinical experiences; therefore, clinical/practice hours will be adjusted accordingly, to meet the needs of the AACN requirement of 1000 clinical hours and the required minimum of 500 hours that are to be obtained at the DNP level.

### ***Record Keeping and Practice Hour Logs***

Students will document the hours and the assignments they have completed during their clinical/practice experiences for their course faculty and in their clinical logs using de-identified data to ensure HIPAA compliance. Students will receive an orientation on how to record practice hours prior to any practice hours. Electronic documentation of the practice hours will be submitted in a timely fashion. In addition,

students may be required to submit other documentation pertaining to their practice experiences both during and at the end of the semester. Failure to do so may result in an incomplete grade and/or failure to progress in the curriculum.

### **Clinical Training for FNP Students**

Clinical training begins after the student has: (1) successfully completed the Advanced Physical Assessment competency based physical assessment testing, (2) complied with all the University health, safety, and immunization documentation requirements and (3) received the appropriate clearance to attend clinical from the CGN (for each site and preceptor used). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits while completing clinical training.

#### ***Preceptors***

A student's preceptor may be a physician trained in family practice or internal medicine, preferably board certified, or a master's degree prepared, certified NP. Additionally, Certified Nurse Midwives are acceptable preceptors for prenatal and gynecology rotations. The College encourages multiple rotations for specific experience if needed to optimize student learning. A student's preceptor and/or clinical instructor may suggest or assist with identifying and scheduling these rotations. If the preceptor is a physician, the student should also work with a nurse practitioner to promote role development. Due to the distance delivery of the program, students are encouraged to identify qualified preceptors in their community prior to starting the program. However, no clinical hours may be initiated or completed until matriculated into the CGN. If students do not have a preceptor, the Clinical Administrator will assist students with securing a qualified preceptor. All preceptors must have an active and clear license. If the preceptor has disciplinary actions listed on their license clearance for the student to work with that preceptor may be denied.

Preceptors working within specific guidelines established by the program will be responsible for assuring appropriate and adequate learning experiences, as well as supervising students for safe practice. A student's preceptor may not be related to, or be in a relationship with the student, as it compromises the integrity of the assessment process. Preceptors and clinical sites must be approved by the faculty and Western University of Health Sciences. A Preceptor Guide will be provided to all preceptors.

As expected with professional practice, all data gathered about a patient and his/her health/illness, including all items within the medical record, are privileged information. Client confidentiality must be maintained.

Students must consult with their preceptors on all patients seen by the student. The supervising practitioner must review and countersign all student notes written in the medical record. Students are not allowed to prescribe medications or sign any prescription order.

Students are always required to wear student identification and lab coats while in the clinical setting. WesternU maintains malpractice and accident insurance coverage for enrolled students. Professional nursing malpractice insurance (in the student role) is recommended but not required.

### ***Scheduling***

Students can complete clinical experiences in a local community with an approved preceptor and clinical site. Students should be prepared to travel to a clinical site. Students must also be prepared to work around the availability of the clinical site and preceptor. Particular days and times for clinical cannot always be guaranteed. When working out a clinical schedule, the College encourages students to schedule the same clinical day(s) each week to provide consistency for the agency and patient follow-up. Additional days should be scheduled to accommodate for illness, employment, or family responsibilities.

### ***Clinical Hours***

Eight to twelve hours per week of clinical training are required of full-time students throughout a two-year course of study to complete 675 hours or twelve to twenty-four hours per week for a one-year course of study. Following successful completion of the Physical Assessment course competency testing, full-time students are expected to complete 1-5 units of clinical training each semester. Forty-five hours must be completed for each unit, for a total of 15 units. Administrative and clinical fees will be charged for the additional semester(s) to complete the 15 units. Students who fail to meet the 45 hours minimum per semester for two consecutive semesters will be placed on academic probation or suspension and are at risk for dismissal.

### ***Clinical Progression***

Student productivity is expected to increase with each semester's experience. Initially, students may see approximately 4-6 patients per day. The student is expected to gather complete subjective and objective data on each patient, even though early in the program the student may not be able to fully assess the problem or develop a complete treatment plan. Later in the program, students will be expected to see approximately 4-8 patients per day and provide comprehensive care including assessment and plan of treatment. Students will be guided to transition from novice to advanced clinician as they progress in the clinical practicum.

It is recommended that FNP students see approximately 810 patients during their program. The goal for patient mix is Pediatrics 15%, Adults 40%, Geriatrics 20%, GYN 15%, and OB 10%. Students are encouraged to obtain other rotations to complete clinical objectives if they are not in a family practice setting. In addition, students are advised to find Urgent Care and Emergency Room rotations for short rotations for skills and procedures experience. The clinical faculty of record will review students' clinical logs every two weeks in each semester. In addition, Preceptor Evaluations of the student are documented each semester.

### ***Record Keeping and Clinical Hours***

The College of Graduate Nursing uses an electronic system to record clinical hours. Students will record each patient visit into the clinical log using de-identified data to ensure HIPAA compliance. Students will receive an orientation to the use of the electronic system. Clinical hours will be evaluated biweekly, and at other times, if requested by the faculty. In addition, students are required to submit other documentation (i.e. Preceptor Evaluation, Student Evaluation of the Preceptor, Student Objectives) at the end of the semester. Failure to do so may result in an incomplete grade and/or failure to progress in the curriculum.

### ***Clinical Site Visits***

Faculty and contracted ENP site visitor evaluations of a clinical site will be conducted each semester. These Clinical Site visits are completed in one of three ways: 1) in-person site visits; 2) virtual site visit via Webcam; or 3) or via teleconference. If an in-person site visit is conducted, student clinical competency will be evaluated at this time by direct observation of the student's performance and interaction with

patients, preceptors and staff. In addition, the clinical faculty provides guidance and support as well as assistance with clinical decision making during all forms of site visits. Students who receive an unsatisfactory site visit evaluation must complete a remediation process with the possibility of additional clinical hours added.

### ***Waiver of Clinical Hours - FNP***

The faculty believes in granting credit for previous, appropriate professional experience. Students who are licensed NPs in a specialty area other than Family may submit a written request for a waiver of the required clinical hours. It is the view of the faculty that to complete such a broad specialty area such as the family nurse practitioner, more clinical hours are required than the national or state minimum of 350-540 hours. Currently, students in the Family Nurse Practitioner program are required to complete 675 clinical hours.

Students who petition to receive credit for previous clinical education for their nurse practitioner specialty must provide an official transcript that documents clinical hours. If hours are not listed on the transcript, a letter from the Dean or Director of the NP program is required to verify clinical hours completed in the program. Certified or licensed Nurse Practitioners who did not complete a formal nurse practitioner education program from an accredited institution of higher education must submit a written request, as well as a portfolio, which verifies clinical competence in his or her specialty to the Program Director. The portfolio could include national certification; letters from collaborating or supervising physicians, advanced practice nurses, or faculty; CEU; clinical evaluations completed by Western University of Health Sciences faculty; and/or clinical coursework. The student's request and documentation will be forwarded to the Student Performance Committee for consideration. Students will be notified in writing of the Committee's decision. Students will not be exempt from tuition fees if hours are granted.

### **Clinical Training for ENP Students**

Clinical training begins within the first semester of the ENP curriculum after the student has: (1) complied with all the University health, safety, and immunization documentation requirements and (2) received the appropriate clearance to attend clinical from the CGN (for each site and preceptor used). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits while completing clinical training.

### ***Preceptors***

A student's preceptor may be a physician trained in emergency practice, preferably board certified, or a master's degree prepared, nationally certified FNP working in the subspecialty settings of Urgent Care or Emergency Department practice. The College encourages rotations for specific experience if needed to optimize student learning. A student's preceptor and/or clinical instructor may suggest or assist with identifying and scheduling these rotations. If the preceptor is a physician, the student should also work with a family nurse practitioner (as applicable) to promote ENP role development. Due to the distance delivery of the program, students are encouraged to identify qualified preceptors in their community prior to starting the program. However, no clinical hours may be initiated or completed until matriculated into the CGN. If students do not have a preceptor, the Clinical Practice Coordinator and/or Administrator will assist students with securing a qualified Urgent Care and Emergency Department preceptor.

Preceptors working within specific guidelines established by the ENP program will be responsible for assuring appropriate and adequate learning experiences, as well as supervising students for safe practice. A student's preceptor may not be related to, or be in a personal relationship with the student, as it compromises the integrity of the assessment process. Preceptors and clinical sites must be approved by the faculty and Western University of Health Sciences. A Preceptor Guide will be provided to all preceptors.

As expected with professional practice, all data gathered about a patient and his/her health/illness, including all items within the medical record, are privileged information. Client confidentiality must be maintained.

Students must consult with their preceptors on all patients seen by the student. The supervising practitioner/provider must review and countersign all student notes written in the medical record and/or electronic health care record as permitted by agency. Students are not allowed to prescribe medications or sign any prescription order despite they may have the authority to do so within their existing practice as a licensed and authorized prescriber. As a student of CGN in a "new" program, you cannot write for any prescriptions in your CGN student role.

Students are always required to wear student identification and lab coats while in the clinical setting. WesternU maintains malpractice and accident insurance coverage for enrolled students. Professional nursing malpractice insurance (in the student role) is recommended and advised.

### ***Scheduling***

Students can complete clinical experiences in a local community with an approved preceptor and clinical site. Students should be prepared to travel to a clinical site. Students must also be prepared to work around the availability of the clinical site and preceptor. Particular days and times for clinical cannot always be guaranteed. When working out a clinical schedule, the College encourages students to schedule the same clinical day(s) each week to provide consistency for the agency and patient follow-up. Additional days should be scheduled to accommodate for illness, employment, or family responsibilities.

### ***Clinical Hours***

Approximately 10 hours per week of clinical training are required of full-time students during the first semester, which should begin by week 3. The 2-semester course of study is to complete a total of 270 hours. The first semester will include 90 hours of concentrated Urgent Care clinical experience and 180 hours of Emergency Department clinical immersion in the second semester. For the second semester, students will need a minimum of 20 hours per week to satisfy completion of their practice immersion experiences. The ENP certificate consists of two, 6-credit hour courses (didactic with clinical experience). Following successful completion of the course competency testing and procedural skills immersions, full-time students are expected to complete their practice and clinical training each semester. Administrative and clinical fees will be charged for additional semester(s) to complete the ENP certificate if warranted. Students who fail to meet the required credit hours per semester will be placed on academic probation or suspension and are at risk for dismissal.

### ***Clinical Progression***

Student productivity is expected to increase with each semester's experience. During the first semester, students may see approximately 10-15 patients per day in the urgent care setting. The student is expected to gather complete subjective and objective data on each patient, assess the problem, and develop a treatment plan for presentations encountered. In the second semester, students will be expected to see

a complex variety of patients and provide a more comprehensive plan of care in the assessment, intervention, treatment, and management of emergency conditions. Students will be guided to transition from novice ENP to advanced ENP clinician as they progress in their clinical practicum.

Clinical faculty of record will review students' clinical logs every two weeks in each semester. In addition, Preceptor Evaluations of the student are documented each semester.

### ***Record Keeping and Clinical Hours***

The College of Graduate Nursing uses an electronic system to record ENP clinical practice hours. Students will record each patient visit into the clinical log using de-identified data to ensure HIPAA compliance. Students will receive an orientation to the use of the electronic system. Clinical hours will be evaluated mid and end of each semester, and at other times, if requested by the faculty. In addition, students are required to submit other documentation (i.e. Preceptor Evaluation, Student Evaluation of the Preceptor, Student Objectives) at the end of the semester. Failure to do so may result in an incomplete grade and/or failure to progress in the curriculum.

### ***Clinical Site Visits***

Faculty and contracted ENP site visitor evaluations of a clinical site will be conducted each semester. These Clinical Site visits are completed in one of three ways: 1) in-person site visits; 2) virtual site visit via Webcam; or 3) or via teleconference. If an in-person site visit is conducted, student clinical competency will be evaluated at this time by direct observation of the student's performance and interaction with patients, preceptors and staff. In addition, the clinical faculty provides guidance and support as well as assistance with clinical decision making during all forms of site visits. Students who receive an unsatisfactory site visit evaluation must complete a remediation process with the possibility of additional clinical hours added.

### **Clinical Training for Ambulatory Care Nursing Students**

Introductory discussions will occur in the first year, spring semester to introduce the AMB student to the outcome competencies for the Ambulatory Care Nursing role. Mentor, clinical agency and clinical requirements will be identified in this semester to prepare the student for the AMB clinical experience. Beginning in the summer of year one, the student will begin the immersion experience for a total of five clinical units (225 hours) to operationalize the Ambulatory Care Nursing role. No student will be allowed to participate in any clinical experience without first having complied with all the University health, safety and immunization documentation requirements and obtaining clearance from the college (for each site and each preceptor/mentor). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has not claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation or unemployment benefits while completing clinical training. Students may not accrue clinical hours simultaneous to paid employment.

### **Clinical/Practical Training for Health Systems Leadership/Administrative Nurse Leader Students**

Introductory discussions will occur in the second semester of the two-year program to introduce the ANL student to the outcome competencies for the administrative nurse leader role. Preceptor, clinical agency, and clinical requirements will be identified in this semester to prepare the student for the ANL clinical experience. In the summer semester of year one, the student will complete a minimum of 45 hours per

semester, 90 hours in their last semester, for a total of 225 clinical hours. Working with their faculty advisor and a CGN-approved preceptor(s), the student will complete learning activities that demonstrate integration of the semester objectives and advance the competencies of a nurse leader/manager. No student will be allowed to participate in any clinical experience without first having complied with all the University health, safety and immunization documentation requirements and obtaining the appropriate clearance from the college (for each site and each preceptor). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits while completing clinical training.

### **Clinical Training for Health Systems Leadership/Clinical Nurse Leader Students**

Introductory discussions will occur in the second semester of the two-year program to introduce the CNL student to the outcome competencies for the clinical nurse leader role. Preceptor, clinical agency, and clinical requirements will be identified in this semester to prepare the student for the CNL clinical experience. Beginning in the summer semester of year one, the student will begin the immersion experience for a total of nine clinical units (405 hours) to operationalize the CNL role. No student will be allowed to participate in any clinical experience without first having complied with all the University health, safety and immunization documentation requirements and obtaining the appropriate clearance from the college (for each site and each preceptor). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits while completing clinical training.

### **Clinical Rotations Policy, MSN-E**

Students achieve many of the course requirements through practical experience in many different health care agencies. Clinical rotations may occur on any day of the week; however, weekend rotations are kept to a minimum. Student access to facilities is regulated by contracts between the University and the agency. Students who do not meet an agency's requirements will be denied access to that facility. Students must comply with all university health, safety, and immunization requirements before they can be allowed to participate in clinical. The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation, or unemployment benefits. **Students cannot make their own clinical agency arrangements as University and agency legal contracts are required.**

### **Clinical/Practical Training for ADN/RN-MSN Students**

During their second semester, students will complete a minimum of two clinical units (90 hours) for the CGN 5904 Community Health Nursing Clinical Practicum. Working with their faculty advisor and a CGN-approved preceptor(s), the student will complete learning activities that demonstrate integration of the semester objectives and advance clinical competencies relating to community health nursing.

Introductory discussions will occur in the second semester to introduce the student to the outcome competencies for their specific concentration role (ANL, CNL, or Ambulatory Care). Preceptor, clinical agency, and clinical requirements will be identified in this semester to prepare the student for the CNL,

ANL, or Ambulatory clinical experience. Beginning in the summer semester of that same year, the student will begin the clinical experience. No student will be allowed to participate in any clinical experience without first having complied with all the University health, safety and immunization documentation requirements and obtaining the appropriate clearance from the college (for each site and each preceptor). Students who violate the CGN clinical clearance process will be sent to SPC and face possible dismissal.

The student is not considered an employee of the agencies involved and has no claim for any employee benefits such as sick leave, vacation pay, social security, retirement benefits, worker's compensation or unemployment benefits while completing clinical training. Students may not accrue clinical hours simultaneous to paid employment.

### **Student Injuries and Illnesses in the Clinical Setting for all Students**

If a student is injured or is exposed to potentially infectious (includes blood borne pathogens) or hazardous substances during a clinical rotation the student is required to notify the clinical instructor immediately and seek assessment and/or treatment per facility policy. Follow-up care should be continued at the contracted clinical facility as needed and ordered by the evaluating health care professional. Expenses incurred are to be submitted to the student's personal insurance as the primary coverage and to the university as the secondary insurance, for the reported incident only.

The Incident Report Form can be found on the university website and must be completed by the student and/or faculty and submitted electronically. There may also be a requirement to fill out a more detailed report within the student's program of study (please refer to specific program clinical handbook).

## Evaluation and Grading

Inquiry-based and competency-based assessments are the underlying principles for the instructional design of the CGN program and the evaluation of student achievement. To this end, each course has specific learning objectives, evaluative criteria, and expected outcomes. Assessment methods are stated in each course syllabus.

### MSN-E Grading Policy

A grade of C+ or higher is required in each course in the pre-licensure portion. Pre-licensure courses are courses numbered in the 6000s (CGN 6000 – CGN 6999). Minimum competency, as outlined in the course syllabi for each course, is required to achieve a passing grade of C+ or higher. Attainment of a grade below a C+ denotes unacceptable performance and is grounds for dismissal from the program.

Students are required by the College to maintain a 3.00 GPA or higher each semester of the MSN-E program in order to remain in good standing. If a student does not maintain an overall GPA of 3.0 or higher for each semester, the student will be referred to the Student Performance Committee for review and be placed on Academic Probation.

### Pre-Licensure Grading Scale

Final course grades for the pre-licensure RN portion of the MSN-E program are given based upon the traditional 4-point letter system, as follows:

<u>Grade</u>	<u>Equivalent</u>	<u>GPA Points</u>
A	94-100	4.00
A-	90-93	3.70
B+	87-89	3.30
B	83-86	3.00
B-	80-82	2.70
C+	77-79	2.30
U	Below 77	0.00
CR	Credit	N/A
NCR	No Credit	N/A

### ADMINISTRATIVE GRADES

<u>Grade</u>	<u>Equivalent</u>	<u>GPA Points</u>
AU	Audit	N/A
I	Incomplete	N/A
W	Withdrawal	N/A
M	Missing	N/A
TR	Transfer	N/A

### **Post-Licensure Grading Policy**

The cumulative grade of 80% (B-) or better is required to demonstrate an acceptable level of performance and enable the student to progress in the curriculum. Graded assignments for each course are included in the course syllabus. Students may be given the opportunity to remediate one learning component within a course to meet the cumulative letter grade requirement.

### ***Post-Licensure Grading Scale***

Final course grades for post-licensure classes are given based upon the traditional 4-point letter system, as follows:

<u>Grade</u>	<u>Equivalent</u>	<u>GPA Points</u>
A	94-100	4.00
A-	90-93	3.70
B+	87-89	3.30
B	83-86	3.00
B-	80-82	2.70
U	Below 80	0.00
CR	Credit	N/A
NCR	No Credit	N/A

### **ADMINISTRATIVE GRADES**

<u>Grade</u>	<u>Equivalent</u>	<u>GPA Points</u>
AU	Audit	N/A
I	Incomplete	N/A
IP	In Progress	N/A
W	Withdrawal	N/A
M	Missing	N/A
TR	Transfer	N/A

### ***Audit***

An "AU" (Audit) is assigned to a student who pays tuition for the course and attends class activities but does not complete examinations and does not receive course credit. However, under certain circumstances, at the discretion of the College Dean, a student who is repeating or undergoing remediation may be required to complete course examinations and/or other required work products while auditing the course for no grade.

### ***Missing Grades***

A grade of 'M' for Missing will be input by the Office of the Registrar if a student's grade is not available by the deadline for grade submission. An 'M' grade is not included in the GPA calculation and will be replaced by the grade earned in the course once submitted by the course director/instructor. 'M' grades should not be used by the program in place of an Incomplete (I) grade.

### ***Incomplete ('I') Grades***

Achievement of an "I" denotes an Incomplete, which signifies that a portion of the required coursework has not been completed and evaluated. Students must submit a plan for completion that meets approval by the faculty of record. Students who receive two incomplete grades in one semester will be placed on academic probation. Students who are enrolled in sequential theory courses will not be able to progress

in the curriculum unless the course is completed successfully prior to the next semester or instructor approval is given. The grade of Incomplete will be recorded on the official transcript and a final grade will be assigned upon completion of course work. If the student does not satisfactorily complete the contractual agreement within the period agreed to by the faculty of record, a grade of U will be given with recommendation for dismissal from the College of Graduate Nursing.

### ***Unsatisfactory ('U') Grades***

A grade of "U" denotes unacceptable performance. Students who do not meet the remediation standards for an Incomplete will be given the grade of "U." Students who receive a "U" for any course will be placed on probation and will be unable to progress in the curriculum without a formal review by the Student Performance Committee, who will then give their recommendation to the Dean.

### **Clinical, Practicum and RN Seminar Grading Policy**

GN 7570 (Clinical Experience), GN 7550 (RN Seminar), and GN 8999 (DNP Continuous Enrollment) are graded as credit/no-credit and are not included in the numerical values for computing grade point averages.

### ***Credit (CR) Grades***

Achievement of the grade "Credit" signifies that a student meets the acceptable level of performance in a graduate level course. Students cannot achieve credit for clinical hours if they fail the clinical site visit (whether virtual or on-site).

### ***No Credit (NCR) Grades***

Achievement of the grade "No Credit" indicates an unacceptable level of performance in a graduate level course. A grade of "No Credit" is the equivalent of a "U" grade. Students who receive an "NCR" grade for a clinical rotation may be dismissed from the program or may be required to repeat all hours obtained during that experience. If a student does not comply with the remediation contract, the student will be dismissed from the College.

### ***In Progress (IP) Grades***

A grade of "IP" denotes a grade that is in progress, which signifies acceptable continuation of coursework.

### ***Incomplete (I) Grades for clinical***

Achievement of the grade "incomplete" signifies that not all required clinical hours for the enrolled number of units have been completed. The grade of "I" will be recorded on the official transcript and a final grade assigned upon the satisfactory completion of all clinical hours.

### **Credit Hour Calculation**

Western University of Health Sciences defines one credit hour as 15 contact hours plus an average of 30 hours of out of class student work. Given that the pace of learning and studying is not identical for everyone, it is understood that actual time on task will vary from student to student.

This formula will be applied to instructional terms of any duration. An equivalent amount of time on task (i.e., contact time + out of class student work) per credit hour is required for non-classroom based academic activities such as laboratory or small group practica, asynchronous online or distance instruction, and other non-classroom modalities and delivery methods. To meet the requirements as set by the Board of Nursing, clinical credits will be equal to 45 hours for each unit of credit for the College of Graduate Nursing. Calculation of credit hours will be rounded to the nearest 0.5 credit hours per course.

### **Grade Appeals Process**

A student who believes that a grade for a course does not accurately reflect his/her performance in that course should first submit a written request for a grade appeal to the faculty of record. All grade appeals must be submitted in writing to the faculty member of record within ten (10) business days of when the grade was posted. The written request should include supporting documentation. The faculty member of record either will revise the grade or will retain it as originally assigned. If the grade remains unchanged, the student may appeal to the Student Performance Committee (SPC). The SPC will review the course syllabus and student work and either retain the grade as originally assigned or send the matter forward to the Dean (See SPC section of this Catalog for further informational). The Dean's decision is the final decision.

## **Student Participation in Student Governance**

The College of Graduate Nursing (CGN) promotes student governance and values student input to advance the mission and vision of CGN. The purpose of student governance is to provide for more informed decision-making involving student views and perspectives, to enhance the quality of the curriculums and promote high-level student learning outcomes. Student representatives from college programs will be recruited annually to serve on five CGN committees.

The CGN committees for student membership include Admission and Recruitment, Program Evaluation and Assessment, Educational Technology, Curriculum, and the CGN Advisory Board. Roles and responsibilities are outlined for student members below. Committees are structured in a manner that allows for maximum participation of all members. Attendance and participation are noted within committee minutes, which are available to all faculty and students. When feasible, committee meetings are conducted through other means, including virtual meetings, electronic balloting, and so forth.

Members of all committees will have the opportunity to submit agenda items. If members are not able to attend meetings, agenda items can be forwarded to the committee chair and minutes of meetings will be made available. Committee Chairs report monthly to all faculty at the Dean's Cabinet. Students are not required to attend the Dean's cabinet, but it is an open meeting for student committee members. The Cabinet meets the second Tuesday of the month from 10:00 am to 12:00 pm in the Nursing Science Center. No meetings are held in July.

### **Student Committee Members**

Student members that participate in student governance activities are those graduate students that are in good standing with CGN and represent the various programs and concentrations. At a minimum, the eligible members include representation from the MSN-E program (first- and second-year students), an MSN-HSL major, an MSN-FNP member, a Post MSN FNP Certificate student and a DNP student. Student cohorts can use various models to select committee members. These could be via consensus, election, or volunteer as desired by the student group.

The college recognizes that the committees are standing committees and contribute to ongoing work; therefore, students may be required to augment their knowledge that relates to the committee's work. Student members are recognized as full members of the committee and therefore, have voice and vote in the decision-making process.

### **Policy**

Students are introduced to the role of student governance during CGN's Welcome Week. Prior to end of the first fall semester, students are identified for the committees. The term of student governance runs through the end of the fall semester in the next academic year, thus allowing the student to serve approximately 12 months. Students in two or three-year programs may serve two years.

The Associate Dean shall convene a meeting of all student governance members annually and such meeting shall be held in conjunction with the second seminar weekend of the summer semester. The purpose of this meeting is to debrief and share key experiences from each of the five committees. Recommendations for enhancing student participation and program improvements will be obtained and summarized for incoming student governance/committee members.

Annually a staff member is assigned to facilitate student attendance for all meetings. The Associate Dean for the College will clarify processes for student governance and be a resource for student questions or concerns.

## **Standing Committees**

### ***Admissions and Recruitment Committee***

The Admissions and Recruitment Committee (ARC) is responsible for managing the website, admissions, and the recruitment process. The committee works with personnel in the Western University Office of Student Affairs to coordinate preparation and dissemination of admission and recruitment materials to prospective students. At the close of each admissions cycle, members of the ARC and University admission and recruitment review strategic goals, outcomes of goals, and consider recommendations for change that will enhance preparation and quality of applicants to the College.

The Chair of the ARC is the Director of Student Services and includes faculty, staff, students, and university personnel. Faculty may be appointed by the Dean and will serve 3-year terms. The committee meets monthly. Students are valuable stakeholders to assist CGN to meet recruitment goals.

### ***Curriculum Committee***

The Curriculum Committee is charged with conducting ongoing evaluation of the CGN curriculums (course descriptions, learning objectives, and outcome expectations of each course) every two years. The committee monitors redundancy in the curriculum and seeks out means to enhance preparation of graduates to meet outcome competencies of the College. The committee recommends approval or modifications of the curriculum to the Dean and the Faculty, as deemed necessary for improvement of curriculum and instruction. Areas of responsibility include:

- Sequencing
- Competencies
- Appropriateness of hours (credit hour)
- Completeness of subject matter
- Periodic curricular mapping of educational and professional role standards of curriculums
- Coordination of workload per semester (course deliverables)
- Establishing consistency in educational delivery (use of technology, rubrics, templates, social presence, credit hours, etc.)

The Curriculum Committee consists of Faculty members that represent both pre-licensure and post licensure programs who serve 3-year terms. Students may serve for 1-2 years. Due to the complexity of multiple programs, sub-committees may be convened to address new educational standards in a program, or the curriculum committee may be called upon to assist with needed curricular changes. A resource librarian is recommended to be a member of this committee to assist with literature reviews. Students from all programs will serve on this committee. The committee meets monthly.

### ***Program Evaluation and Assessment Committee***

The Program Evaluation and Assessment Committee (PEAC) shall monitor and evaluate the effectiveness of the curriculum (student outcomes), programs and faculty performance. The committee will also monitor the effectiveness of the learning environment (administrative support, seminar weekend, Bb platform) to assure the delivery of curriculum is meeting the needs of students. The Assessment Calendar is designed to assure all evaluation data is captured and analyzed to inform CQI. The committee members

will maintain currency in educational requirements/standards (WASC, AACN, NONPF, BRN) to assure assessments and outcomes reflect appropriate outcomes. The Evaluation Committee will include a minimum of five faculty members MSN program as well as the DNP program. Student members will represent all programs. The Chair of the Committee is the Director of Assessment for the College who will report findings at full faculty meetings three times a year to coincide with the academic calendar of three semesters. The committee shall determine the length of service terms for committee members such that there is gradual replacement of the committee over time.

### ***Education and Technology Committee***

The charge of the Committee is to identify new technologies and educational resources to enhance and improve student learning for all programs. Recommendations that can result in large-scale change will require faculty and student input and approval. New advances in educational technology will not drive the curriculum but rather be incorporated to improve learning outcomes. Membership in this Committee will include the instructional designer (ID), a representative from Informational Technology (IT), the Director of Assessment, and a minimum of four faculty members. Students from all programs will be voting members and will represent the student's voice. The ETC committee will meet minimally once a month.

### ***The CGN Advisory Board***

The CGN advisory board meets three times a year. The committee serves as an advisory body to the Dean. Members serve a minimum of two years and represent employers, community partners, university representatives, students, alumni, and donors. Student members will represent all programs. Meetings are held in October, February, and April. This valuable advisory body provides feedback regarding program effectiveness, changes in the context of healthcare, and educational relevancy for CGN programs to be leaders for the profession of nursing.

### **Schedule for the Academic Year**

August - Welcome Week Information shared with incoming students. Job duties, committees, and an application are stored in the CGN student center. Graduate students who are available for Welcome Week will meet with incoming students to encourage student governance and share their experience.

August – September - Students complete and submit applications to the Associate Dean no later than October 1, annually. Students will be selected and invited to the first meeting in the Spring Semester. Student members and term of service will be shared with all students at the end of the fall semester.

January - First week of spring semester. Dates, times and locations for the 5 committees provided to all student members.

May – First week of summer semester distribute dates, times, and locations for the five committees for the summer semester.

July – Saturday seminar weekend – Hosted lunch for all student members to provide feedback to the Deans and Directors. Students will report on their experience as a committee member as well as the practice experience as a student. Students who are graduating or completing their term will be provided with a service certificate.

Members who are continuing to serve on the committees (two-year term) can assist with mentoring of new student committee members and continue as committee members in the fall semester.

### **Student Roles and Responsibilities**

**Purpose** – to be actively engaged in shared governance to provide CGN faculty and staff with insight to the student experience, provide voice to student decision making, and enhance program evaluation. CGN values student input to assure teaching and learning is student centered and designed to meet program outcomes.

**Responsibilities** – Students attend committee meetings, come prepared for meetings, and serve as the representative to each student cohort. Cohort representatives will communicate with their cohort to generate ideas, agenda items, or other constructive feedback to share with faculty and staff at committee meetings. Time commitments will vary due to the charge of the committee. In most cases, this will require a two-hour meeting a month.

### **Other Venues of Communication**

Program directors provide a venue for face-to-face communication with students that may be formal or informal. The MSN-E Director meets two to three times a semester with students and the DNP Director meets with students at each seminar weekend. MSN faculty provides on-going communication via e-mail, skype, or by appointment or face-to-face meetings at seminar weekends. The Dean provides an open-door policy to meet with students.

Student satisfaction surveys are circulated to students at the end of each semester, at the end of year one, and at the end of the program. Each spring all distance students provide an evaluation of seminar weekend. Ongoing data is collected and analyzed on a regular basis. Plans for improvement are guided by program review to further continuous improvement.

## Curriculum Organization

### Pre-Program

Students entering the following programs are required to complete GN 5000, Communications, prior to the start of their first fall term:

- Master of Science in Nursing (ADN/RN-MSN)
- Master of Science in Nursing (BSN/RN-MSN)
- Master of Science in Nursing/Family Nurse Practitioner (MSNFNP)
- Post-Master’s Family Nurse Practitioner (FNP)
- Post-Master’s Emergency Nurse Practitioner (ENP)
- Doctor of Nursing Practice (DNP)

Students entering the Post-Master’s Family Nurse Practitioner program, Post-Master’s Emergency Nurse Practitioner or the DNP program upon graduation from WesternU are exempt from the pre-program requirement. The GN 5000 course cannot be covered by Financial Aid funds; therefore, the cost of the course must be paid out-of-pocket.

### Extended Curriculums

Extended versions of the programs offered by the College of Graduate Nursing may be available. For additional information, please contact the Assistant Dean of Student Affairs in the College of Graduate Nursing directly at 909-469-5255.

### Nursing Curriculum for 30 Unit Option (LVN Applicants Only)

First Year, Spring Semester		
Clinical Fee Assessed for Term?		Yes

<b>Semester Total:</b>		<b>14.00 – 16.00</b>
<b>Total Program Units:</b>		<b>44.00 – 48.00</b>

\*Course(s) not charged tuition. \*\*Students who extend the FNP year will be required to register for additional units of Clinical Comprehensive Evaluation at the end of each additional year.

For students who graduated with their MSN from WesternU before entering the Post-Masters FNP, there may be courses waived due to duplication between the programs. For those students an individualized curriculum grid will be created and given to the student.

**Post-Graduate Emergency Nurse Practitioner Certificate**

<b>First Year, Fall Semester</b>		
<b>Clinical Fee Assessed for Term?</b>		<b>Yes</b>
<b>Course</b>	<b>Title</b>	<b>Credit Hours</b>
GN 5410	Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician I	6.00
<i>Clinical Experience Practicum (90 hours)</i>		
<b>Semester Total:</b>		<b>6.00</b>
<b>First Year, Spring Semester</b>		
<b>Clinical Fee Assessed for Term?</b>		<b>Yes</b>
<b>Course</b>	<b>Title</b>	<b>Credit Hours</b>
GN 5420	Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician II	6.00
<i>Clinical Experience Practicum (180 hours)</i>		
<b>Semester Total:</b>		<b>6.00</b>

## Doctor of Nursing Practice (DNP)

First Year, Fall Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 5306	Biostatistics and Epidemiology	3.00
GN 8030*	Clinical Scholarship, Research, and Evidence-Based Practice	3.00
<b>Semester Total:</b>		<b>6.00</b>
First Year, Spring Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 8010*	Philosophy and Science for Nursing Practice	3.00
GN 8070*	Population Based Prevention in Vulnerable Populations	3.00
<b>Semester Total:</b>		<b>6.00</b>
First Year, Summer Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 8020*	Quality and Leadership in 21 <sup>st</sup> Century Health Care System	3.00
GN 8080*	Care Delivery Improvement: Models and Strategies	3.00
<b>Semester Total:</b>		<b>6.00</b>
Second Year, Fall Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 8040*	Transformational Information Systems for Health Care	3.00
GN 8060*	Outcome Based Collaboration and Collaborative Models	3.00
<b>Semester Total:</b>		<b>6.00</b>
Second Year, Spring Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 8050*	Social Justice, Health Care Advocacy, and Policy in Nursing Practice	3.00
GN 8090*	Practice Immersion Project	3.00
GN 8001	The Scholarship of Teaching Nursing**	3.00
<b>Semester Total:</b>		<b>6.00 – 9.00</b>
Second Year, Summer Semester		
Clinical Fee Assessed for Term?		Yes
Course	Title	Credit Hours
GN 8090*	Practice Immersion Project	3.00
GN 8002	Advanced Scholarship and Leading Change in Nursing Education**	3.00
<b>Semester Total:</b>		<b>3.00 – 6.00</b>
<b>Total Program Units:</b>		<b>33.00 – 39.00</b>
Continuous Enrollment (ABD Students)		
Clinical Fee Assessed for Term?		No
Course	Title	Credit Hours
GN 8999	Continuous Enrollment/Dissertation***	3.00

\*Course triggers clinical practice fee for semester. \*\*Required for NFLP recipients, elective for non-NFLP recipients. \*\*\* Students are required to register every term after completion of coursework until DNP Project is complete. A continuous registration fee of \$750.00 is assessed per term.

## Course Descriptions

### **GN 5000 Communication and Information Management (1.0 credit hour)**

This introductory course provides new College of Graduate Nursing advanced practice nursing students with a comprehensive introduction to WesternU's distance learning programs. In addition to learning about Western University of Health Sciences and the College of Graduate Nursing, students will complete a series of assignments designed to prepare them for the technical and academic policy requirements of the College of Graduate Nursing. Emphasis will be placed on necessary computer skills and proficient use of the software required for use in the curriculum, and the academic writing skills necessary for successful completion of the program.

### **GN 5103 Advanced Health Systems (3.0 credit hours)**

This course will focus on developing health policy as well as health care systems safety and quality competencies needed by today's advanced practice nurses to lead improvement at microsystem, mesosystem, and macrosystem levels. National reports and health policy drive changes in health care as the system transforms to become more accountable and transparent to its stakeholders. Nursing leadership in patient safety, quality management, interprofessional practice, and health policy will be explored as avenues for improving population health, disease management, and care delivery.

### **GN 5170 Introduction to the Theory and Science of Nursing (3.0 credit hours)**

This bridge course introduces the student to the theoretical frameworks and research that inform and shape nursing knowledge and practice. Content includes the evolution of knowledge development; multiple ways of knowing; structural components of theory; contributions of theoretical knowledge in evidence-based nursing practice; research methodologies; the use of research evidence to inform practice; and analysis and critique of published research.

### **GN 5200 Nursing Theory (3.0 credit hours)**

This course explores the theoretical context of contemporary nursing practice, which serve to guide nursing practice, and primary health care that optimizes health and self-care in families. In addition, this course will integrate knowledge from the physical, biological, and behavioral sciences to apply, systematically and critically, selected conceptual frameworks to the development of nursing, family systems, and the response to illness. It is expected that the graduate nursing student will develop an appreciation of the process of theory development in nursing, compare and contrast various theoretical perspectives, and apply nursing theories critically.

### **GN 5304 Nursing Research I (2.0 credit hours)**

Provides a foundation for evidence-based practice by critiquing individual research studies using quantitative, qualitative, or mixed methods research design. Ethical principles in research are studied with a requirement to obtain certification in Human Subjects Protection from the National Institutes of Health. The relationship of research, theory, and practice are emphasized.

### **GN 5305 Nursing Research II (2.0 credit hours)**

Supports the science of nursing with the provision and delivery of high-quality patient care based on the best available evidence. This course engages graduate nursing students in the formal process of appraising scholarly literature including research studies to make practice decisions. Students initiate the evidence-based practice process with development of search strategies and practice questions. Synthesis of various forms of literature ensues to formulate answers to practice questions. Prerequisite: CGN 5304.

**GN 5306 Biostatistics and Epidemiology (3.0 credit hours)**

This course focuses on the interpretation and use of biostatistics for graduate nursing practice including basic epidemiological concepts, quantitative methodology for evidence-based practice, and statistical utility for decision-making. The student is introduced to statistical analysis software; the process of instrument development, validity and reliability assessment, and pilot testing; decision theory; and the critical analysis and evaluation of the methods, results, and discussion sections of a research report.

**GN 5401 Primary Care Management I: Common and Acute Conditions (2.0 credit hours)**

This first course in Primary Care Management will help students integrate basic knowledge of human anatomy and physiology with an understanding of the pathologic changes and clinical manifestations that characterize common and acute disorders in adult, obstetric, pediatric, and geriatric clients. Students will apply new understanding of pathophysiology and evolving clinical decision-making skills to the interpretation of assessment data and the diagnosis and treatment of primary care clients and their families across the life cycle.

**GN 5402 Primary Care Management II: Chronic and Complex Conditions (2.0 credit hours)**

This second course in Primary Care Management continues to help students integrate their basic knowledge of human anatomy and physiology with an understanding of the pathological changes and clinical manifestations that characterize common, chronic, and complex disorders in pediatric, adult, obstetric, and geriatric clients. Students will apply their new understanding of pathophysiology and their evolving clinical decision-making skills to the interpretation of assessment data and the diagnosis and treatment of primary care clients and their families across the life cycle. Prerequisite: CGN 5401.

**GN 5403 Primary Care Management III: Application to Special Populations (2.0 credit hours)**

This third course in Primary Care Management enhances the student's ability to integrate a basic knowledge of human anatomy and physiology with an understanding of the pathologic changes and clinical manifestations that characterize common, acute, chronic, and complex disorders in pediatric, obstetric, and geriatric clients. Students will apply their understanding of pathophysiology and their evolving clinical decision-making skills to the interpretation of assessment data and the diagnosis and treatment of primary care clients and their families across the life cycle within the special populations of pediatrics, obstetrics, and geriatrics. Prerequisite: CGN 5401 and CGN 5402.

**GN 5410 Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician I (6.0 credit hours)**

Advanced emergency nursing embodies autonomous and collaborative practice with other health professionals to diagnose, treat, and manage acute conditions, exacerbation of chronic conditions, and urgent, minor illness, or emergent conditions across the lifespan. Evidenced-based approaches are utilized to develop critical thinking and to plan care for individuals and families that seek care in high acuity settings. Includes exploration of ethical, cultural, legal, and regulatory frameworks that affect patient care. Students will develop and refine the clinical skills needed to meet the competencies in the advanced nursing role through practice experience

**GN 5420 Advanced Emergency Care Concepts for the Emergency Nurse Practitioner Clinician II (6.0 credit hours)**

Student utilizes evidenced-based approaches to develop critical thinking, assess, plan, and provide care for individuals across the lifespan and families in high-acuity settings. Includes exploration of trauma, intra-hospital, and inter-hospital transport. Students will develop and refine the clinical skills needed to meet the competencies in the advanced nursing role through practice experience.

**GN 5501 Advanced Pharmacology I: Common Conditions and Acute Conditions (2.0 credit hours)**

This is the first of two pharmacology courses that will focus on the pharmacotherapy of health care problems covered in the Primary Care Management series. In CGN 5401, students learned the pathophysiological basis of acute and common health care problems of patients seen in the primary care setting. In this course, students will continue to develop their primary care clinical management skills by learning and incorporating the pharmacotherapy of acute and common health care problems into the care of patients seen in this setting.

**GN 5502 Advanced Pharmacology II: Chronic Conditions and Complex Conditions (2.0 credit hours)**

This is the second of two pharmacology courses that will focus on the pharmacotherapy of health care problems covered in the Primary Care Management series. In CGN 5402 and CGN 5403, students learn the pathophysiological basis of chronic and complex health care problems of patients seen in the primary care setting. In Advanced Pharmacology II, students will continue to develop primary care clinical management skills by learning and incorporating the pharmacotherapy of chronic and complex health care problems into the care of patients seen in this setting. Prerequisite: CGN 5501.

**GN 5505 Pharmacotherapeutics and Technology for Advanced Practice Nurses (3.0 credit hours)**

This advanced pharmacology course will provide students with an in-depth knowledge of pharmacological management of patients with complex conditions and illnesses. Emphasis will be given on assuring safe, efficacious, and ethical delivery of pharmacotherapeutics. Students will explore health systems applications for using new and emerging technologies designed to reduce medical error and enhance the effectiveness of pharmacotherapeutics.

**GN 5601 Advanced Physical Assessment (3.0 credit hours)**

This course examines the role of the Family Nurse Practitioner as a clinical decision maker in a sociocultural context. To help students transition to this advanced practice role, the course introduces skills that build on undergraduate education and experience with respect to basic physical assessment. These advanced skills, which draw on knowledge from nursing, medicine, and other disciplines, include recognition and interpretation of clinical assessment data, diagnostic reasoning and treatment decision-making, and medical record keeping. Over the course of the program, students will be expected to integrate these skills with knowledge of common, acute, chronic, and complex illnesses in order to assess and manage patients across the life cycle.

**GN 5602 Health Promotion and Disease Prevention (1.0 credit hour)**

This course is designed to transition the Family Nurse Practitioner student from building physical assessment skills to an application of preventive health concepts and health promotion across the life span, using the Health People 2010 guidelines as a resource. Students will learn how to apply health promotion lifestyle changes, disease prevention concepts, and genetics screening options in the primary care patient population. Clinical preventive services and health promotion concepts that will be examined include health screening, counseling, immunization, chemoprevention in pediatric and adult clients, genetic risk identification and evidence-based medicine practice applications. Methods for counseling clients in lifestyle behaviors such as nutrition, physical activity, smoking cessation, and violence prevention will also be explored.

**GN 5603 Societal and Ethical Issues (1.0 credit hour)**

This course focuses on the social and ethical issues that often arise when providing primary health care to clients over the life span. The interdependence of these social and clinical issues mandate that the health care provider become aware of the relevant legal, ethical, and medical implications of physical and sexual child abuse, domestic violence, elder abuse, underage pregnancy, substance abuse, and elder clients at risk for polypharmacy, dementia, depression, and/or homelessness. It is expected that the student will critically reflect on and analyze the ethical challenges and societal factors that influence the provider-patient relationship.

**GN 5605 Advanced Human Diversity (1.0 credit hour)**

In this role development course, students will examine the skills used to be culturally competent and sensitive to human diversity. The graduate nursing student will begin by gaining an understanding of the principles of delivering culturally sensitive care. The course requires that students open their minds, examine their own cultural and humanistic beliefs and values, and explore the impact of those beliefs and values on clinical practice as a health care professional. Students will also explore strategies for successful patient-provider relationships when the patients' culture, race/ethnicity, prejudice, and lifestyle beliefs conflict with the health models used in medicine and nursing science.

**GN 5606 Complementary and Alternative Therapies (1.0 credit hour)**

This course focuses on the practices of alternative or complementary therapy utilized by the consumers of health care in this country. Among the complementary therapies students will consider in this course are acupuncture, yoga, biofeedback, chiropractic, dietary supplements, exercise, herbs, homeopathy, hypnosis, imagery, massage, relaxation, meditation, spiritual healing, symbols and rituals, folk medicine and energy work.

**GN 5620 Advanced Health and Population Assessment (3.0 credit hours)**

This course will address advanced health assessment for both individual and communities of clients. The focus will include concepts of population-based assessments for high-risk patients in both acute care and community-based settings. Students will build on their graduate knowledge of health assessment and utilize diagnostic reasoning and evidence-based research to enhance client outcomes. Emphasis will include risk assessment, health promotion, illness prevention and protection and to promote improved management of high acuity clients or populations of clients in multiple health settings.

**GN 5631 Advanced Pathophysiology I (1.0 credit hour)**

This first course in a three-part series builds on basic pathophysiology principles and explores the principles of normal body functions and pathophysiological changes that occur because of disease, lifestyle, and homeostatic changes in the body. Altered pathophysiological health is explored at the genetic, cellular and organ system level. Epidemiology, pathophysiological processes, and related system interaction are examined. Disease processes across the life span are explored and case studies are used to demonstrate the clinical assessment approach for the advanced practice student. This first course focuses on common and acute pathophysiological processes.

**GN 5632 Advanced Pathophysiology II (1.0 credit hour)**

This course is the second in the series of pathophysiology principles and explores the principles of normal body functions and pathophysiological changes that occur because of disease, lifestyle, and homeostatic changes in the body across the lifespan. Disease processes across the life span are explored and case studies are used to demonstrate the clinical assessment approach for the advanced practice student. This second course focuses on chronic and complex pathophysiological processes. Prerequisite: CGN 5631.

**GN 5633 Advanced Pathophysiology III (1.0 credit hour)**

This course is the third in the series of pathophysiological principles and explores the principles of normal body functions and pathophysiological changes that occur because of disease, lifestyle, and homeostatic changes in the body across the lifespan. This third course enhances the student's ability to integrate a basic knowledge of pathologic changes and clinical manifestations that characterize common, acute, chronic, and complex disorders in pediatric, obstetric, and geriatric clients. Students will apply their understanding of pathophysiology and their evolving integration across the life cycle within the special populations of pediatrics, obstetrics, and geriatrics. Prerequisite: CGN 5631 and CGN 5632.

**GN 5641 Clinical Applications I: Clinical Reasoning & Diagnostics (2.0 credit hours)**

This course is designed to enhance the student nurse practitioner's physical assessment, diagnostic reasoning, and diagnostic procedure interpretation skills. Building on the practitioner's knowledge and skills to identify and distinguish normal from abnormal findings, basic health assessment often moves from a general survey of a body system to specific observations or tests of function.

The student nurse practitioner will learn how to apply this new level of understanding to build on basic health appraisal using clinical cases including common, acute, chronic, and complex health conditions. Through these cases, students will learn to gather further evidence and analyze this evidence to arrive at a hypothesis that will lead to a further narrowing of differential diagnoses in order to manage patients across the life cycle. Clinical diagnostics will be incorporated into the assessment process and these will include laboratory diagnostics, radiology diagnostics and cardiovascular monitoring and diagnostics. Students will also refine documentation and medical record-keeping skills. The skills gained in this course will provide the foundations of diagnostic reasoning that will guide students through other courses throughout the program including Primary Care Management, Pharmacology, and Clinical Experience.

**GN 5642 Clinical Applications II (2.0 credit hours)**

In this second course in the Clinical Applications series, students will continue to learn diagnostic and therapeutic procedures and skills critical to the advanced practice nurse. The area of focus in this course is Women's Health diagnostics and therapeutics across the lifespan. These procedures and skills include: the clinical breast examination and practicum; gynecologic procedures and diagnostics [e.g. endometrial biopsies, inserting/removing IUDs, and cervical cancer diagnostics & therapeutics; sexually transmitted infection diagnostics; infertility diagnostics and therapeutics; contraceptive technology; obstetric surveillance and diagnostics (e.g. obstetric ultrasonography, stress tests, Triple Marker testing, etc.)]. Prerequisite: CGN 5641.

**GN 5643 Clinical Applications III (2.0 credit hours)**

In this third course in the Clinical Applications series, students will continue to learn diagnostic and therapeutic procedures and skills critical to the advanced practice nurse. The area of focus in this course is pediatric, adult, and geriatric health diagnostics and therapeutics across the lifespan. These procedures and skills include microscopy; office orthopedic appliances and treatment techniques; dermatologic diagnostic/therapeutic procedures; local anesthesia use and suturing techniques; eyes, ears, nose and throat diagnostic/therapeutic procedures; gastrointestinal examination techniques and therapies; and techniques for clinical emergencies and other urgent conditions. Prerequisite: CGN 5641 and CGN 5642.

**GN 5690/5691/5692 – Clinical Comprehensive Evaluation I, II, or III (1.0 credit hour each)**

These courses provide an opportunity for students to synthesize concepts, skills, and techniques from previous courses and apply their learning toward assessing and managing case studies across the life span. The student will participate in various methodologies for assessing their application of knowledge learned. To assess clinical performance and knowledge, students will engage in observed structured clinical examinations (OSCE), with the assistance of standardized patients with common, acute, chronic or complex conditions (depending on the students year in the program and level of experience); create written clinical case management evaluations (“Day in the Clinic”) of common, acute, chronic or complex conditions; and complete certification review by taking initial or final evaluation assessment. The certification review provides prospective graduates with an opportunity to validate the knowledge they have acquired throughout the program and assess their readiness for the national certification exam. Students are required to be registered for Clinical Comps in the summer semester of each year in the program.

**GN 5702 Management Principles and Leadership Theories (3.0 credit hours)**

The complexity of healthcare today requires nurses to utilize management principles and leadership theory. The course examines the context of clinical leadership today, the major principles and attributes of a successful nursing leader/manager, key functions of management, and specific activities to influence running the health system smoothly. Finally, the course looks at the role of the nurse leader and the complexity of change within the organization.

**GN 5703 Introductory Nursing Informatics (3.0 credit hours)**

This course explores the nursing specialty of Nursing Informatics and its value and impact on nursing practice, research, and education. It focuses on the use of computers and technology to access and manage information related to nursing practice, telehealth, and clinical management. It examines technology’s role in evidence-based practice, nursing education and health care applications of information technology. Topics will also include health care applications, ethical and legal issues, and challenges related to the use of Informatics.

**GN 5704 Accounting and Finance (3.0 credit hours)**

This course introduces financial concepts, financial management, and accounting methods applied within the context of contemporary integrated health systems. Analysis of cost, quality, and outcomes as factors in delivery of health care will be explored.

**GN 5710 Advanced Nurse Leaders as Educators (3.0 credit hours)**

This course introduces the graduate student to the core knowledge and understanding of patient and nursing education, as well as strategies for creating and sustaining learning organizations. Transformative and experiential learning theories will be used to analyze and develop learning activities in both practice and academic settings. Standards and regulations will be explored for education within health care systems and academia.

**GN 5810 Management Practice Issues (2.0 credit hours)**

This course presents a variety of role-related topics designed to prepare the prospective Nurse Practitioner for management practice. Additionally, this course will help prepare the student for the CGN 5900 Collaborative Project in the next semester and the CGN 5990 Culminating Project in the last semester. The course will explore fundamental business principles related to management and leadership theory, effective decision making, project management, business planning, financial risk assessment and management, creating and using financial information, grant writing, business ethics, employee relations and supervision management, and marketing and sales.

**GN 5811 Leadership and Professional Role Transition (3.0 credit hours)**

This course examines leadership practices in the context of complex, highly regulated, and constantly changing healthcare environments. Emphasis is placed on leading patient safety and quality efforts. Leadership and management theories, principles, and evidence-based practices are examined, drawing from a variety of resources that include research, professional standards, expert wisdom, and the student's own experience. In addition, strategies to begin the process of transitioning from an undergraduate-prepared nurse to one with an advanced degree will be explored. Content will focus on tools for scholarly success, mentorship, group dynamics, historical influences, patterns of knowing in nursing, and an exploration of various advanced nursing practice roles.

**GN 5820 Professional Practice Issues (2.0 credit hours)**

This course presents a variety of role-related topics designed to prepare the prospective Nurse Practitioner for professional practice. Beginning with a historical overview of the NP profession, the course will examine some of the critical issues that determine the practitioner's scope of practice, career options, peer review, protocols and standardized procedures, practice profiling, leadership and political involvement. In addition, the course presents guidelines for resolving professional legal and ethical issues that are often confronted by the NP. Students will also be introduced to valuable tools for ongoing professional development such as professional organizations and journals.

**GN 5830 Business Practice Issues (2.0 credit hours)**

This course presents a variety of role-related topics designed to prepare the prospective Nurse Practitioner for business practice. The business practice concepts explored will prepare the nurse practitioner graduate to enter the business of health care with the tools needed to be successful. The areas of focus will include: reimbursement (Medicare, Medicaid, indemnity insurance, fee for service, managed care organizations and business contracts for special services); billing and coding; evaluation and management codes; state regulations; federal regulations; office laboratory evaluations under CLIA; malpractice; employment law; facility access to disabled persons; HIPAA; credentialing and privileging; entrepreneurial issues and strategies; business ethics; and business management and fundamentals.

**GN 5840 Management and Business Practice Issues (2.0 credit hours)**

This course presents a variety of role-related topics designed to prepare the prospective Nurse Practitioner for business and management practice. The course will explore fundamental business principles related to management and leadership theory, effective decision making, project management, business planning, financial risk assessment and management, creating and using financial information, grant writing, business ethics, employee relations and supervision management, and marketing and sales. The business practice concepts explored will prepare the nurse practitioner graduate to enter the business of health care with the tools needed to be successful. The areas of focus will include: reimbursement (Medicare, Medicaid, indemnity insurance, fee for service, managed care organizations and business contracts for special services); billing and coding; evaluation and management codes; state regulations; federal regulations; office laboratory evaluations under CLIA; malpractice; employment law; facility access to disabled persons; HIPAA; credentialing and privileging; entrepreneurial issues and strategies; business ethics; and business management and fundamentals.

**GN 5890 Care Coordination (2.0 credit hours)**

This course prepares health professionals to integrate care coordination into practice throughout the continuum of care. Students will be able to coordinate the delivery of care within a practice environment and across diverse health care settings. This course aligns the scope and standards of practice for health care professionals with care coordination.

**GN 5900 Collaborative Project (2.0 credit hours)**

The CGN 5900 collaborative exercise is based on a health care project. The graduate student learns to approach, evaluate, and design an intervention for a community health care project with the assistance of colleagues in a group effort. The skills learned in this collaborative project will help prepare the student in developing the independent culminating project for the CGN 5990 course.

**GN 5903 Community Health Nursing for the ADN (2.0 credit hours)**

This course is an online version of CGN 6901, developed for the ADN/RN student that focuses on the nursing care and health promotion of individuals, families, groups, and communities. The health of the community and subgroups within the community are the focus of this course. Students will apply nursing and public health concepts to promote health, prevent disease, and restore the health of population groups.

**GN 5904 Clinical Practicum: Community Health Nursing for the ADN (2.0 credit hours)**

This course, for ADN/RN students, will be a clinical practice to develop critical thinking, psychomotor and communication skills in the care and health promotion of individuals, families and groups. The roles of communicator, caregiver, teacher, advocate, and manager of care are emphasized.

**GN 5990 APN Master's Project (3.0 credit hours)**

The APN Master's Project provides the Advanced Practice Nurse prospective graduate with a final opportunity to demonstrate his or her ability to integrate and apply concepts learned throughout the master's program in the practice setting. The culminating course requires the student to develop a health care improvement project, which is broad in scope and has implications for community or practice settings. The project should offer insight into the unique contributions nurse practitioners make for a specified population(s). Prerequisites: All program courses. CGN 5990 must be taken at the end of the program.

**GN 5995 Special Topics in Health Systems Leadership (1.0 – 4.0 credit hours)**

Students may select this option to participate in an in-depth study of a new leadership topic developed and approved by the Health Systems Leadership faculty. The application for this course must be submitted and approved by the program director by the registration deadline for the course. Clinical/Practice hours may be embedded in the course

**GN 5999 Master's Project (3.0 credit hours)**

This course requires integration of the AACN's Master of Nursing Essentials in the form of a proposed study, business plan, or change project to improve patient care, patient outcomes, or work design. Prerequisites: All program courses. CGN 5999 must be taken at the end of the program.

**GN 6115 Pathophysiology (3.0 credit hours)**

Pathophysiology is an introductory course which focuses on alterations and disruption of physiologic functions across the lifespan. A systems approach based on differentiation of pathophysiologic findings is essential to understanding and identification of major disease processes. Applicable to students entering in fall 2019 and beyond.

**GN 6145 Pharmacology I (2.0 credit hours)**

Theoretical concepts essential to the provision of safe and effective administration of pharmacotherapeutic agents are the focus of this course. Treatment of illness, health promotion, and wellness maintenance to individuals throughout the lifespan are addressed. Principles of pharmacology including drug actions, cultural, genetics, developmental consideration, and medication administration are explored. Applicable to students entering in fall 2019 and beyond.

**GN 6155 Pharmacology II (2.0 credit hours)**

Building on the concepts of Pharmacology I with a focus on the application of fundamental principles for safe and effective care is the focus of this course. Pharmacotherapeutic agents used in the treatment of illness, health promotion, and wellness maintenance to individuals throughout the lifespan are explored. Applicable to students entering in fall 2019 and beyond.

**GN 6160 Introduction to Research (2.0 credit hours)**

This course focuses on the process of research and its role within the profession of nursing. Students will explore research methodology, use of evidenced based medicine and analysis and critique of published research. Applicable to students entering in fall 2018 and prior.

**GN 6165: Evidence Based Practice and Theory (3 credit hours)**

The theoretical frameworks and processes of evidence-based practice, research, quality improvement, and clinical guidelines that inform nursing knowledge and practice are examined. The evolution of knowledge development, multiple ways of knowing, structural components of theory within the nursing profession and other disciplines are explored. Students develop a spirit of inquiry, ask relevant clinical questions, search, collect, and understand best evidence.

**GN 6170 Utilization of Evidence in Healthcare (2.0 credit hours)**

Students examine and critique the components of quantitative, qualitative and mixed methods research including the research question, literature review, theoretical framework, methodology, data analysis, and interpretation of findings for application to nursing practice. Students are introduced to descriptive and inferential statistical measures, the process of instrument development, validity and reliability assessment, pilot testing, and decision theory. In addition, students interpret and choose relevant evidence for decision making in clinical situations. Applicable to students entering in fall 2019 and beyond.

**GN 6201 Health Assessment (2.0 credit hours)**

Theoretical concepts of physical assessment, health history, cultural, genetics, psychosocial and nutritional assessment for individuals across the lifespan are explored in this course. Applicable to students entering in fall 2019 and beyond.

**GN 6202 Clinical Practicum: Health Assessment (1.0 credit hour)**

Application of theoretical concepts related to comprehensive health assessment of patients across the lifespan will be the focus of this course. Emphasis includes the analysis and utilization of comprehensive health assessment data including the bio-psycho-social, developmental, and environmental needs of patients and families as related to the role of the nurse. Applicable to students entering in fall 2019 and beyond.

**GN 6410 Nursing Fundamentals (3.0 credit hours)**

Foundational nursing concepts, competencies and techniques are introduced in this course. Students will develop critical thinking abilities utilizing the nursing process in the roles of communicator and caregiver, and educator. Students learn principles of professional nursing practice. Students will develop selected fundamental competencies including, but not limited to, therapeutic communication, maintaining a safe and hygienic environment, assessing vital signs, medical asepsis and infection control, principles of body mechanics and mobility, basic gastrointestinal and urinary care, oxygen therapy and airway management, calculation of drug doses and medication administration. Applicable to students entering in fall 2019 and beyond.

**GN 6411 Clinical Practicum: Nursing Fundamentals (2.0 credit hours)**

Students will apply theory, critical thinking, and the nursing process to gain mastery of selected fundamental competencies through practice in the simulation lab. Clinical experiences in selected acute care facilities will provide opportunities to utilize said nursing process, critical thinking and reflection as nursing care is delivered to adults and older adults. Applicable to students entering in fall 2019 and beyond.

**GN 6501 Nursing of Adults and Older Adults I (4.0 credit hours)**

Application of the nursing process in caring for adults and older adults is the emphasis for learning. Acute and chronic health conditions are the foci. Emphasis is placed on the delivery of safe, patient-centered, team-based care integrating knowledge of pathophysiological processes, pharmacotherapy, developmental theories and human responses to illness. Applicable to students entering in fall 2019 and beyond.

**GN 6502 Clinical Practicum: Nursing of Adults and Older Adults (3.0 credit hours)**

Through clinical experiences, students will develop the psychomotor and critical thinking skills to provide safe, patient-centered, team-based care. Students integrate developmental theories and the roles of communicator, caregiver, advocate, and educator while providing and coordinating care for adults and older adults. Applicable to students entering in fall 2019 and beyond.

**GN 6551 Nursing of Adults and Older Adults II (4.0 credit hours)**

Building on the integrated knowledge from Nursing of Adults and Older Adults I and other previous courses, students continue to apply the nursing process in high acuity settings. Emphasis is placed on the delivery of safe, patient-centered, team-based care of the patient with complex health needs. Applicable to students entering in fall 2019 and beyond.

**GN 6552 Clinical Practicum: Nursing of Adults and Older Adults II (4.0 credit hours)**

Through clinical experiences in high acuity settings, students will continue to develop clinical competencies to provide safe, patient-centered, team-based care for adults and older adults with complex health needs. Applicable to students entering in fall 2019 and beyond.

**GN 6601 Mental Health Nursing (2.0 credit hours)**

This course focuses on psychiatric and emotional disorders across the lifespan. Course content builds upon knowledge acquired in Fundamentals of Nursing, Pathophysiology, and Health Assessment. An emphasis will be placed on utilization of the nursing process with patients presenting with altered physiological and pharmacological processes, and the human response to mental and/or emotional illness. Applicable to students entering in fall 2019 and beyond.

**GN 6602 Clinical Practicum: Mental Health Nursing (2.0 credit hours)**

Students will develop critical thinking skills and communication skills when caring for clients with identified psychosocial and mental health issues. The mental health clinical experience provides an opportunity for the student to integrate, assimilate, and demonstrate the nursing process and theoretical principles taught in the didactic course in mental health settings. Applicable to students entering in fall 2019 and beyond.

**GN 6710 Obstetric Nursing (2.0 credit hours)**

Theory and application of nursing process and nursing roles related to the care of women and childbearing families of diverse psychosocial and cultural backgrounds are examined. Family systems theory, development theories and the nursing process serve as the organizing framework for this group of clients. Employing established standards, students gain knowledge and apply essential principles for professional roles and nursing practice in the care of childbearing women, families and newborns. Students apply the theoretical concepts in the clinical setting. Applicable to students entering in fall 2019 and beyond.

**GN 6711 Clinical Practicum: Obstetric Nursing (2.0 credit hours)**

Clinical practice to develop critical thinking, psychomotor, and communication skills provides students with opportunities to develop competence in the care of antepartum, intrapartum, and postpartum clients, neonates, and families. The roles of caregiver, communicator, caregiver, advocate, and teacher are emphasized. Applicable to students entering in fall 2019 and beyond.

**GN 6720 Pediatric Nursing (2.0 credit hours)**

Emphasizes theory and application of nursing process and nursing roles related to the care of children and their families. Family systems theory, developmental theories, vulnerable population theory and the nursing process serve as the organizing framework for providing care to this group of clients. Students gain knowledge and apply essential principles for nursing practice in the care of children and their families within a culturally diverse population. Students apply the theoretical concepts in the clinical setting. Applicable to students entering in fall 2019 and beyond.

**GN 6721 Clinical Practicum: Pediatric Nursing (2.0 credit hours)**

Provides clinical opportunities to practice the psychomotor, critical thinking, and communication skills in order to develop competence in the care of pediatric clients and their families. Emphasis is placed on integration of didactic knowledge with clinical practice as students continue to develop their roles in the clinical setting. Applicable to students entering in fall 2019 and beyond.

**GN 6801 Leadership and Management in the Clinical Setting (2.0 credit hours)**

This course provides an overview of contemporary leadership and management theories. Using the context of the management process, learners are introduced to the planning, organizing and staffing phases of the management process. Emphasis is given to issues common to first and middle level managers including strategic planning, planned change, time management, organizational structure, power, authority, and power in organizations, and staffing models. Various modes of inquiry, including nursing process, problem-solving models, and decision-making tools are emphasized. Organizational theory, management theories, leadership theories, behavioral theories, and communication strategies are emphasized. Applicable to students entering in fall 2018 and prior.

**GN 6802 Clinical Practicum: Leadership and Management (3.0 credit hours)**

This clinical course provides an opportunity for students to integrate theoretical knowledge, clinical, and leadership skills to develop competency in managing patients in different types of healthcare settings. Emphasis will be placed in the application of nursing process in the roles of professional nursing for patients, families, or communities. Applicable to students entering in fall 2018 and prior.

**GN 6901 Community Health Nursing (2.0 credit hours)**

This course focuses on the nursing care and health promotion of individuals, families, groups, and communities. The health of the community and subgroups within the community are the focus of this course. Students will apply nursing and public health concepts to promote health, prevent disease, and restore the health of population groups.

**GN 6902 Clinical Practicum: Community Health Nursing (2.0 credit hours)**

This course will be a clinical practice to develop critical thinking, psychomotor and communication skills in the care and health promotion of individuals, families and groups. The roles of communicator, caregiver, teacher, advocate, and manager of care are emphasized.

**GN 7550 RN Clinical Seminar (1.0 credit hour, CR/NCR)**

This seminar class provides the opportunity for students to discuss experiences and issues related to their new professional nursing role.

**GN 7570 Clinical Experience (1.0 – 6.0 credit hours, CR/NCR)**

This course is designed to provide students with progressive opportunities to develop and refine the clinical skills needed to meet the competencies in the advanced nursing role. Over the course of their chosen concentration, students will integrate prior nursing education, previous experience and learning objectives in alignment with their concentration focus. Course is repeatable.

**GN 8001 The Scholarship of Teaching Nursing (3.0 credit hours)**

Developing a personal philosophy of teaching is the foundation to becoming an effective educator. Along the journey, the scholarship of teaching is explored by building a course backwards linking learning needs with learning outcomes, course objectives, teaching strategies, and assessment. Further, technology in education is examined with opportunities to implement a teaching plan and practice effective teaching strategies.

**GN 8002 Advanced Scholarship and Leading Change in Nursing Education (3.0 credit hours)**

This course is designed to inform the development of a personal philosophy of nursing education and explore the scholarship of teaching at the curriculum level. Innovations in teaching nursing will be examined, culminating in an evidence-based practice project regarding an innovative strategy that will leverage change in the academic setting. Required for NFLP students.

**GN 8010 Philosophy and Science for Nursing Practice (3.0 credit hours)**

This course focuses on an examination of the philosophical and scientific foundations which reflect the complexity of practice at the doctoral level including the development of nursing science and the phenomenon of concern to nursing practice; the principals of the biology of human structure, function and disease; behavioral and population science, including vulnerable populations; and middle range theories which support practice.

**GN 8020 Quality and Leadership in the 21<sup>st</sup> Century Health Care System (3.0 credit hours)**

This course focuses on an examination of safety and quality improvement and cost effectiveness for clinical practice. Includes principals of business planning, business finance, health law, organizational theory, care delivery models, risk management, negotiation, and leadership especially with the care of vulnerable populations. Examines nursing's leadership role in shaping the health care system of the future.

**GN 8030 Clinical Scholarship, Research, and Evidence-Based Practice (3.0 credit hours)**

This course focuses on an examination and strategies for clinical scholarship and research methods for critique and literacy focusing on epidemiology and evidence-based practice. Includes database and policy development, databases evaluation, and quality and practice improvement. Includes population-based research methods, outcome analysis techniques, and participative research.

**GN 8040 Transformational Information Systems for Health Care (3.0 credit hours)**

This course focuses on an examination of information and technology systems that support research for evidence-based practice, quality improvement, outcome evaluation, best practices, management, and education. Principals for selecting and evaluating information systems, and the ethical, regulatory, and legal issues that surround information technologies are included.

**GN 8050 Social Justice, Health Care Advocacy, and Policy in Nursing Practice (3.0 credit hours)**

This course examines nursing's role in the care of underserved and vulnerable populations. Includes concepts of social justice, health care advocacy, and policy formation and implementation. Examines the structure and function of legislative and regulatory organizations, governance, public relations, and global health care issues.

**GN 8060 Outcome Based Collaboration and Collaborative Models (3.0 credit hours)**

This course examines the role, scope, practice, and culture of different health care professions with a focus on building multidisciplinary and interprofessional collaborative teams. Collaborative communication patterns and synergistic decision-making will be examined in the context of the interprofessional dimensions of health care and health care organizations focusing on the care of vulnerable populations.

**GN 8070 Population Based Prevention in Vulnerable Populations (3.0 credit hours)**

This course examines comprehensive surveillance, prevention, and health promotion approach with underserved and vulnerable populations based on community health and vulnerable population theory. Focuses on the use of epidemiological, biostatistical, environmental, geographic, genetic, behavioral, and socioeconomic data to design, develop, and implement interventions to improve health care access and address gaps in care.

**GN 8080 Care Delivery Improvement: Models and Strategies (3.0 credit hours)**

This course focuses on outcome measurement with individuals, families, populations, including vulnerable populations, and organizations within traditional and innovation care delivery models and settings, using clinical epidemiology and reasoning, systems for leveling evidence, and ethics. Also included are the development of strategies and protocols that reflect nursing's accountability and the highest level of nursing care.

**GN 8090 Practice Immersion Project (1.0 – 6.0 credit hours, CR/NCR)**

This course focuses on the completion of a practice immersion experience and independent evidence-based project in a vulnerable population, which provides an illustration of the essential competencies of the practice doctorate. Course is repeatable up to six units.

**GN 8999 Continuous Enrollment/Dissertation (3.0 credit hours, IP/CR)**

Supervised creation of a dissertation or scholarly project under the guidance of a dissertation/scholarly project committee, demonstrating scholarship skills in writing, reasoning, and interrelating theory and practice. The dissertation/scholarly project is defended in a public oral exam. Repeatable.

**IPE 5000 Patient Centered Cases I– An Interprofessional Approach (1.0 credit hour, CR/NCR)**

This course is a required university seminar for all first-year health professional students. This course prepares students to practice health care services through a team approach. Working in small interprofessional teams, students will explore cases representing conditions across the life span. The cases will integrate elements common to all professionals such as ethical, behavioral, social, and psychological issues. This course is a graduation requirement for all health professional programs.

**IPE 5100 Patient Centered Cases II – An Interprofessional Approach (1.0 credit hour, CR/NCR)**

This course is a required university seminar for all first-year health professional students. This course prepares students to practice health care services through a team approach. Working in small interprofessional teams, students will explore cases representing conditions across the life span. The cases will integrate elements common to all professionals such as ethical, behavioral, social, and psychological issues. This course is a graduation requirement for all health professional programs.

**IPE 6000 Team Training in Healthcare I (1.0 credit hour, CR/NCR)**

IPE 6000 will continue to build upon the knowledge from the IPE 5000 series, but will expand upon that knowledge and require the student to learn and apply advanced tools and strategies that are crucial to develop a collaborative healthcare team. The majority of the course is independent study with students engaging in a large-scale tabletop activity where they apply team tools necessary to solve a healthcare dilemma.

## **Honors and Awards**

The following awards are considered for presentation to CGN students annually:

Academic Achievement Award  
Corinne Faith Donatini Memorial Award  
College of Graduate Nursing Alumni Memorial Award  
Excellence in Scholarship Award  
Nursing Community Excellence Award  
President's Society Award  
Primary Care Award  
Professional Leadership Award  
Student Service Appreciation Award  
The Dean's Award  
The Roy G. and Marion L. Kramer Endowment Award  
Vulnerable Population Service Award  
DNPA Jan Boller Leadership Scholarship

## Academic Calendar

<b>FALL 2019</b>	
DNP, FNP, MSN Pre-program Begins – Incoming Students	July 29, 2019
All Incoming Students – Welcome Week (Mandatory)	August 7-10, 2019
Pre-program Ends – Incoming Students	August 23, 2019
Fall Semester Begins – MSN-E 1 <sup>st</sup> Year – Incoming Students, ENP	August 19, 2019
Fall Semester Begins – All other Students	August 26, 2019
Seminar Weekend #1 – FNP 1 <sup>st</sup> Yr. Core Courses (week 2)	September 6-8, 2019
Seminar Weekend #1 – MSN Distance Courses (week 2)	September 7, 2019
Seminar Weekend #1 – DNP Courses (week 2)	September 8, 2019
Seminar Weekend #2 – FNP 1 <sup>st</sup> Yr. Core Courses (week 10)	October 25-27, 2019
Seminar Weekend #2 – MSN Distance Courses (week 10)	October 26, 2019
Seminar Weekend #2 – DNP Courses (week 10)	October 27, 2019
Fall Semester Ends (Distance Students)	November 22, 2019
Fall Break Begins	November 25, 2018
Classes Resume	December 2, 2019
Fall Semester Ends (MSN-E Students)	December 6, 2019
<b>SPRING 2020</b>	
Spring Semester Begins for ALL Students	January 8, 2020
Seminar Weekend #1 – FNP 1 <sup>st</sup> Yr. Core Courses (week 5)	February 7-9, 2020
Seminar Weekend #1 – MSN Distance Courses (week 5)	February 8, 2020
Seminar Weekend #1 – DNP Courses (week 5)	February 9, 2020
Seminar Weekend #2 – FNP 1 <sup>st</sup> Yr. Core Courses (week 10)	March 13-15, 2020
Seminar Weekend #2 – MSN Distance Courses (week 10)	March 14, 2020
Seminar Weekend #2 – DNP Courses (week 10)	March 15, 2020
Spring Semester Ends (Distance Students)	April 3, 2020
Spring Semester Ends (MSN-E, ENP Students)	April 10, 2020
<b>SUMMER 2020</b>	
Summer Semester Begins for ALL Students	April 27, 2020
Commencement – Graduating Students	May 14, 2020
Seminar Weekend #1 – FNP 1 <sup>st</sup> Yr. Core Courses (week 4)	May 15-16, 2020
Seminar Weekend #1 – DNP Courses (week 4)	May 15, 2020
Seminar Weekend #1 – Non-Grads: MSN Distance Courses (week 4)	May 16, 2020
Seminar Weekend #2 – “FNP Review” (Mand. ALL FNP Students)	July 8-10, 2020
Seminar Weekend #2 – FNP 1 <sup>st</sup> Yr. Core Courses (week 11)	July 10-11, 2020
Seminar Weekend #2 – MSN Distance Courses (week 11)	July 11, 2020
Seminar Weekend #2 – DNP Courses (week 11)	July 12, 2020
Summer Semester Ends (Distance Students)	July 24, 2020
Summer Semester Ends (MSN-E First Year Students)	August 7, 2020
